For preemergence broadleaf weed control while establishing cool-season forage grasses or grasses grown for seed production

This supplemental label expires August 31, 2017, and must not be used or distributed after this date.

Active Ingredient:
saflufenacil: N’-[2-chloro-4-fluoro-5-(3-methyl-2,6-dioxo-4-(trifluoromethyl)-3,6-dihydro-1(2H)-pyrimidiny1)benzoyl]-N-isopropyl-N-methylsulfamide........................................................................................ 29.74%
Other Ingredients: ........................................................................................................................................... 70.26%
Total: ............................................................................................................................................................... 100.00%
Contains 2.85 pounds active ingredient saflufenacil per gallon formulated as a water-based suspension concentrate

EPA Reg. No. 7969-278

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.

- The supplemental labeling and the entire Sharpen® herbicide container label, EPA Reg. No. 7969-278, must be in possession of the user at the time of application.

- Read the label affixed to the container for Sharpen before applying.

- Use of Sharpen according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Sharpen.

Use Information

Sharpen may be applied for preemergence broadleaf weed control (refer to Table 1 and Table 2 on the product container label for list of weeds controlled) in fields when establishing stands of cool-season grasses grown for forage purposes (in pastures or rangeland for livestock grazing); or for forage (green chop), silage, or hay production; or grown for seed production.

Before applying Sharpen preemergence to cool-season grasses, verify the selectivity of Sharpen on your species and/or variety with your local seed company (supplier) to help avoid potential injury to sensitive varieties.

Application Information

Sharpen may be applied preplant, preplant incorporated, or preemergence in the fall or spring while establishing stands of cool-season grasses.

Sharpen may cause transitory injury to cool-season grasses under certain conditions. Disease, extremely cold weather, drought, extensive frost heaving, low or high pH, salinity, and other environmental pressures may weaken grass stands and make the crop more susceptible to herbicidal injury.

Burndown and Residual Weed Control

Apply Sharpen at 1.0 to 2.0 fl ozs/A as a broadcast spray to the soil surface before grasses emerge. If burndown of emerged broadleaf weeds is desired, an adjuvant system (refer to Additives section on the product container label for details) is required for optimum broadleaf burndown activity.
Sequential Applications

**Sharpen® herbicide** may be applied as a sequential or split program where the initial application is made preplant or preemergence while establishing the stand, and the subsequent application(s) are made postemergence in-season after establishment. However, **DO NOT** apply more than a maximum cumulative amount of 6.0 fl ozs/A of **Sharpen** per cropping season.

Tank Mixtures

Broad-spectrum control of grasses and/or additional broadleaf weeds will require a tank mix with another herbicide. Read and follow the applicable restrictions and limitations and directions for use on the other product label. The most restrictive labeling applies to tank mixes. **Sharpen** may be tank mixed or applied sequentially with other herbicide products.

Crop-specific Restrictions and Limitations

- **DO NOT** apply more than a maximum cumulative amount of 6.0 fl ozs/A of **Sharpen** per cropping season.
- **DO NOT** apply **Sharpen** when establishing solid stands of warm-season grasses or mixed stands of cool-season and warm-season grasses.
- **DO NOT** apply **Sharpen** when establishing mixed stands of cool-season grasses and forage legumes or other desirable broadleaf species. **Sharpen** application will kill or cause severe injury to emerging alfalfa, clovers, other legumes, and most broadleaf species.
- There is no preharvest or pre-grazing interval for **Sharpen**-treated grass harvested as forage or hay.
- Refer to **Table 4** on the product container label for crop rotation intervals.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION (“BASF”) or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
