Supplemental Label

For harvest aid/desiccation in barley, wheat, and triticale

This supplemental label expires August 31, 2017, and must not be used or distributed after this date.

Active Ingredient:

saflufenacil: N’-[2-chloro-4-fluoro-5-(3-methyl-2,6-dioxo-4-(trifluoromethyl)-3,6-dihydro-1(2H)-pyrimidinyl)benzoyl]-N-isopropyl-N-methylsulfamide ............................................................... 29.74%

Other Ingredients: ........................................................................................................................................................................................................ 70.26%

Total: ........................................................................................................................................................................................................ 100.00%

Contains 2.85 pounds active ingredient saflufenacil per gallon formulated as a water-based suspension concentrate

EPA Reg. No. 7969-278

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Sharpen® herbicide container label, EPA Reg. No. 7969-278, must be in possession of the user at the time of application.
- Read the label affixed to the container for Sharpen before applying.
- Use of Sharpen according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Sharpen.

Use Information

Sharpen may be used for harvest aid/desiccation in barley (including malting, spring, and winter), wheat (including durum, spring, and winter), and triticale to desiccate the crop and weeds and to facilitate crop harvest.

Application Information

Application Rates and Timings

Uniformly apply Sharpen at 1.0 to 2.0 fl ozs/A as a broadcast spray over the top of barley, wheat, and triticale that have reached physiological maturity (hard-dough stage; grain contains less than 30% moisture) or according to Extension Service recommendations in the use area. Allow up to 7 days for optimum desiccation effect depending on environmental conditions.

Thorough spray coverage and methylated seed oil (MSO) plus ammonium-based adjuvant system (refer to Additives section on the product container label for details) are required for optimum desiccation activity and weed control.

Make ground application at a minimum spray volume of 10 gallons per acre, and make aerial application at a minimum spray volume of 5 gallons per acre.

A single application or sequential applications may be made, but DO NOT apply more than a maximum cumulative amount of 2.0 fl ozs/A of Sharpen per cropping season from desiccation uses.

Crop-specific Restrictions and Limitations

- DO NOT apply Sharpen on barley (all types), wheat (all types), or triticale grown for seed production.
- Barley, wheat, and triticale grain can be harvested 3 or more days after application.
- Desiccation-treated barley, wheat, and triticale straw may be grazed or fed to livestock.
- Refer to Table 4 on the product container label for crop rotation intervals.
Tank Mixtures

Apply Sharpen® herbicide with a labeled rate of glyphosate (e.g. Roundup® herbicide) for additional preharvest weed desiccation.

Ensure the glyphosate tank mix partner is labeled for harvest aid/desiccation in barley, wheat, and triticale. Read and follow applicable restrictions, limitations, and directions for use on the glyphosate product label.

The most restrictive labeling applies to tank mixes.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION (“BASF”) or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
