Nolvasan Solution 
Chlorhexidine diacetate 
Disinfectant 
Bactericide 
Virucide†
For Animal Premises Use Only

**Active Ingredient:**
Chlorhexidine (1,1'-Hexamethylenebis[3-[2-(3-Chloro-1-propanoxo)ethoxy] bicyclo[2.2.1]heptane-2,7-dicarboxylate])

**Other Ingredients:**
2%

The product contains the active ingredient at 0.168 pounds per gallon.

**Recommended Concentration For Use**
- For the disinfection of inanimate objects to aid in control of canine distemper virus, equine influenza virus, pseudorabies virus, hog cholera virus, parainfluenza-3 virus, bovine viral diarrhea virus, infectious bronchitis virus, hog kidney virus, bovine rhinotracheitis virus, infectious bovine rhinotracheitis virus, pseudorabies virus, swine vesicular disease virus, and feline panleukopenia virus. 
- For the disinfection of inanimate objects to aid in control of bovine respiratory syncytial virus (BRSV), bovine viral diarrhea virus, infectious bovine rhinotracheitis virus, pseudorabies virus, swine vesicular disease virus, and feline panleukopenia virus. 
- For the control of canine coronavirus (CCV) in laboratory settings when used as directed.
- For the disinfection of inanimate objects to aid in control of bovine respiratory syncytial virus (BRSV), bovine viral diarrhea virus, infectious bovine rhinotracheitis virus, pseudorabies virus, swine vesicular disease virus, and feline panleukopenia virus.

**Dimensions:**
14.0” x 4.75”

**Label:**
DWG-300065-00
205000

**Recommended Concentration For Use:**
1 Gallon (3.7 L)

**For Animal Premises Use Only**

**DIRECTIONS FOR USE**

1. Expose or soak all equipment and/or utensils with the recommended disinfecting solution for a period of 10 minutes.

2. Saturate all surfaces with the recommended disinfecting solution for a period of 10 minutes.

3. Remove any loose dirt, litter, etc., that might be lying on floor or attached to the equipment.

4. Empty all troughs, racks and other feeding and watering appliances.

5. Remove all litter and manure from floors, walls and surfaces of barns, pens, stalls, chutes and other facilities and fixtures o

6. Expose or soak all equipment and/or utensils with the recommended disinfecting solution for a period of 10 minutes.

7. Saturate all surfaces with the recommended disinfecting solution for a period of 10 minutes.

8. Remove contaminated clothing and wash before reuse.

**For dipping teats as an aid in controlling bacteria that causes mastitis. Make up a final dipping solution by putting 32 ounces (one quart) of Nolvasan Solution in a clean gallon container, adding 6 ounces of glycerin and then adding clean potable water until you have a total volume of one gallon.**
