It is a violation of federal law to use this product in a manner inconsistent with its labeling.

Do not apply this product in a manner that will contact workers or other persons, either directly or through drift. Only protected workers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS

Use this product in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions for handlers. See the statements on this label about Personal Protective Equipment (PPE) and the restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard (WPS).

There is a restricted-entry interval of zero hours for this product.

NON-AGRICULTURAL USE REQUIREMENTS

The requirements in this box apply to uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

There are no restrictions.

HOW TO APPLY: Scatter the slug and snail bait granules on the soil around or on the plants to be protected. Do not apply to the leaves of soft-leaved plants such as leafy greens or in places where slugs/snails are attracted to cover or soil. Use granules with similar particle size. Apply the higher rates if the infestation is severe or if the area is heavily watered or after long periods of heavy rain. Repel the slugs as the bait is consumed or at least every two weeks.

Do not place in piles. See specific directions for different plant types and for inside greenhouses.

Broadcast or Aerial Application: Apply uniformly with ground (granular spreader) or aerial equipment calibrated to give the correct dosage within the application rates on this label. Do not apply when weather conditions favor drift from treated areas. Do not use broadcast or aerial application on sensitive soft leaved plants such as leafy greens and herbs.

WHERE TO APPLY: Treat all likely areas of infestation, especially around perimeters of plots where these pests travel into plant areas from the perimeters. Slugs/snails favor damp places and in weeds or ditches around field margins. Other favorite areas are flower gardens, rockeries, hedgerows, dichondra lawns, citrus groves, ivy, patches, and other ground cover where they obtain shelter by day.

SUMMARY TO APPLY: 5 - 20 lbs/acre or 0.11 - 0.44 lbs/1000 sq. ft. 0.5 teaspoons/sq. yd. Use higher rates when slugs/snails are infestations are heavy.

Vegetables

Use the bait to protect any vegetables from slug and snail damage, including (but not limited to): artichokes, asparagus, beans, beets, blackeyed peas, broccoli, Brussels sprouts, carrots, celery, chard, collard greens, corn, cucumbers, eggplants, endive, garlic, ginger, ginseng, lettuce, mustard greens, okra, onions, parsnips, peas, peppers, potatoes, radishes, rutabagas, spinach, squash, sweet potatoes, Swiss chard, tomatoes, and turnips. Scatter the bait around the perimeter of the vegetable plantings to provide a protective “barrier” for slugs and snails entering the vegetable plantings. If slugs or snails are inside the rows, then scatter the bait on the soil around the plants and between the rows.

Fruits Including Citrus

Use this bait to protect fruits from slugs and snails, including (but not limited to): apples, avocados, apricots, cherries, grapes, melons, peaches, plums, nectarines, citrus, pears. For seedlings spread the bait around the base of the plants. Apply in a 6-inch circular band around the base of the plants to be protected. For older trees, spread the bait around the base of the trees to intercept slugs and snails traveling to the trunk. Apply the bait in orchards, using standard granular spreaders methods.

Berries

Use the bait to protect berries from slugs and snails, including (but not limited to): strawberries, blackberries, blueberries, boysenberries, loganberries, marionberries, and raspberries. Spread the bait around the perimeter of the plots to intercept slugs and snails migrating toward the berries. Scatter by hand or with granular spreaders. If slugs and snails are already in the plots, then carefully spread bait between the furrows near the base of the plants. For small plots, treat around the base of the plants to be protected. Do not spread over the entire area but apply selectively.

Herbs

Use the bait to protect any herbs from slug and snail damage, including (but not limited to): arugula, basil, dill, chives, fennel, marjoram, mint, oregano, parsley, and thyme. Scatter the bait around the perimeter of the area to provide a protective “barrier” for slugs and snails entering the plot or field. If slugs or snails are inside the rows, then scatter the bait on the soil around the base of the plants and between the rows.

Field Crops

Use the bait to protect field and seed crops from slugs and snails, including: barley, beans, canola, field corn, sweet corn, soybeans, sugarcane, tobacco, asparagus, beets, broccoli, Brussels sprouts, cabbage, carrots, cauliflower, cucumbers, lettuce, oats, onions, peas, potatoes, radishes, strawberries, tomatoes, and turnips. At the seedling and later stages, apply the bait between the rows and around the perimeter of the field.

Artichokes

Use the bait to protect artichokes from slugs and snails. At the seedling and later stages, apply the bait between the rows and around the perimeter of the field.

Outdoor Ornamentals

Scatter bait in a 6 inch circular band around the base of the plants to be protected. If plants are near to a grassy area, spread the bait between the ornamentals and the grass. Slugs and snails traveling to the plants will encounter the bait before reaching the plant.

Greenhouses

Where slugs or snails are a problem in greenhouses, scatter the bait in the plant pots of plants being damaged or around pots on greenhouse benches.

Outdoor Container-Grown Nursery Plants

Where slugs or snails are a problem in outdoor nurseries, scatter the bait in the plant containers.

Commercial Turf, Sod, Golf Courses and Grass Buffers around Gardens, Crop Areas and Ornamentals

Use the bait on turf and sod for resale, golf courses, lawns, and on buffer zones around gardens and agricultural crop areas.

GRASS AND FORAGE GROWN FOR SEED PRODUCTION AND CEREAL CROPS

Use the bait on grass grown for seed production, legume forage grown for seed production (such as clover and alfalfa), and wheat (cereals).

Non-Crop Areas

Use the bait to protect non-crop areas, including parkeys, lawn, barrier strips and buffer zones around agricultural crop areas.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. PESTICIDE STORAGE: Store this product in its original container and keep in a secure storage area out of reach of children and domestic animals. PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. CONTAINER HANDLING: Nonrefillable container: Do not reuse or refill this container. Offer for recycling, if available. Completely empty metal drum, plastic bag, box or plastic tote into application equipment. Then dispose of empty metal drum, plastic bag, box or plastic tote in sanitary landfill, or by incineration, or if allowed by State and local authorities, by burning, if burned, stay out of smoke.

BATCH CODE

Warranty to the extent consistent with applicable law, the seller warrants that this product conforms to the chemical description on this label and is reasonably fit for purposes stated on this label only when used in accordance with the directions for use. This warranty does not extend to the use of this product contrary to label directions, or under abnormal use conditions, or under conditions not reasonably foreseeable to seller. To obtain warranty, contact seller. The extent consistent with applicable law, seller makes no other warranties, either expressed or implied. Warranty: The warranty in this box applies to all uses of this product that are not within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The warranty applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. The warranty only applies to uses of this product that are covered by the Worker Protection Standard (WPS).
