Bio Spot Active Care™ Flea & Tick Spot On® for Cats

READ ENTIRE LABEL BEFORE USE

USE ONLY ON CATS OR KITTENS 12 WEEKS OF AGE AND OLDER AND OVER 2.5 LBS AND UNDER 5 LBS

The Smart Shield® Applicator is specially designed to make applying flea and tick control easier. More precision—and easier—than ever before. You simply insert the appropriate tube for your cat/kitten into the applicable slot and squeeze to apply. The applicator’s ergonomic, contoured shape makes it easy to grip and a built-in tip helps to spread your cat/kitten’s hair to allow the fluid to more readily reach your cat/kitten’s skin. The tube is sealed inside, so you can be confident the fluid goes onto your cat/kitten—and not your hand.

Bio Spot Active Care™ Flea & Tick Spot On® for Cats is a long-lasting flea and tick treatment specifically formulated for cats and kittens with an insect growth regulator (IGR) to prevent and control flea infestations. It contains the highly effective flea, deer tick, and mosquito killing agent, Etofenprox, which kills biting adult fleas, deer ticks, and mosquitoes and repels any new flea nymphs or larvae that may contact your cat/kitten. Bio Spot Active Care™ Flea & Tick Spot On® for Cats kills adult fleas and flea eggs, breaking the flea life cycle and providing your cat/kitten relief from flea bites and flea allergy dermatitis (FAD). Treatment of cats with Bio Spot Active Care™ Flea & Tick Spot On® for Cats rapidly kills fleas and may reduce the incidence of tick-bite.

Do not use on kittens weighing less than 2.5 pounds. Do not use on kittens less than 12 weeks old.

Repeated exposure to etofenprox can cause skin irritation. Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.

For Cats & Kittens (Over 2.5 lbs and Under 5 lbs only)

To apply Bio Spot Active Care™ Flea & Tick Spot On® for Cats treatment, use one disposable liquid tube for each application with the application device. Do not use more than one tube per cat.

1. OPEN: Use finger scoop to lift pink door.
2. LOAD: To load, please turn tube WHITE SIDE UP under the pink tube.
3. CLOSE: Close the pink door and the tube will snap open.
4. APPLY: The cat/kitten should be standing for easy application.
5. DISPOSE: To dispose of empty tube, open pink door and drop empty tube into trash or offer for recycling if available. Close applicator door automatically and open tube.

Do not spread Bio Spot Active Care™ Flea & Tick Spot On® for Cats by hand over the cat's fur. Do not bathe the cat/kitten within the first 24 hours after Spot On® has been applied. Households with more than one cat/kitten should prevent cross-contamination from grooming each other until solution has dried. Although the cat/kitten's skin and hair will still be wet, the cat is safe to be handled and be returned to the cage or room immediately after application.

To complete the entire program aimed at reducing all stages of fleas in the cat/kitten's environment.
