STORAGE AND DISPOSAL
Do not contaminate water, food or feed with storage or disposal. Open burning and dumping is prohibited.

PESTICIDE STORAGE: Keep pesticide in original container. Do not put concentrate or dilutions of concentrate in food or drink containers.

ALWAYS STORE THIS PRODUCT ABOVE 40°F.
FREZING MAY CAUSE SEPARATION.

Bulk product must be stored & handled in: stainless steel, fiberglass, polypropylene, PVC or plastic equipment. Do not allow product to come in contact with any galvanized steel, brass, copper, nylon or aluminum storage or handling equipment.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinse water is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: [For containers ≤ 5 gal] Non-refillable Containers: Do not reuse or refill this container. Triple rinse all containers prior to disposal and then offer for recycling, if available, or puncture and dispose of in an approved manner, or dispose by incineration if allowed by local state authorities. If disposal is by incineration, stay out of smoke. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/2 full with water and recirculate for 10 seconds. Pour rinse from equipment into a mix tank or store rinse for later use or disposal. Drain for 10 seconds after flow begins to drip. Repeat this procedure two more times.

[For containers > 5 gal] Non-refillable container. Do not reuse or refill this container. Triple rinse all containers prior to disposal and then offer for recycling, if available, or puncture and dispose of in an approved manner, or dispose by incineration if allowed by local state authorities. Disposal by incineration, stay out of smoke. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/2 full with water and recirculate for 10 seconds. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand container on its end and tip back and forth several times. Empty rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat procedure two more times.

REFILLABLE CONTAINER: Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or a mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour the pump rinse into application equipment or rinse collection system. Repeat this rinsing procedure two more times.

BACTERICIDE*

Use in Sewage lagoons¹, feedlot run-off pits², animal confinement facilities, waste tanks, digesters, manure pits and similar applications.

*Non Public Health Bacteria

Δ Not for use in CA

Intended for commercial use only. Not intended for residential/homeowner use.

ACTIVE INGREDIENT

Ocicon Water Sciences Group Ltd.
350 3771 Jacombos Road
Richmond, B.C. V6W 2L9

EPA Reg. No. 88901-1
EPA Est. No. 88901-01-CAN

FOR ADDITIONAL PRODUCT INFO:

FIRST AID

If in eyes: Hold eye open and rinse slowly and gently with water for 30-20 minutes. Remove contact lenses, if present, after the first 5 minutes, and continue to rinse eye.

If inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth to mouth, if possible. Call a poison control centre or doctor for further treatment advice.

If on skin or clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

If swallowed: Call poison control centre or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything to an unconscious person.

Note to Physician: Probable mucosal damage may contraindicate the use of gastrics lavage.

Note: Have the product container or label with you when calling a poison control centre or doctor for treatment. Contact your poison control centre at 1-800-222-1222. For help with a spill, leak, fire or exposure involving this material call CMITREX 1-800-424-9300.

KEEP OUT OF REACH OF CHILDREN

SEE ATTACHED LABEL BOOKLET FOR USE DIRECTIONS

If usted no entienda la etiqueta, busque a alguien para que le expalice a usted el detalle. (If you do not understand the label, find someone to explain it to you in detail.)

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreversible eye damage. Harmful if swallowed. Harmful if absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin.

NET CONTENTS: 1.04 Gal, 2.64 Gal, 5.28 Gal, 30.38 Gal, 54.95 Gal, 264.17 Gal

PERSONAL PROTECTIVE EQUIPMENT

Mixers, loaders, applicators and other handlers must wear:

• Long-sleeved shirt
• Long pants
• Shoes plus socks
• Chemical-resistant gloves and
• Protective eyewear such as goggles, face shield or safety glasses.

Some materials that are chemical-resistant to this product are: barrier lemmate, butyl rubber, nitrile rubber, neoprene rubber, polysulphide chloride, or viton. If you want more options, follow the instructions for category A on an EPA chemical resistance category selection chart.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry. Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product’s concentrate. Do not reuse them.

USER SAFETY RECOMMENDATIONS

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Users should remove clothing / PPE immediately if pesticide gets inside. Then wash thoroughly and put on cleaning cloth. Users should remove clothing/PPE immediately after handling the product. As soon as possible, wash thoroughly and change into clean clothing. Wash the outside of gloves before removing.

ENVIRONMENTAL HAZARDS

AQUATIC USES

This pesticide is toxic to fish and aquatic invertebrates. Waters treated with this product may be hazardous to aquatic organisms. Treatment of aquatic weeds and algae can result in oxygen loss from decomposition of dead algae and weeds. This oxygen loss can cause fish and invertebrates suffocation. To minimize this hazard, do not treat more than 1% of the water body to avoid depletion of oxygen due to decaying vegetation. Wait at least 10-14 days between treatments. Begin treatment along the shore and proceed outwards in bands to allow fish to move into untreated areas. Consult with the State or local agency with primary responsibility for regulating pesticides before applying to public waters, to determine if a permit is required. Certain fish species are sensitive to these water conditions including low pH (5.5), low dissolved organic carbon (DOC levels 5.0 mg/L or lower), and "soft" waters (i.e., alkalinity less than 50 mg/L), increases the potential acute toxicity to non-target aquatic organisms.

TERRESTRIAL USES

For terrestrial uses, this pesticide is toxic to aquatic invertebrates and may contaminate water through runoff. This product has the potential for runoff for several months after application. Poorly draining soils with shallow water tables are more prone to produce runoff that contains this product. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. For terrestrial uses, do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment wastewater or rinsate.

APPLICATION AND HANDLING EQUIPMENT

FABRICS CONTAINING COTTON OR NYLON WILL DISOLVE ON CONTACT WITH UNDILUTED OCION BD41. Do not allow clothing to come in contact with pesticide or dilute product. Application, handling and storage equipment MUST be fibreglass, PVC, polypropylene, viton, most plastics, aluminium or stainless steel. NEVER use nylon, copper or brass or mild steel parts / components in contact with product. Wash spray equipment thoroughly with fresh clean water after each use.

ENVIRONMENTAL HAZARDS

AQUATIC USES

This pesticide is toxic to fish and aquatic invertebrates. Waters treated with this product may be hazardous to aquatic organisms. Treatment of aquatic weeds and algae can result in oxygen loss from decomposition of dead algae and weeds. This oxygen loss can cause fish and invertebrate suffocation. To minimize this hazard, do not treat more than ⅓ of the water body to avoid depletion of oxygen due to decaying vegetation. Wait at least 10-14 days between treatments. Begin treatment along the shore and proceed outwards in bands to allow fish to move into untreated areas. Consult with the State or local agency with primary responsibility for regulating pesticides before applying to public waters, to determine if a permit is required. Certain water conditions including low pH (≤6.5), low dissolved organic carbon (DOC) levels (≤3.0 mg/L or lower), and “soft” waters (i.e., alkalinity less than 50 mg/L), increases the potential acute toxicity to non-target aquatic organisms.
TERRESTRIAL USES
For terrestrial uses, this pesticide is toxic to aquatic invertebrates and may contaminate water through runoff. This product has the potential for runoff for several months or more after application. Poorly draining soils and soils with shallow water tables are more prone to produce runoff that contains this product. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. For terrestrial uses, do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment washwater or rinsate.

APPLICATION AND HANDLING EQUIPMENT
FABRICS CONTAINING COTTON OR NYLON WILL DISSOLVE ON CONTACT WITH UNDILUTED OCION BD41. Do not allow clothing to come in contact with concentrated or dilute product. Application, handling and storage equipment MUST be fibreglass, PVC, polypropylene, viton, most plastics, aluminum or stainless steel. NEVER use nylon, copper or brass or mild steel parts / components in contact with product. Wash spray equipment thoroughly with fresh clean water after each use.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labelling.

Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

AGRICULTURAL USE REQUIREMENTS
Use this product only in accordance with its labelling and with the Worker Protection Standard, 40 CFR part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 48 hours. Notify workers of the application by warning them orally OR by posting warning signs at entrances to treated areas.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is: Coveralls, chemical-resistant gloves made of any waterproof material (See Personal Protective Equipment section of this label), shoes plus socks, and protective eyewear such as goggles, face shield or safety glasses.
GREENHOUSE USE
The Restricted Entry Interval (REI) for greenhouses is 24 hrs providing the following conditions are met:

For at least seven days following the application of copper sulfate pentahydrate in greenhouses:

1. At least one container or station designed specifically for flushing eyes is available in operating condition with the WPS-required decontamination supplies for workers entering the treated area, and
2. Workers must be informed orally, in a manner they can understand:
   o That residues in the treated area may be highly irritating to their eyes
   o That they should take precautions, such as refraining from rubbing their eyes
   o That they should keep the residues out of their eyes
   o That if they do get residues in their eyes, they should immediately flush their eyes with the eye flush container or eye flush station that is located with the decontamination supplies
   o How to operate the eye flush container or eye wash station.

NON-AGRICULTURAL USE REQUIREMENTS
The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses. Do not enter or allow others to enter until sprays have dried.
Application rates of OCION BD41 may vary depending on the amount of organic matter, characteristics of manure or sewage, extent of bacterial activity, and the degree of odor reduction desired.

Calculate the total gallons of waste to be treated. Apply by pouring OCION BD41 directly from the container into the pit or lagoon. Several evenly-spaced application points will speed up dispersal. Bacterial odors will be noticeably reduced in 1-2 weeks. Additional applications may be required when odor reoccurs or when new waste is added to the lagoon.

**SEWAGE LAGOONS** and **PITS**: Use a maximum of one gallon of OCION BD41 per 60,000 gallons of sewage. Bacterial odors should be noticeably reduced in 1 or 2 weeks. Repeat application when odors reoccur.

**ANIMAL CONFINEMENT FACILITIES**: Use a maximum of one gallon of OCION BD41 per 60,000 gallons of liquid waste. If pits are located under confinement buildings, add OCION BD41 directly to pits. If pits are outside, insert or inject OCION BD41 into the transfer line to pit.

**OTHER ORGANIC SLUDGE**: Apply at the rate of one gallon OCION BD41 to 60,000 gallons of sludge. OCION BD41 must be thoroughly mixed with the sludge.
# STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open burning and dumping is prohibited.

**PESTICIDE STORAGE:** Keep pesticide in original container. Do not put concentrate or dilutions of concentrate in food or drink containers. **ALWAYS STORE OCION BD41 ABOVE 40°F. FREEZING MAY CAUSE SEPARATION.** Bulk OCION BD41 must be stored & handled in: stainless steel, fibreglass, stainless steel, polypropylene, PVC or plastic equipment. Do not allow product to come in contact with any galvanized steel, brass, copper, nylon or aluminum storage or handling equipment.

**PESTICIDE DISPOSAL:** Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spray mixture, or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

**CONTAINER HANDLING: (For containers < 5 gal)** Non-refillable Containers: Do not reuse or refill this container. Triple rinse all containers prior to disposal and then offer for recycling, if available, or puncture and dispose of in an approved manner, or dispose by incineration if allowed by local and state authorities. If disposal is by incineration, stay out of smoke. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ⅔ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after flow begins to drip. Repeat this procedure two more times.

**CONTAINER HANDLING: (For containers > 5 gal)** Non-refillable container. Do not reuse or refill this container. Triple rinse all containers prior to disposal and then offer for recycling, if available, or puncture and dispose of in an approved manner, or dispose by incineration if allowed by local and state authorities. If disposal is by incineration, stay out of smoke. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ⅔ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand container on its end and tip back and forth several times. Turn the container over onto its other end and tip back and forth several times. Empty rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat procedure two more times.

**REFILLABLE CONTAINER:** Refill this container with pesticide only. Do not reuse this container for any other purpose. Cleaning the container before final disposal is the responsibility of the person disposing of the container. Cleaning before refilling is the responsibility of the refiller. To clean the container before final disposal, empty the remaining contents from this container into application equipment or mix tank. Fill the container about 10 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour the pump rinsate into application equipment or rinsate collection system. Repeat this rinsing procedure two more times.
LIMITED WARRANTY AND LIMITATION OF REMEDIES

To the extent consistent with applicable law, Ocion Water Sciences Group Ltd. warrants that this product conforms to the chemical description on the label and is reasonably fit for the purpose stated on such label when used in accordance with label directions under normal conditions for use. It is impossible to eliminate all risks inherently associated with use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or the manner of use or application, all of which are beyond the control of the seller. To the extent consistent with applicable law, the seller makes no other warranties of fitness or merchantability, expressed or implied, or any other warranty if the product is used contrary to the label instructions, or under abnormal conditions or under conditions not foreseeable to the seller. Seller makes no warranty for the performance of product that has been frozen.

To the extent consistent with applicable law, the exclusive remedy of any buyer or user of this product for any and all losses, injuries, or damages resulting from or in any way arising from the use, handling or application of this product, whether in contract, warranty, tort, negligence, strict liability or otherwise, shall not exceed the purchase price paid for this product. To the extent consistent with applicable law, in no event will the seller be liable for any consequential, special or indirect damages connected with the use or handling of this product. To the extent consistent with applicable law, this product is offered and the buyer or user accepts it subject to the foregoing terms which may not be varied.
