Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Zidua® herbicide container label, EPA Reg. No. 7969-338, must be in possession of the user at the time of application.
- Read the label affixed to the container for Zidua before applying.
- Use of Zidua according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Zidua.

Product Information

Zidua is a selective rate-dependent residual preemergence herbicide for controlling annual grass weeds, sedges, and annual broadleaf weeds. Refer to the Zidua container label for complete use directions and for a complete list of weeds controlled.

Application Information

Zidua may be used as a residual treatment to control weeds listed in the Zidua container label at any time of the year during the fallow period following crop harvest and before the following crop is planted.

Application Rates and Timings

Apply Zidua as a broadcast spray at 1.0 to 4.0 ozs/A. Best product performance is obtained when weeds are not emerged before application.

Sequential applications may be made with a minimum of 30 days between applications, but DO NOT exceed the maximum seasonal cumulative amount of 5.0 ozs/A of Zidua per cropping season.

Specific rotational crop planting intervals must be observed between an application of Zidua and planting of the following crops (see Zidua container label for rotational crop planting intervals).
