CINNERATE is an innovative formulation with high essential oils content, providing a knock-down and eradicative effect towards several species of mites, insects and fungus.

CINNERATE disrupts the functioning of cell membranes as well as inhibits the growth and promotes dehydration.

KEEP OUT OF REACH OF CHILDREN

CAUTION

FIRST AID
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For emergency information, call the National Pesticides Information Center at 1-800-858-7378, 7:30 AM to 3:30 PM, Pacific time (PT), Mon. - Fri. During other times, call the Poison Center at 1-800-222-1222.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

Caution. Causes moderate eye irritation. Prolonged or frequent contact may cause allergic reactions in some individuals. Avoid contact with eyes, skin and clothing. Wear protective eyewear and gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and handlers must wear:

• Long-sleeved shirt and long pants
• Socks and shoes
• Protective eyewear
• Chemical resistant gloves made of neoprene, nitrile or natural rubber

User Safety Recommendations

Users should remove clothing/PPE immediately if the product gets inside. Then wash thoroughly and put on clean clothing.

Users should remove PPE immediately after handling this product. Wash the outside of the gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

The application of CINNERATE does not modify odor or taste of commodities. Crops can be consumed without a security period of time after application.
PLANT SAFETY AND COMPATIBILITY

Rate recommendations are based on product testing on a wide variety of plants. However, not all plant species/varieties/cultivars have been tested with this product, applied alone or with possible spray mix combinations (adjuvants, fertilizers, or other pesticides). We recommend testing all tank mix combinations for physical compatibility and plant safety. Test spray a few leaves with intended spray mix 1 day before spraying entire plant. Do not use if leaf burn or spotting is observed. Use with care on plants with tender tissue. Do not apply to wilted or otherwise stressed plants, or to newly transplanted material prior to root establishment. Do not apply when the temperature is >90°F. Consult your dealer or distributor for specific recommendations. This product cannot be mixed with any product containing a label prohibition against such mixing. Do not exceed label dosage rate.

TARGETED PESTS

MITES: including but not limited to: Two spotted spider mite, European red mite, Pear Leaf Blister Mite, Pear Rust Mite, etc.

INSECTS: including but not limited to Scales (such as California Red Scale, Yellow Scale, Black Scale, Soft Scale, etc.), Aphids (such as Black Mite, Pear Rust Mite, etc.), Mealybugs (such as Pseudococcus spp., Coccus, mealybugs (such as Dactylopius coccus, Pseudococcus spp., Graphocephala coccinea), and Three spot mite). Mites and Mealybugs are known to have strong adhesive properties which make them difficult to dislodge from the plant. Some mites and mealybugs are also able to produce a waxy substance that can coat the plant, making it difficult to apply treatment. When treating for mites and mealybugs, it is important to use products that are specifically labeled for these pests, as well as to use proper techniques such as thorough mixing of the treatment and thorough coverage of the plant surfaces. When treating for mealybugs, it is also important to consider the stage of development of the mealybug, as different stages may require different treatment methods.

APPLICATION RATE TABLE

For the control of the different pests, use CINNARITE as indicated in the following table for each crop. Use the higher rate when disease pressure is high or a severe infection has occurred.

CROPS

Note to User: Unintentional consequences such crop injury may result due to environmental or growing conditions, manner of use or application. Because plant tolerance of pesticides varies as conditions vary, treat a few plants under conditions unexpected to be encountered and observe for plant damage prior to full-scale application to large number of plants.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal. Pesticide Storage: Store in original container in a cool, well-ventilated area away from children, animals, foods, feeds and seeds. Avoid excessive heat and freezing temperatures. Keep container tightly closed during storage.

Product Disposal: Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling: Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state or local ACRC recycler, visit the ACRC web page at www.acrcycle.org. Decontaminated containers may also be disposed of in a sanitary landfill.

WARRANTY AND CONDITIONS OF SALE

SELLER OFFERS AND THE BUYER ACCEPTS THIS PRODUCT UNDER THE FOLLOWING AGREED TERMS AND CONDITIONS OF SALE AND WARRANTY.

The directions for the use of this product are believed to be reliable and should be followed carefully. However, it is impossible to take into account all the variables and to eliminate risks associated with its use. Injury or damage may result because of conditions that are beyond the control of the SELLER.

SELLER warrants that this product conforms to the chemical description on this label and is believed to be reliably and should be followed carefully. However, it is impossible to take into account all the variables and to eliminate risks associated with its use. Injury or damage may result because of conditions that are beyond the control of the SELLER. SELLER MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

To the fullest extent permitted by law, the SELLER shall not be liable for consequential, special or indirect damages resulting from the use or handling of the product. Any variation or exemption from this warranty must be in writing and signed by authorized representative or the seller.

This product has not been registered by the U.S. Environmental Protection Agency (EPA). SEIPASA SA represents that this product qualifies for 25(b) exemption from registration under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA).
