This product is intended for use on pre-cleaned hard, non-porous surfaces in areas where the disinfection of surfaces is required. These areas include medical offices, surgical centers, laboratories, emergency rooms, patient care areas, waiting areas, nursing homes, correctional facilities, educational facilities, cafeteria and dining areas, food service areas, day care facilities, and animal kennels. To clean surfaces, use a fresh wipe on surfaces. Repeat as necessary until surfaces are visibly clean.

**STORAGE AND DISPOSAL**

Do not contaminate food, feed or storage areas.

**PRECAUTIONARY STATEMENTS**

Caution: Harmful if inhaled or absorbed through skin. Causes moderate eye irritation. Avoid breathing vapors or fumes. Wash hands before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

**First Aid**

- **Inhalation:** If not breathing, call 911 or an ambulance before giving artificial respiration, preferably mouth to mouth.
- **In eyes:** Hold eyes open and rinse slowly and gently with water for 15-20 minutes.
- **On skin:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.
- **Medical treatment:** Call a polyclinic center or doctor for treatment advice. Have the product container or label with you when calling a polyclinic center or doctor or going for treatment. You may also contact 9-105-209-254 for emergency medical treatment information.

**Physical or Chemical Hazards**

Do not store near heat or open flame.

Manufactured in the U.S.A. for: SAFETEC OF AMERICA, Inc.

Telephone: 1-800-456-7077.
Sanitization Directions: For hard, non-porous non-food contact surface sanitization:

- Pre-clean hard, non-porous surfaces to be disinfected with a clean wipe. Use a fresh, clean wipe to disinfect hard, non-porous surfaces.
- Apply this product by wiping to thoroughly wet hard, non-porous surfaces.
- Allow surfaces to air dry or allow to dry naturally.

Do not use this product as a baby or skin wipe, or on contact lenses!

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

DIRECTIONS FOR USE

- This product is intended for use on pre-cleaned hard, non-porous surfaces in areas where the disinfection of surfaces is required.

For Surface Cleaning:

- Use a fresh wipe on surfaces. Repeat as necessary until surfaces are visibly clean.

Dispensing Directions:

- Use a fresh wipe on surfaces. Repeat as necessary until surfaces are visibly clean.

This product is intended for use on pre-cleaned hard, non-porous surfaces in areas where the distribution of microorganisms is required.

For Medical/Surgical Equipment and Devices:

- This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.
- This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:

- This product is intended for use on pre-cleaned hard, non-porous surfaces in areas where the distribution of microorganisms is required.
- This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.
- This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

For medical/surgical equipment and devices:

- This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.
- This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.

This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.

This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.

This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.

This product can be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection.

This product is not to be used as a terminal sterilant or high-level disinfectant on any surface or instrument that (1) may be used to pre-clean critical and semi-critical medical devices prior to sterilization or high-level disinfection, (2) may be used to clean, disinfect, or sterilize medical devices, or (3) may be used to clean, disinfect, or sterilize surgical instruments.
