Alcohol Ear Mite Treatment

**DIRECTIONS FOR USE**

- To Kill Ear Mites: Gently insert a dropper into the ear canal to the depth indicated and dispense the labeled number of drops into each ear. Massage base of ear to ensure insecticidal action penetrates ear canal.

**Body Weight Dosage**

**Conditions for which this preparation is used per the veterinary physician**

- Irritated, inflamed, wet, or oozing ears, or ears that have been recently treated with any other solution.
- Ear mites live in the ear canal of the animal and cause a scurfy, greasy, or brownish, waxy debris to be formed. Ear mites may be detected by placing some of the waxy debris on a dark surface and watching for the movement of tiny white specks away from the debris.

**FIRST AID**

- IF ON SKIN:
  - Take off contaminated clothing.
  - Rinse skin immediately with plenty of water for 15-20 minutes.
  - Call a poison control center or doctor if you think you may have been exposed.

- IF IN EYES:
  - Rinse eyes immediately with plenty of water for 15-20 minutes.
  - Call a poison control center or doctor if you think you may have been exposed.
