This innovative product was invented out of necessity. I was offended by the toxic smell of moth balls and the unpleasant odors we found in our farm implements in the spring, so I came up with a plant-based alternative that would both freshen and release the proven essential oils, reliably 'keeping pests out' of the indoor spaces where we live, work, and play. Stay Away® Moths pouches placed in undisturbed areas with the necessary protein needed for the larvae to grow. Adult moths use their sense of smell to locate the ideal environment to lay their eggs—quiet, protected storage areas. Before Use: Remove plastic wrap from pouch. Do not place directly on furniture or finished surfaces as product may stain. How to Use: Use one pouch per storage container or small closet; two pouches per small room. Increase the number as needed until desired results are obtained (usually 30–60 days). Use INDOOR/ENCLOSED AREAS of pouches as needed until desired results are obtained (usually 30–60 days). Use one pouch per storage container or small closet; two pouches per small room. Increase the number as needed until desired results are obtained (usually 30–60 days). Use INDOOR/ENCLOSED AREAS of pouches as needed until desired results are obtained (usually 30–60 days). Use one pouch per storage container or small closet; two pouches per small room. Increase the number as needed until desired results are obtained (usually 30–60 days). Use one pouch per storage container or small closet; two pouches per small room. Increase the number as needed until desired results are obtained (usually 30–60 days). Use one pouch per storage container or small closet; two pouches per small room.
