FIRST AID

- If in eyes: Hold eyelids open and rinse slowly and gently with water for 15 to 20 min.
- If on skin: Wash thoroughly with soap and water.
- If swallowed: Immediately call a poison control center or doctor for treatment advice.
- Do NOT induce vomiting unless told to do so by a poison control center or doctor.
- Do NOT give any liquid to the person.
- Do NOT give anything by mouth to an unconscious person.

HOTLINE TIMES

Have the product container label with you when calling a poison control center or doctor, or going for treatment. For information on this pesticide product (including health concerns, medical emergencies or pesticide incidents), you may call 1-800-432-Help (4325) 24 hours, 7 days/week.

NOTE TO PHYSICIAN: Certain petroleum distillates—vaporing may cause aspiration pneumonia.

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing.

Personal Protective Equipment (PPE): Applicators and other handlers must wear the following: Long sleeve shirt, long pants, socks and shoes.

User Safety Requirements: Follow manufacturer's instructions for cleaning/remaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

PRECAUTIONARY STATEMENTS

ENVIRONMENTAL HAZARDS

This product is toxic to aquatic organisms, including fish and invertebrates. DO NOT apply directly to or near water. Drift and runoff may be hazardous to fish in water adjacent to treated areas. See “Directions for Use” for additional precautions and requirements. This product is highly toxic to bees exposed to direct treatment on blooming crops or weeds. Do NOT apply this product or allow it to drift to blooming crops or weeds while bees are actively visiting the treated area.

PHYSICAL OR CHEMICAL HAZARDS

Flammable. Contents under pressure. Keep away from heat, sparks, and open flame. Do NOT puncture or incinerate container. Exposure to temperatures above 130°F may cause bursting. Do NOT apply directly into any electronic equipment such as radios, televisions, computers, telephones, etc. where the powder residue may build up or short electric contacts and circuits.

DIRECTIONS FOR USE

IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING.

SHAKE WELL BEFORE USING

Product dispenses best when held in upright position.

USE RESTRICTIONS

- Apply tree product only as specified on this label.
- Do NOT apply this product to apples. This product is not recommended for apple trees.
- Only protected growers may be in treatment area during application.
- Do NOT apply this product in a way that will contact workers or other persons, either directly or through drift.
- When used on a dried tree, do not enter or allow others to enter until spray is dry.
- Do NOT spray on plastic, painted or varnished surfaces.

APPLICATION INSTRUCTIONS

CRACK & CREvice Or VOID APPLICATION: Use the supplied applicator and injection hose. Inject into cracks and crevices or void spaces where insects may be harboring, living and breeding. Place inject; tip into cracks, crevices, holes and other small openings and release approx. 1 sec of product. Move inject tip along cracks while treating at the rate of 2 ml/min. For closed voids, calculate the void's cubic area and treat at the rate of 3 to 5 sec/m2. For closed voids with slight access holes, several holes may be required for long-running voids. This product can leave a white residue that can normally be removed with a damp cloth or sponge.

DIRECT SPRAY: Apply the product in short bursts into the area where insects are to be contacted such as corners of the room, behind and under furniture or equipment. Applicator is a distance of 18 to 24" from the surface and allow the material to drift to the area to be treated. The amount of product applied is not to exceed 10 sec/room for residential areas or 10 sec/100 ft2 for commercial areas.

SPOT TREATMENT: Apply in short bursts, approx. 1 sec of product at a time. Limit individual spot treatments to an area no larger than 20% of the surface area. Any individual spot treatment shall not exceed 2 sec of product. Contact as many insects as possible, before making any application, ensure product will not stain surface or leave an unacceptable residue.

INDOOR USE

COCKROACHES, CRICKETS, DERMITIDIES, EARWIGS, MILLIPEDES, SCORPIONS, SOWBUGS AND SPIDERS: Apply as a Crack & Crevice or Void Treatment into areas where insects harbor, such as openings around pipes and sinks, under refrigerators, behind baseboards, wearing machines, stoves, safes, oven, floor drains and meter bases. For treatment of these pests in inaccessible voids (wall voids, equipment voids, attics, crawl spaces and mantles where human contact with treated surfaces will be minimal), calculate the horizontal surface area of the void and treat at the rate of 1 sec/m2.

BOOKCASES, BUREAUS, FIREPLACES: Apply to cracks and crevices in bookcases, door frames, bookshelves and other storage areas. Also apply in wall and other voids where insects may harbor.

For treatment of pests in inaccessible voids (wall voids, equipment voids, attics, crawl spaces, and mantles where human contact with treated surfaces will be minimal), calculate the horizontal surface area of the void and treat at the rate of 1 sec/m2.

ANTE (Except Fire, Harvester and Phantom): Inject product into cracks, crevices and voids where ants may be traveling and/or harboring (including around doors, window frames, wall voids and other structural crevices, crevices and void areas).

FLIAS, LICE AND TICKS: Treat pet bedding, floor and floor coverings, and all areas voids may inhabit at the rate of 1 sec/100 ft2. Apply to cracks and crevices behind moldings, shingles, baseboards, pipe openings and all other cracks. Notice: This product has been tested on several types of carpet, fabric and other household furnishings without adverse affects. Because of the wide variety of fabric types and thickness, treat a small inconspicuous area before treating the entire area. Avoid contact with antique finishes.

BED BUGS: Apply to cracks, crevices, voids and/or harborage, where evidence of bed bugs occurs, including bed frames, box springs, inside mattress covers, furniture and clothing, beds, and bedding, fashions and mattresses, and other items, where bats may be harboring and/or harboring (including around doors, window frames, wall voids and other structural crevices, crevices and void areas).

STORED PRODUCT PESTS: For indoor and feral stages of Cadellia, Cheese, Milk, Chocolate Moths, Cigarette Beetles, Confused Flour Beetles, Dark Mealworms, Dragontoe Beetles, Flat Grain Beetles, Grain Grubs, Grain Weevils, Granary Weevil, Indianmeal Moth, Mealworms, Red Flour Beetles, Rice Weevil, Sawtoothed Grain Beetle, Trogoderma and Yellow Mealworm: Inject into cracks, crevices, corners and/or voids such as in partitions, cabinets, food processing and handling equipment, machinery, walls, voids and other places where these insects harbor. Apply around cartons, containers and other areas where these insects tend to congregate.
PT® Tri-Die®
Pressurized Dust Insecticide

KILLS: Ants (including Fire, Harvester and Pheasant), Bed Bugs, Beetles, Booklice, Broadleaf Bugs, Caterpillars, Cheese Mites, Chocolate Moths, Cigarette Beetles, Clover Mites, Cluster Flies, Cockroaches, Confused Flour Beetles, Crickets, Dark Mealworms, Dermoide, Drugstore Beetles, Earwigs, Elm Leaf Beetles, Flinsects, Flat Grain Beetles, Flies, Gnat Mites, Grain Weevils, Gray Flour Weevil, Ground Beetles, Indianmeal Moths, Lice, Moths, Mites, Millipedes, Pillbugs, Powdery Moths, Rice Weevils, Sawtoothed Grain Beetles, Scorpions, Sphinges, Termites, Ticks, Toadstools and Yellow Mealworms

FOR USE IN AND AROUND: Apartments, Food Handling Establishments (including Food Processing Plants, Food Storage Areas, Meat Packing Plants, Restaurants), Homes, Hospitals, Hotels, Motels, Nursing Homes, Schools, Supermarkets, Transportation Equipment (Buses, Boats, Ships, Trains), Warehouses and Other Commercial and Industrial Buildings
