Supplemental Label

Tank mix with Group 14/Group E herbicides in chickpea and field pea in Idaho, Montana, North Dakota, Oregon, South Dakota, and Washington

This supplemental label expires July 15, 2017, and must not be used or distributed after this date.

Active Ingredient:
saflufenacil: N-[2-chloro-4-fluoro-5-(3-methyl-2,6-dioxo-4-(trifluoromethyl)-3,6-dihydro-1(2H)-pyrimidinyl)benzoyl]-N-isopropyl-N-methylsulfinamide ................................................................. 29.74%
Other Ingredients: ........................................................................................................ 70.26%
Total: ......................................................................................................................... 100.00%
Contains 2.85 pounds active ingredient saflufenacil per gallon formulated as a water-based suspension concentrate

EPA Reg. No. 7969-278

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Sharpen® herbicide container label, EPA Reg. No. 7969-278, must be in possession of the user at the time of application.
- Read the label affixed to the container for Sharpen before applying.
- Use of Sharpen according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Sharpen.

Application Rates and Timings

Chickpea. Sharpen may be tank mixed or sequentially applied with other Group 14/Group E herbicides (such as sulfentrazone) as an early preplant through preemergence treatment at 1.0 fl oz/A (for burndown) or at 2.0 fl oz/A (for enhanced burndown) broadleaf weed control before crop emergence. Ensure that the seed row is closed. Soil conditions that cause poor seed furrow closure and coverage may result in delayed crop emergence or stunting. A sequential application of Sharpen may be made with a minimum of 30 days between applications.

Field Pea. Sharpen may be tank mixed or sequentially applied with other Group 14/Group E herbicides (such as sulfentrazone) as an early preplant through preemergence treatment at 1.0 fl oz/A for burndown broadleaf weed control before crop emergence. Sequential applications of Sharpen may be made with a minimum of 30 days between applications.

Use Information

For Use Only in Idaho, Montana, North Dakota, Oregon, South Dakota, and Washington

Sharpen may be applied preplant surface, preplant incorporated, or preemergence to chickpea (garbanzo bean) and field pea for broadleaf weed control (refer to Table 1 and Table 2 on the Sharpen container label for lists of weeds controlled). Before applying Sharpen to chickpea and field pea, verify the selectivity of Sharpen on your variety with your seed company (supplier) to help avoid potential injury to sensitive varieties.

BASF Corporation
26 Davis Drive, Research Triangle Park, NC 27709
Crop-specific Restrictions and Limitations

- **DO NOT** apply more than a maximum cumulative amount of 4.0 fl ozs/A of Sharpene® herbicide per cropping season.
- **DO NOT** apply Sharpene if cold and/or wet conditions are present or predicted to occur within 1 week of application.
- Plant legumes at least 1/2-inch deep to reduce risk of crop injury from Sharpene application.
- **DO NOT** apply when legumes have reached the cracking stage or after emergence or severe crop injury will occur.
- Ensure that the seed row is sufficiently covered with soil to avoid washing and concentration of the herbicide in the seed zone.
- Legume forage may be fed or grazed 65 or more days after application.
- Refer to product container label for rotational crop planting intervals.

---

Tank Mixtures

Broad-spectrum burndown control of grasses and/or additional broadleaf weeds will usually require a tank mix with another herbicide. Sharpene may be tank mixed with one or more, but not limited to, the following herbicide products:

- **Prowl® H₂O herbicide**
- Glyphosate (e.g. Roundup® herbicide)
### Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION ("BASF") or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.**

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER'S EXCLUSIVE REMEDY AND BASF'S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.**

**TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.**

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
