SUPPLEMENTAL LABELING

This supplemental label expires on September 30, 2016 and may not be used or distributed after this date.

READ THE ENTIRE LABEL FOR ROUNDUP WEATHERMAX® HERBICIDE BEFORE PROCEEDING WITH THE USE DIRECTIONS CONTAINED IN THIS SUPPLEMENTAL LABELING.

When using Roundup WeatherMAX Herbicide as permitted according to this supplemental labeling, read and follow all applicable directions, restrictions, and precautions on the label booklet provided with the pesticide container and on this supplemental labeling. This supplemental labeling must be in the possession of the user at the time of pesticide application.

Seed Production of Corn Hybrids Using the Roundup® Hybridization System (RHS)

Keep out of reach of children

CAUTION!

In case of an emergency involving this product, call collect, day or night, 314-694-4000.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This label must be in the possession of the user at the time of herbicide application.

ROUNDUP READY® CROPS CONTAIN A PATENTED GENE THAT PROVIDES TOLERANCE TO GLYPHOSATE, THE ACTIVE INGREDIENT IN THIS PRODUCT. THIS PRODUCT WILL CAUSE SEVERE CROP INJURY OR DESTRUCTION AND YIELD LOSS IF APPLIED TO CROPS THAT ARE NOT GLYPHOSATE TOLERANT. AVOID CONTACT WITH FOLIAGE, GREEN STEMS, OR FRUIT OF CROPS, OR ANY DESIRABLE PLANTS THAT DO NOT CONTAIN A GLYPHOSATE-TOLERANCE GENE, AS SEVERE PLANT INJURY OR DESTRUCTION COULD RESULT.

See the “PRODUCT INFORMATION,” “MIXING” and “ROUNDUP READY CROPS” sections of the Roundup WeatherMAX herbicide product label for important product use information.

The RHS designation indicates that the corn contains Monsanto proprietary gene technology that allows for tassel-only susceptibility to this product. Use of this product on corn hybrids or inbreds that are not designated as RHS or as corn containing Roundup Ready 2 Technology could result in severe crop injury and yield loss.

USE INSTRUCTIONS: Refer to the following table for maximum application rates of this product for corn hybrid seed production using the RHS.
<table>

RESTRICTIONS: Minimum spray volume for ground and aerial application is 2 gallons per acre (GPA). Preharvest and Post-Harvest application allowed only if the combined total maximum application rate of 5.3 quarts per acre is not exceeded.

EARLY-SEASON WEED CONTROL

This product may be used for early-season weed control up to the V8 stage (8 leaves with collars) in corn seed production fields planted with corn containing Roundup Ready 2 Technology and RHS corn inbred recipient lines.

TYPES OF APPLICATION: Preplant; At-Planting; Preemergence; Postemergence (in crop)

Preplant, At-Planting, Preemergence

USE INSTRUCTIONS: This product may be applied alone or in a tank mixture before, during or after planting.

TANK MIXTURES: This product may be tank-mixed with the products listed below. Ensure that the product used is labeled for application prior to emergence of corn. Read and follow label directions for all products in the tank mixture. Apply these tank mixtures in 10 to 20 gallons of water, or 10 to 60 gallons of nitrogen solution, per acre.

**Aim EC; Axiom; Balance Flexx; Banvel; Bicep MAGNUM; Bicep II MAGNUM; Bicep Lite II MAGNUM; Bullet; Cinch; Cinch ATZ; Clarity; Corvus; Degree; Degree Xtra; Distinct; Dual MAGNUM; Dual II MAGNUM; Frontier; FuiTime; Guardsman; Guardsman MAX; Harness; Harness Xtra; Harness Xtra 5.6L; Hornet; Keystone; Keystone LA; Lariat; Leadoff; Linex; Lorox; Marksmen; Micro-Tech; Outlook; Prowl; Python; Python II; Radius; Resolve; Resource; Shark; Sharpens; Simazine; Stalwart; Stalwart C; Stalwart Xtra; Surpass; TopNotch; TripleFlex; 2,4-D; acetochlor; alachlor; atrazine; carfentrazone-ethyl; clomazone; dicamba; diflufenopyr; dimethanamid; dimethanamid-p; flufenacet; flumetsulam; flumiclorac penty ester; isoxaflutole; linuron; metolachlor; s-metolachlor; metribuzin; pendimethalin; rimsulfuron; saflufenacil; simazine; thiencarbazone-methyl

RESTRICTIONS: Maximum quantity of this product that may be applied for all preplant, at-planting and preemergence applications combined is 3.3 quarts per acre per season.

Refer to individual tank-mix product label for restrictions and precautions; use according to the most restrictive precautionary statements for each product in the tank mixture.

NOTE: For maximum weed control, make a postemergence (in-crop) application of this product following the use of the preemergence residual products listed above.

Postemergence (In-crop)

USE INSTRUCTIONS: This product may be applied alone or in a tank-mix over the top of corn being grown for hybrid corn seed production using the RHS from emergence to the V8-stage of corn plant development (8 leaves with collars).

When applied as directed, this product will control annual grasses and broadleaf weeds listed on the product label. Many perennial grasses and broadleaf weeds will be controlled or suppressed with one or more application of this product. Make a postemergence application of 16 to 22 fluid ounces of this product per acre before weeds exceed 4 inches in height (before they become competitive with the crop). Repeat this application before new flushes of weeds exceed 4 inches in height, up to a maximum total application rate of 64 fluid ounces of this product per acre per season.

TANK MIXTURES: This product may be tank-mixed with the following products. Ensure that the product used in the tank mixture is registered for application postemergence (in-crop) to corn. Read and follow label directions of all products in the tank mixture.

**Aim EC; Banvel; Basis; Bullet; Callisto; Capreno; Clarity; Corvus; Degree; Degree Xtra; Distinct; Equip; Harness; Harness Xtra; Harness Xtra 5.6L; Hornet; Impact; Laudis; Marksman; Micro-Tech; Option; Resolve; Resource; Shark; Status; TripleFlex; Warrant; 2,4-D; acetochlor; alachlor; atrazine; carfentrazone-ethyl; clomazone; dicamba; diflufenopyr; flumetsulam; flumiclorac penty ester; formsulfuron; halosulfuron-methyl; iodosulfuron-methyl-sodium; isoxaflutole; mesotrione; nicosulfuron; rimsulfuron; tembotrione; thifensulfuron methyl; toprimezone**

*Bullet and Micro-Tech are not registered for use as a postemergence application in Texas.

**RESTRICTIONS:** Do not apply more than a total of 64 fluid ounces of this product per acre for postemergence (in-crop) application for early-season weed control. Allow a minimum of 10 days between in-crop applications of this product.

Refer to individual tank-mix product label for restrictions and precautions; use according to the most restrictive precautionary statements for each product in the tank mixture.

**TASSEL CONTROL**

**USE INSTRUCTIONS:** This product may be applied at 11 to 32 fluid ounces per acre as an over-the-top broadcast application for tassel control in RHS-based seed production fields from the V8 stage until either the V13 stage or 100 GDU (Growing Degree Units) before flowering.

**RESTRICTIONS:** Make no more than two applications of this product for tassel control.

**LATE-SEASON WEED CONTROL**

**TYPES OF APPLICATION:** Preharvest, Post-Harvest

**Preharvest**

**USE INSTRUCTIONS:** Up to 22 fluid ounces of this product per acre may be applied for annual and perennial weed control prior to harvest.

**RESTRICTIONS:** The maximum combined total amount of this product that may be applied per year, including for weed control and tassel control, is 5.3 quarts per acre. A preharvest application of this product may be made only if this maximum rate is not exceeded. Allow a minimum of 30 days between application and harvest or grazing of forage, and a minimum of 7 days prior to harvesting of grain and stover.

**Post-Harvest**

**USE INSTRUCTIONS:** This product may be applied for weed control after crop harvest. Higher rates may be required for control of large weeds that were growing in the field at the time of harvest. Tank mixtures with 2,4-D or dicamba may be used.

**RESTRICTIONS:** The maximum combined total amount of this product that may be applied per year, including for weed control and tassel control, is 5.3 quarts per acre. A post-harvest application of this product may be made only if this maximum rate is not exceeded. Allow a minimum of 7 days between treatment and harvesting or feeding of treated vegetation. Allow a minimum of 30 days between application and the planting of any crop not listed on the Roundup WeatherMAX herbicide product label.

Read the “Limit of Warranty and Liability” in the label booklet for Roundup WeatherMAX herbicide before using. These terms apply to this supplemental labeling and if these terms are not acceptable, return the product unopened at once.
