Supplemental Label

For aerial application

This supplemental label expires December 31, 2016, and must not be used or distributed after this date.

Active Ingredient:
pyroxasulfone: 3-[[5-(difluoromethoxy)-1-methyl-3-(trifluoromethyl)-
1H-pyrazol-4-yl]methyl]sulfonyl]-4,5-dihydro-5,5-dimethylisoxazole ................................................................. 85.0%
Other Ingredients: .................................................................................................................. 15.0%
Total: .................................................................................................................................. 100.0%
Contains 0.85 pound of pyroxasulfone per pound formulated as a water-dispersible granule (WG)

EPA Reg. No. 7969-338

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Zidua® herbicide container label, EPA Reg.
  No. 7969-338, must be in possession of the user at the time of application.
- Read the label affixed to the container for Zidua before applying.
- Use of Zidua according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Zidua.

Product Information

Zidua is a selective rate-dependent residual preemergence herbicide for controlling annual grass
weeds, sedges, and annual broadleaf weeds in labeled

crops. Refer to the Zidua container label and to
EPA-approved supplemental labeling for use directions
in labeled crops and for a complete list of weeds
controlled.

Personal Protective Equipment

Applicators and other handlers must wear:

- Long-sleeved shirt and long pants
- Chemical-resistant gloves made of any
  waterproof material such as barrier laminate,
  butyl rubber ≥ 14 mils, nitrile rubber ≥ 14 mils,
  neoprene rubber ≥ 14 mils, natural rubber ≥ 14 mils,
  polyethylene, polyvinyl chloride ≥ 14 mils, or
  viton ≥ 14 mils
- Shoes plus socks

For aerial application, mixers and loaders must also
wear a PF5 respirator.

Follow manufacturer’s instructions for
cleaning/maintaining PPE. If no such instructions exist
for washables, use detergent and hot water. Keep and
wash PPE separately from other laundry. Remove and
wash contaminated clothing before reuse. Discard
clothing and other absorbent materials that have been
drenched or heavily contaminated with this product’s
concentrate. DO NOT reuse them.
Aerial Application Requirements

**Spray Carrier Volume.** Use 3 or more gallons of water per acre. The actual minimum spray volume per acre is determined by the spray equipment used. Use adequate spray volume to provide accurate and uniform distribution of spray particles over the treated area and to avoid spray drift.

The following measures must be followed to reduce the potential of spray drift to nontarget areas from aerial applications:

1. The distance of the outermost nozzles on the boom must not exceed 3/4 the length of the wingspan or 90% of rotor blade diameter.
2. Use low-drift nozzles such as straight-stream nozzles (D-4 or larger). **DO NOT** use nozzles producing a mist droplet spray.
3. Nozzles must always point backward parallel with the airstream and never be pointed downward more than 45 degrees.
4. Without compromising aircraft safety, application should be made at a height of 10 feet or less above the crop canopy or tallest plants. Applicators must follow the most restrictive use cautions to avoid drift hazards, including those found in this labeling as well as applicable state and local regulations and ordinances.
5. **DO NOT** apply during periods of temperature inversions or stable atmospheric conditions.
6. Avoid potential adverse effects to nontarget areas by maintaining a 30-feet buffer between the application area and the **closest downwind edge** of sensitive terrestrial habitats (such as grasslands, forested areas, shelter belts, woodlots, hedgerows, riparian areas, shrub lands, and crop lands).

Refer to the Zidua® herbicide container label for additional information about application methods and equipment, cleaning spray equipment, and spray drift management.
