Venue® Herbicide
EPA Reg. No. 71711-25

For Spot Treatment to Listed Broadleaf Weeds or for Sucker Management

This supplemental label expires October 10, 2017 and must not be used or distributed after this date.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. This labeling and the EPA approved container label must be in the possession of the user at the time of application.

Read the label affixed to the container for Venue herbicide before applying. Use of Venue herbicide according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Venue herbicide.

New use directions appear on this supplemental label that may be different from those that appear on the container label.

SPOT TREATMENT
For spot treatment to listed broadleaf weeds or for sucker management, refer to the information below to determine the amount of Venue herbicide to add to a tank. Spray using a pressure (pump-up) sprayer (or similar application equipment) until wet but prior to runoff. Use information for rates, concentrations, water volumes, and timing and frequency of application can be found in the Rate/Acre and Directions for Use columns in the APPLICATION AND DOSAGE tables on the label affixed to the container. Please refer to and follow all precautions and restrictions under Directions for Use for the crop to be treated.

</table>
Formula

\[
\text{Fluid oz Venue to add to sprayer tank} = \frac{\text{Application rate} \times \text{Sprayer tank capacity}}{\text{Spray volume}}
\]

**Example Calculation for 1 gallon sprayer tank capacity**

\[
\text{Fluid oz Venue to add to sprayer tank} = \frac{4 \text{ fl oz} / A \times 1 \text{ gallon}}{40 \text{ gallons/A}}
\]

\[= 0.1 \text{ fl oz} \]

where:
- Application rate = 4 fl oz/A
- Sprayer tank capacity = 1 gallon
- Spray volume = 40 gallons/A

**Example Calculation for 5 gallon sprayer tank capacity**

\[
\text{Fluid oz Venue to add to sprayer tank} = \frac{4 \text{ fl oz} / A \times 5 \text{ gallons}}{40 \text{ gallons/A}}
\]

\[= 0.5 \text{ fl oz} \]

where:
- Application rate = 4 fl oz/A
- Sprayer tank capacity = 5 gallons
- Spray volume = 40 gallons/A
