DIRECTIONS FOR USE:

1. Remove collar around dog’s/puppy’s neck. Collar should fit snug enough to prevent placement of the dog’s/puppy’s leg or lower jaw through the collar, yet loose enough to be rotated about the neck. 2. Leave 1-2 extra inches on the length of the collar for adjustment, cut off excess, and dispose of trash. 3. Check periodically and adjust if necessary, especially when puppies are rapidly growing. 4. Replace in 5 months or sooner if needed. Collar does not need replacement if dog/puppy becomes temporarily wet.

To minimize flea irritation use appropriate Bio Spot Active Care™ products to: 1. Treat the indoor environment, especially when pets spend time resting.
2. Treat the outdoor environment when necessary.
3. Dead ticks will fall off or may be easily removed.
4. Soap and rinse with large amounts of water.

WARNING:

- Do not use on dogs/puppies simultaneously or within 30 days before or after treatment with or exposure to cholinesterase inhibiting** drugs or pesticides (e.g., tetrachlorvinphos). However, flea and tick collars may be used on dogs/puppies under 12 weeks of age if there is no indication of white blood cells in the first week of treatment.
- Fleas and ticks may also become resistant to pesticides. Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant, or nursing dogs. Do not use on puppies under 12 weeks of age. Do not use this product on dogs/puppies on the same day or within 30 days before or after treatment with or exposure to cholinesterase inhibition drugs or pesticides (e.g., tetrachlorvinphos). However, flea and tick collars may be used on dogs/puppies under 12 weeks of age if there is no indication of white blood cells in the first week of treatment.

ANIMALS:

Consult a veterinarian before using this product on debilitated, aged, medicated, pregnant, or nursing dogs. Do not use on puppies under 12 weeks of age. Do not use this product on dogs/puppies on the same day or within 30 days before or after treatment with or exposure to cholinesterase inhibiting** drugs or pesticides (e.g., tetrachlorvinphos). However, flea and tick collars may be used on dogs/puppies under 12 weeks of age if there is no indication of white blood cells in the first week of treatment.

HUMANS:

Do not open package until ready to use. Do not allow children to play with this collar. Pesticidal dust will form on this collar during storage. Wash hands thoroughly with soap and water after handling collar.

NOTICE: This product contains propoxur, a chemical known to the State of California to cause cancer. Contains an N-methyl carbamate that inhibits cholinesterase.

PRECAUTIONARY STATEMENTS – HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION:

Do not get dust on eyes, as this can cause temporary constriction of the pupils*. The dust released by this collar is a cholinesterase inhibitor. Avoid contact with skin, eyes, or clothing. This product contains propoxur, a chemical known to the State of California to cause cancer.

If swallowed or absorbed through skin, do not get dust on eyes, as this can cause temporary constriction of the pupils*. The dust released by this collar is a cholinesterase inhibitor. Avoid contact with skin, eyes, or clothing.
