This product can be used both indoors (attics and other places where nests are built and where food or feed are not exposed) and outdoors on Wasps, Hornets, and Yellow Jacket nests.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

- **Bait**
  - Do not contaminate food and foodstuffs.  
  - Do not use in commercial food/feed processing, preparation, storage, or as feeding areas.  
  - All food/feed processing surfaces and items must be covered during treatment or thoroughly washed before use.  
  - Cover or remove exposed food/feed.  
  - Do not apply when food is present.  
  - Insecticide bait must be covered or removed.  
  - Remove exposed food/feed.  
  - Remove all exposed food/feed from the treatment area to the point of entry.  
  - Do not apply during rain.  
  - All outdoor applications must be limited to spot or crack-and-crevice and wasp and hornet nest treatments only.  
  - Do not treat areas where humans or pets are likely to enter.  
  - Do not apply in a manner that will contact adult children or pets, either directly or through drift.

For Control of Nests of Wasps, Yellow Jackets, and Hornets:

The best time to spray the nest is at the early morning or evening when the air temperature is cool. Most insects are in the nest, and this activity is observed around the nest opening. Spray only if the air is still. Stand at a safe distance from the nest. Do not spray at a height equal to or greater than a man and point the nozzle at the nest. First spray the opening of the nest. Then spray the side of the nest or up to 150 feet away. Do not spray the nest once the insecticide has been applied. Do not spray in the area until granary is dried. Do not apply this product in a manner that will contact adult children, pets, or cats directly or through drift.

For Scorpions: stand 3-4 feet away and thoroughly cover the insect. Make sure scorpions are dead before removing. This product may stain or slightly affect paint, paper, painted, and plastic surfaces. Avoid application to asphalt roofing shingles as staining may occur. Flush with water if contact occurs. Test in an inconspicuous area and re-check in a few hours before using in areas where spray may contact those surfaces.

**PRECAUTIONARY STATEMENTS**

Hazards to Humans and Domestic Animals

**CAUTION**

Harmful if absorbed through the skin. Causes moderate eye irritation. Avoid contact with skin, eyes, clothing, or clothed pets. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to aquatic organisms, including fish and aquatic invertebrates. Do not apply directly to water, or to areas where surface water is present or to tidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wash water or rinsates. Chute and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. This pesticide is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds where bees are actively visiting the treated area.

**FIRST AID**

- **If on skin or clothing**:  
  - Take off contaminated clothing.  
  - Rinse skin immediately with plenty of water for 15-20 minutes.  
  - Call a poison control center or doctor for treatment advice.

- **If in eyes**:  
  - Hold eye open and rinse slowly and gently with water for 15-20 minutes.  
  - Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.  
  - Call a poison control center or doctor for treatment advice.

- **If swallowed**:  
  - Immediately call a poison control center or doctor for treatment advice.  
  - Do not induce vomiting unless told to do so by the poison control center or doctor.  
  - Do not give any liquid to the person.  
  - Do not give anything by mouth to an unconscious person.

**NOTE TO PHYSICIAN**

Contains Petroleum Distillate - Vomiting may cause aspiration pneumonia.

For information regarding medical emergencies or pesticide incidents, call the National Pesticide Information Center (NPIC) 1-800-858-7378. Here the product manufacturer or label with when calling a poison control center or doctor for getting treatment.

**STORAGE AND DISPOSAL**

- **Physical or Chemical Hazards**:  
  - Flammable. Contents under pressure. Keep away from heat, sparks or open flame. Do not puncture or incinerate container. Exposure to temperatures above 100°F may cause bursting.

- **Pesticide Storage Site**:  
  - In a cool dry area away from heat or open fires. Pesticide Storage and Container Handling: Non-volatile container. Do not reuse or refill this container. If empty: Place in trash or offer for recycling if available. A final entry: Never pour unused product down the drain. Close your local solid waste agency rules for disposal instructions.
