 движение

RATES OF APPLICATION

This product may be applied as a single application or as required applications to control weeds growing through the turf (up to 60 applications) each year prior to germination of the target weeds. This product will not control established weeds. Amax is an acre reduction should be based on turf type, the length of time weed control was expected to be needed, or the condition of the treated area. This product is equally effective on untreated areas. Amax is an acre reduction should be based on turf type, the length of time weed control was expected to be needed, or the condition of the treated area. This product is equally effective on untreated areas.

TRAINING AREA

This product is recommended for use at the following rates. Do not exceed the maximum quantity per application:

SUMMARY RATES

For a single application, use 33 lbs of this product per acre. For sequential applications, use 33 lbs of this product per acre for each application.

TOTAL NUMBER

Applying the product at the correct rate is essential for effective weed control. The product is designed to provide effective control of a wide range of turf grasses and weeds. However, the effectiveness of the product will be limited by the rate at which the weeds germinate and grow. Emphasis should be placed on the proper timing and rates of application.

PRECAUTIONS

STORAGE AND DISPOSAL

Disposal of containers: Do not leave empty containers on the ground. Store containers securely in a safe location, away from children and pets. Avoid contact with eyes, mouth, or skin. If contact occurs, wash thoroughly with soap and water. If swallowed, call 1-800-328-3267 for assistance. If ingested, seek medical attention. If eyes are injured, flush with water for 15 minutes and seek medical attention. If swallowed, seek medical attention immediately.

FREQUENTLY ASKED QUESTIONS
