OUTDOOR TREATMENTS
DO NOT apply this product, by any application method, to bricks, basalt or other tiles or spacers in the State of Oregon.

TREATMENT OF THE STRUCTURE FROM THE OUTSIDE: Treat where listed pests may be harboring, traveling, breeding or entering the structure. For example, weep holes, under eaves, wall voids, spaces, attics, around water tanks, cracks and crevices, openings around windows, doors and pipes, and window sills. Treatment of interior flues and tree holes is permitted. Direct treatment of termite trails is also permitted.

ARGENTINE ANTS: To treat weevils, inject the nest at 3 to 6 sites at a rate of 1 to 2 ounces. For very large nests (over 12" diameter), increase the number of injection sites. Space injection sites in a circular pattern on the nest surface with 1 inch in the center. To active ants on nest surface, sweep surface with spray from a distance of 12", treat new nests as they appear.

To kill foraging carpenter ants living inside trees: Determine the highest and lowest injection of the colony. Drill holes in the colony of highest elevation and inject 1 to 2 ounces. Do the same for lowest elevation. Drill immediately into trees every 4 to 8 inches above the lower and lower elevations if required. Foraging carpenter ants are directed to contact and treatment time of application to be effective. Contact as many ants as possible. Non-residual treatment. Reapply as necessary.

To kill foraging carpenter ants in stumps, utility poles and perches: Treat open holes or drilled holes in a circular pattern where carpenter ants are suspected. Inject 2 to 3 oz of product/hole. Foraging carpenter ants are directed to contact and application time of application to be effective. Contact as many ants as possible. Non-residual treatment. Reapply as necessary.

DO NOT apply this product to food or feed by storage or disposal.

STORAGE AND DISPOSAL
DO NOT contaminate water, food or feed by storage or disposal.

PESTICIDE STORAGE: Store in a cool place, away from heat or open flame and inaccessible to children.

PESTICIDE DISPOSAL: Waste resulting from the use of this product may be disposed of on site, in accordance with the label directions, or at an approved waste disposal facility.

CONTAINER DISPOSAL: DO NOT puncture or incinerate. Empties or pallets or drums are treated in response to a public health emergency determined by appropriate state or federal authorities. Containers and their degrade. MNEs have the properties and characteristics associated with chemical detection and monitoring. The high water solubility of isopropyl, and isocyanate, isocyanate, and toluene, coupled with their very high volatility, and resistance to degradation indicates that this compound has a strong potential to reach the environment, under certain conditions, as a result of label use. Use of this chemical in areas where soils are permeable, particularly under the water table, shall remain in groundwater contamination.

PHYSICAL OR CHEMICAL HAZARDS:
Flammable. Contents under pressure. Keep away from heat, sparks, and open flame. Do NOT puncture or incinerate container. Exposure to temperatures above 125°F may cause burning. DO NOT apply to electronic equipment such as radios, televisions, computers, etc.

DIRECTIONS FOR USE
IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

DO NOT apply to moist soil, water or standing water. DO NOT apply directly to any electronic equipment such as radios, televisions, computers, etc.

USE RESTRICTIONS
• Do not treat in hospital patient rooms or nursing home patient rooms while occupied by the patient.
• Do NOT apply to classrooms when in use.
• Do NOT apply to locations including daycare centers, libraries, sport facilities, etc. In the immediate area, when not occupied, are permitted.

DO NOT apply in aircraft cabins.

HOW TO USE BASF CRACK & CREEVE® INJECTION SYSTEM
CRACK & CREEVE® TREATMENT: Use with the supplied auger and injection tubes or other BASF equipment. Place injection tube into cracks, crevices, holes and small openings where pests may be harboring, traveling, breeding or entering the structure. Carefully place the crack or crevice treatment to the walls under masonry covers is also permitted. Reapply as necessary.

DO NOT apply to moist soil, water or standing water. DO NOT apply directly to any electronic equipment such as radios, televisions, computers, etc.

FOOD/FEED HANDLING ESTABLISHMENTS
Food/Food-handling establishments are places other than private residences in which food is killed, prepared or served, including those operating under the federal, state and local jurisdiction for health and sanitation.

APPLICATIONS OF THIS PRODUCT IN FOOD/FEED AREAS OF FOOD/FEED HANDLING ESTABLISHMENTS IN THE FORM OF A CRACK & CREEVE® FOOD, SPOT OR GENERAL TREATMENT. General surface application may be used only when the facility is not in operation, provided exposure to food/food-handling establishment is not possible through spray, or if the food is being stored in cold storage or similar conditions. Reapply as necessary.

DO NOT apply to moist soil, water or standing water. DO NOT apply directly to any electronic equipment such as radios, televisions, computers, etc.

DO NOT apply to moist soil, water or standing water. DO NOT apply directly to any electronic equipment such as radios, televisions, computers, etc.
