Return to Blue Shock I

All-in-one chlorinates, shocks and kills algae
Crystal clear results in 24 hours
Treats up to 20,000 gallons

ACTIVE INGREDIENT: Calcium Hypochlorite...56.44% 
OTHER INGREDIENTS:...43.56%
TOTAL:...100.00%

KEEP OUT OF REACH OF CHILDREN

DANGER: Highly corrosive. Causes skin and eye damage. May be fatal if swallowed.

Read all Precautionary and First Aid statements on back panel before use.

NET CONTENTS: 2.3 LBS

DIRECTIONS FOR USE:

1. In a variation of the standard shock, use this product in a one-part system by adding directly to your pool.

READ ALL PRECAUTIONARY STATEMENTS BEFORE USE

This product is a concentrated chlorination agent. It is to be used in the evening hours, at full barrel capacity, without the filter pump. When added to the pool, it can cause a violent reaction, leading to intense fire, explosion, or the release of toxic gases. Do not allow this product to contact any foreign matter, including other water treatment products. If product is exposed to small amounts of water, it can react violently and cause an explosion or the release of toxic gases. Do not use this method when the /filter pump is on and properly recirculating through the pool system. Use this method to disperse to assist in helping it to dissolve.

METHOD FOR DISPERGING DIRECTLY INTO POOL: Add the recommended dosage of this product during evening hours while the other pump is running. When adding this product to the pool, broadcast the amount evenly in the deepest part of the pool. If any is left on the skimmer of the filtering system, never be vacuumed or incinerated. If any remains in the system, do not attempt to remove it. Do not use this product to treat any condition other than algae bloom, which has turned your pool green, the /filter pump is off, and the pool is not circulat- ing properly. A violent reaction can occur if this product is added to a pool already containing chlorination agent.

METHOD FOR EMERGENCY ADDITION: Use this method to avoid bleeding or any paint. Mix sodium hypochlorite and water in a 1:1 ratio, then add to a solution of bleach and water. Add the solution to the pool while the other pump is running. When adding this product to the pool, broadcast the amount evenly in the deepest part of the pool. If any remains in the system, do not attempt to remove it. Do not use this product to treat any condition other than algae bloom, which has turned your pool green, the /filter pump is off, and the pool is not circulating properly. A violent reaction can occur if this product is added to a pool already containing chlorination agent.

If you are experiencing a severe algae bloom, which has turned your pool green, the /filter pump is off, and the pool is not circulating properly. A violent reaction can occur if this product is added to a pool already containing chlorination agent.
