NET CONTENTS: 1 GALLON 2 FL. OZ. (130 FL. OZ.)

PF 168116
PHYSICAL OR CHEMICAL HAZARDS
Do not apply this product in or on any external equipment due to the possibility of shock hazard.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ ENTIRE LABEL USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.

SHAKE WELL BEFORE EACH USE FOR INDOOR USE ONLY
Crossfire® Bed Bug Concentrate is the next generation insecticide which effectively kills Bed Bugs in both residential and commercial buildings and structures. Crossfire Bed Bug Concentrate’s patented technology provides residual control for up to four weeks after application and is scientifically formulated to target resistant as well as susceptible Bed Bug strains. Crossfire Bed Concentrate also kills Bed Bug Nymphs and Eggs by contact. This product must be diluted with water and applied according to the mixing instructions below.

APPLICATION
Apply Crossfire Bed Bug Concentrate as an indoor crack and crevice, or direct spray application in non-food areas including but not limited to: hotels, shelters, modes of transportation, restaurants, schools, nursing homes, warehouses, offices, apartment, hotels, motels, and hospitals. Crossfire Bed Bug Concentrate is an easy to use water-dilutable concentrate for application with handheld or backpack sprayers, or with a paintbrush. This product will not stain water-safe fabrics or surfaces, however care should be taken to test an inconspicuous area for staining prior to use.

FULL INSTRUCTIONS
For best results, vacuuming surfaces is recommended prior to treatment. Spray bed bugs and eggs directly wherever present. Apply as a pintmation, coarse spray or low pressure spray for cracks and crevice, carpet perimeter, and direct spray applications in and around non-food areas where bed bugs and their eggs may hide or lurk. For example, on and around baseboards, floorboards, millwork, bed frames, headboards, wall hangings, furniture, door and window frames, walls, closets, window treatments, beneath floor coverings, as well as other non- waterable items that may come in contact with bed bugs such as luggage, shoes and backpacks. If treating a pet’s living environment, spray on and around pet beds, bedding, floors, sleeping areas and furnishings. This product can also be applied with a paintbrush to walls, baseboards, door and window frames, walls, and behind wall hangings and other similar areas.

MATTRESS APPLICATION: Crossfire® Bed Bug Concentrate can be directly applied to mattresses and box spring surfaces. For porous surfaces such as mattresses and carpet perimeter areas, apply until thoroughly damp, but not wet. Infested bed linens should not be treated. These should be removed, tightly sealed in a plastic bag, laundered and dried at high temperatures prior to reuse. Vaccumating surfaces prior to treatment is highly recommended. Using a vacuum, coarse or low pressure equipment, spray directly to mattress surface paying special attention to seams, tills, tufts and edges as well as bed frames and box springs where bed bugs harbor. Re-make bed with clean linens prior to reuse.

USE RESTRICTIONS
• This product is NOT FOR USE ON HUMANS OR ANIMALS
• Do not apply product directly on pets
• Do not broadcast use
• Do not use on any commercial food/feed processing, preparation, food/feed storage or serving areas
• In the home, all food/feed processing surfaces and utensils should be covered during treatment, or thoroughly washed before use. Cover or remove exposed foodstuff
• Remove pets, birds and cover fish aquariums before spraying
• This product will not stain water-safe fabrics and surfaces, however care should be taken to test an inconspicuous area for staining prior to use.
• Do NOT allow adults, children or pets to enter treated area until sprays are dry.
• Do NOT apply to plants or crops.
• Do NOT treat areas where occupants are present.
• Do NOT apply as a space spray.

• DO NOT wet articles to the point of runoff or drip
• DO NOT treat articles until spray has dried

MIXING INSTRUCTIONS
Crossfire Bed Bug Concentrate is packaged in a 130 oz. container to produce exactly 10 finished gallons (10 doses/ treatments). Pour 13 fl. oz. of the 130 oz. container into 115 oz. of water to produce exactly 1 finished gallon to treat 1,000 sq. ft.

</tbody>
</table>

To prepare the diluted spray, fill the sprayer tank with half the total water to be used, add the Crossfire Bed Bug Concentrate then add the remaining water to the spray tank to achieve the final application volume. Close the spray tank and shake thoroughly to ensure proper suspension. For optimal results, solution should be used within 24 hours of being prepared. Spray tank solution should be shaken prior to each use or if application is interrupted. Diluted mixture may be stored overnight.

NOTICE: This product may be tank mixed with other insecticides. Application must conform to the use directions and precautions of both products. Prior to tank mixing, a small jar compatibility test should be conducted using the proper proportions of each product and water to ensure the physical compatibility of the mixture. Tank mix applications must be made in accordance with the more restrictive of label limitations and precautions. No tank application rates may be exceeded. This product cannot be mixed with any product with label prohibitions against such mixing.

FEDERAL REGULATIONS
This product may not be used in a manner inconsistent with its labeling.

USER SAFETY REQUIREMENTS
Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washable mite, use detergent and hot water. Keep and wash PPE separately from other laundry.

Discolor clothing and other absorbent materials that have been drenched or heavily contaminated with the product’s concentrate. Don’t reuse them.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.

If on skin or clothing:
• Take off contaminated clothing.
• Wash skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

FIRST AID
If in Eyes:
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes.
• Call a poison control center or doctor for treatment advice.

If on Skin:
• Wash thoroughly with soap and water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage:
Store product in its original container. Store in a cool, dry place and avoid excess heat. Keep container tightly closed when not in use. Keep product from freezing. Diluted mixture may be stored overnight.

Pesticide Disposal And Container Handling:
Non-refillable container. Do not reuse or refill this container. Clean container promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank, or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times, then offer for recycling, if available, or puncture and dispose of in a sanitary landfill or by other approved State or local procedures.
