Supplemental Labeling
Not yet approved in California or New York

EPA Reg. No. 10163-6414

This label expires July 8, 2017 and must not be used or distributed after that date.

AGRICULTURAL USE REQUIREMENTS REVISION FOR POTATOES

ACTIVE INGREDIENTS: % By Wt.
MANCOZEB: A coordination product of zinc ion and manganese ethylene bisdithiocarbamate.................................................................66.7%
In which the ingredients are:
   Manganese++ .................................................................13.3%
   Zinc++ .............................................................................1.7%
   Ethylene bisdithiocarbamate ion (C4H6N2S4) .......................51.7%
ZOXAMIDE: 3, 5-Dichloro-N-(3-chloro-1-ethyl-1-methyl-2-oxopropyl) 4-methylbenzamide........................................................................8.3%
OTHER INGREDIENTS: ..............................................................25.0%
TOTAL ...........................................................................100.0%

KEEP OUT OF REACH OF CHILDREN
CAUTION

Read the entire label before using this product.

- This labeling must be in the possession of the user at the time of pesticide application.
- It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
- All applicable directions, restrictions and precautions on the EPA registered label are to be followed.
- Read the label affixed to the container for Gavel 75DF Fungicide before applying.
- Use of Gavel 75DF Fungicide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Gavel 75DF Fungicide.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 48 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water, is:
- Coveralls over long-sleeved shirt and long pants
- Chemical-resistant gloves made of any waterproof material
- Socks and chemical-resistant footwear

Potatoes: Notify workers that the area has been treated with a pesticide that is a dermal sensitizer by warning them orally. “If an allergic skin reaction (rash, redness, swelling, itchiness) or asthma symptoms or rhinitis occurs following the use of this product report the incident to Gowan Company, 1-888-478-0798.”

<tbody>
<tr>
<td>Potatoes</td>
<td>Late blight</td>
<td>1.5 to 2.0</td>
<td>Begin applications at the first sign of disease or when late blight is reported in the area. Use a 5 to 7 day schedule when late blight is present and environmental conditions favor continued disease development. Under low disease conditions and environmental conditions unfavorable for disease development, a 7 to 10 day application schedule may be used. Increase the use rate according to vine development. Use the maximum labeled rate at row fill.</td>
