**SARCOPTIC MITES**

Applied once a month, PetAction™Plus for Dogs aids in the control of sarcoptic mange mite infestations.

**TICKS**

PetAction™Plus for Dogs kills larva, nymph and adult ticks that may transmit Lyme disease, Rocky Mountain Spotted Fever, ehrlichiosis, babesiosis, and anaplasmosis for at least 3 months. PetAction™Plus for Dogs remains effective even after bathing, water immersion, or exposure to sunlight.

**CHEWING LICE**

PetAction™Plus for Dogs kills chewing lice for at least one month. For best control of chewing lice, apply once every month.

**FLEAS**

When used monthly, PetAction™Plus for Dogs breaks the flea life cycle and controls fleas, flea eggs, and flea larvae for up to three months. Although PetAction™Plus for Dogs can control fleas for up to three months, if there is a high risk of re-infestation or if the dog has fleas which may cause flea allergy dermatitis, apply this product once a month.

**SIDE EFFECTS –**

**DO NOT USE**

- On cats, rabbits or other animals.
- If the dog is being treated for any other condition with a different product.
- On any animal with a known sensitivity to any active or inactive ingredient of PetAction™Plus for Dogs.
- On any animal whose skin has a rash, irritation, or irritation.

**HOW TO APPLY**

**TO APPLY PETACTION™ PLUS FOR DOGS:**

1. Place applicator tip against dog's skin at the base of the neck and squeeze the applicator to administer the entire contents in a single spot on the dog's skin. Avoid superficial application to the dog's hair.

2. Apply in a single spot at the base of the neck and do not rub or massage into the skin.

3. Repeat application monthly for the duration of treatment.
