For greenhouse use only

ACTIVE INGREDIENT
Paecilomyces fumosoroseus strain FE 9901* 18.0%
INERT INGREDIENTS 82.0%
Total 100.0%

*Contains a minimum of 2 x 10⁷ colony forming units of Paecilomyces fumosoroseus strain FE 9901 per gram (Dry Weight Basis).

CAUTION
KEEP OUT OF REACH OF CHILDREN
See attached booklet for additional Precautionary Statements, First Aid, Complete Directions for Use and Warranty.

First Aid

IF IN EYES: • Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF INHALED: • Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. Call a poison control center or doctor for further treatment advice.

IF ON SKIN OR CLOTHING: • Take off contaminated clothing. Rinse skin immediately with plenty of water for 15–20 minutes. Call a poison control center or doctor for further treatment advice.

IF SWALLOWED: • Call a poison control center or doctor immediately for treatment advice. Have a person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

HOT LINE NUMBER
Have the product container or label with you when calling a poison control center or doctor or going for treatment. For emergency information on this pesticide product (including health concerns, medical emergencies, or pesticide incidents), call the National Pesticide Information Center at 1-800-858-7378, 6:30 AM to 4:30 PM Pacific Time (PT), seven days a week. During other times, call the poison control center at 1-800-222-1222.

Precautionary statements
Hazard to humans and domestic animals. CAUTION.
Harmful if swallowed, absorbed through skin, or inhaled.
Avoid contact with skin, eyes or clothing. Avoid breathing vapors. Prolonged or repeated skin contact may cause allergic reactions in some individuals. Wear protective eyewear, either goggles, face shield, or shielded safety glasses. Wear water proof gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum or using tobacco. Remove and wash contaminated clothing before reuse.

Personal Protective Equipment (PPE): Applicators and other handlers must wear long-sleeved shirt and long pants, and shoes plus socks. Wear a dust/mist-filtering respirator (MSHA/NIOSH approval number prefix TC-21C), or a NIOSH approved respirator with any N-95, R-95, P-95 or HE filter for biological products. Remove contaminated clothing and follow manufacturer’s instructions for cleaning/maintaining PPE before reuse. If no such instructions are available use clothing detergent and hot water for cleaning all washable PPE. Keep and wash PPE separately from other laundry.

User safety requirements
Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove PPE immediately after handling this product. If gloves are worn, wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

Environmental hazards
Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when cleaning equipment or disposing of equipment washwater.

Directions for use
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. For greenhouse use only. Not for use on food crops. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

Agricultural use requirements
Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted entry intervals (REI). The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not allow worker entry into treated areas during the restricted entry interval (REI) of four (4) hours or until solution has dried.
PPE required for entry to treated areas (that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water) is: coveralls, chemical resistant gloves and shoes plus socks.

Non-agricultural use requirements
The requirements in this box apply to uses of the product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries or greenhouses.

Keep unprotected persons out of treated areas until sprays have dried or dusts have settled.

For use in controlling Whitefly, Aphids, Thrips, Psyllids, Mealybugs, Leaf hoppers, Plant bugs, Weevils, Grasshoppers, Mormon Crickets, Locust, Beetles and Fungus Gnats on non-food crops and ornamentals in greenhouse.

NOFLY™ WP contains live spores of the naturally occurring fungus Paecilomyces fumosoroseus strain FE 9901 and food grade inert ingredients. The spores are alive and may be harmed by storage at high temperatures or contact with water for more than 24 hours.

NOFLY™ WP can be applied using conventional spraying equipment. Use of manual sprayers is highly recommended, with a minimum working pressure of 40 psi.

NOFLY™ WP works best in a pest management program designed to keep insect populations below levels which damage crops. Typically, it takes 3–7 days for an infected insect to die and 7–10 days after the first spray to see a reduction in an insect population. Application rates, spray frequency, spray coverage and insect numbers affect the speed at which insect populations are reduced. Frequent scouting for insects in crops is recommended. NOFLY™ WP is most effective when used at the first appearance of insects in the crop, before high insect populations develop.
NOFLY™ WP may be combined with chemical insecticides for rapid knockdown of damaging insect populations or large numbers of insects moving into crops. NOFLY™ WP can also be used in combination with fertilizers and micronutrients. If tank mixes are desired, observe the most restrictive directions, precautions, and limitations on labeling of all products used. Do not exceed label dose rates. This product cannot be mixed with any product containing a label prohibition against such mixing. The application of fungicides is not compatible with NOFLY™ WP. A week is the minimum period allowed between treatment with fungicides and application of the product. Applications of any other pesticides must be carefully studied, taking into account that the active substance of NOFLY™ WP consists of a microorganism and any substance that could affect its viability must be avoided.

<td>1–4 lbs/acre 4–16 oz/11,000 sq ft of greenhouse applied at a minimum of 0.1% (28-oz per 100 gallons)</td>
</tr>
<tr>
<td>Applications must be done at the first sign of insect larvae.</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Preparation instructions:
- If refrigerated, remove product from refrigeration unit and store at room temperature for at least 3 days prior to application.

Application instructions:
- First applications should be done at the first symptoms of the presence of larvae or eggs on the leaves. Repeat applications 2 – 3 times at 15 day intervals or shorter (5 – 8 days) in the case of heavy infestations.
- Apply enough quantity of solution for a good coverage on the plants, trying to reach the lower-sides of the leaves. It is recommended to apply 26 gallons / 11,000 sq ft greenhouse on small crops and up to 100 gallons / 11,000 sq ft on full grown crops in greenhouse.
- Dissolve the contents of bags in an appropriate volume of water and mix with a stirring device to get a homogeneous suspension. Apply immediately using conventional-spraying equipment. A minimum pressure of 40 psi is recommended for the applications.
- Applications should be conducted during low solar radiation (late afternoon or early night) when there is high relative humidity inside the greenhouse and the temperature is below 30°C (86°F).
- NOFLY™ WP supports the action of natural predators of whitelkey and other pests; therefore, it is ideal for IPM programs.

Storage and disposal
Do not contaminate water, food, or feed by storage and disposal.

Pesticide storage
NOFLY™ WP should be stored at refrigerated temperature (4°C – 8°C or 39°F – 46°F). Under these conditions the product is physico-chemically stable for at least 3 months, although viability may decrease with a factor 10.

Pesticide disposal
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container handling
Non-refillable container. Do not reuse or refill this container. Completely empty bag into application equipment, then offer for recycling if available or dispose of empty bag in a sanitary landfill or by incineration or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY
The Directions for Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. Novozymes BioAg warrants that at the time of the first sale of this product it conforms to the chemical description on the label and when used according to the label directions under normal growing conditions is reasonably fit for the purposes referred to above. Buyers/Users of this product assume full risk for any use contrary to the specified directions. If this product does not perform as warranted above and to the extent consistent with applicable law, customer’s sole remedy for breach of warranty shall be replacement of the product or refund of the purchase price paid, at the option of Novozymes BioAg.

EXCEPT AS PROVIDED ELSEWHERE IN WRITING CONTAINING AN EXPRESSED REFERENCE TO THIS WARRANTY AND LIMITATION OF DAMAGES, SELLER MAKES NO OTHER EXPRESSED OR IMPLIED WARRANTY OR GUARANTEE TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, INCLUDING ANY OTHER EXPRESSED OR IMPLIED WARRANTY OF FITNESS OR OF MERCHANTABILITY, AND NO AGENT OF SELLER IS AUTHORIZED TO DO SO.
