Using the In-line Mineral Spa System: With a freshly filled spa establish a bromine or chlorine residual of 1.0-2.0 ppm with FROG Jump Start, an EPA approved spa shock or by other means by following directions on the package. For the first 24 hours, set the SPA FROG Bromine Cartridge at #3 by holding the bottom and turning the top until the number 3 appears in the setting window. To install, open cap in In-Line System, push down and turn cartridge holder clockwise to unlock. Pull holder out. Snap cartridge into “Bromine Only” section. Make sure to line up indent on cartridge with raised line on holder. After cartridge is snapped in, replace holder by lining-up arrow on holder with arrow on system lip, push down and lock in place. Replace cap. When using as directed with the SPA FROG Mineral Cartridge, maintain at least a 1.0 ppm bromine level. Otherwise maintain a 2.0-4.0 ppm bromine level. Initially test water daily and adjust cartridge up or down depending on spa size and use until desired bromine level is achieved. For best results at measuring low bromine levels, use the FROG Test Strips. Adjusting to a higher setting will increase the bromine output while a lower setting will decrease it. When empty follow disposal instructions and replace with a new SPA FROG Bromine Cartridge. R Enter into treated spas is prohibited above levels of 5.0 ppm available bromine as measured by a suitable test kit due to the risk of bodily injury.

STORAGE AND DISPOSAL: Do not contaminate food or feed with this product. Storage: Store cartridge in original container in a cool, dry, well ventilated area. Flood area with large volumes of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion. In case of contamination or decomposition, do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use clean dry utensils. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire and explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, possible fire and explosion.

Environmental Hazards: This pesticide is toxic to fish and aquatic organisms.

Note: Buyer assumes all responsibility for safety and use not in accordance with directions.
