64 Millennium Q is a phosphate free formulation designed to provide effective cleaning, disinfection, and sanitization. It is effective against a broad spectrum of pathogenic bacteria, viruses, and fungi. It is an effective disinfectant for non-porous surfaces against a broad spectrum of bacteria and viruses. It is effective against Hepatitis A, B, C, D and HIV-1, and against rabies virus. It is also effective against a range of fungi and other pathogens. It is a sodium hypochlorite product, which means it has a strong disinfectant effect. It is also effective against a range of viruses, including those that cause enteric diseases.

**DISINFECTANT, CLEANER, ONE-STEP DISINFECTANT CLEANER, BACTERICIDE, VIRUCIDE, MILDEWSTAT (on hard non-porous, inanimate surfaces), DEODORIZER, Effective in the absence of 5% severe contamination.**

The product is effective against a range of viruses, including those that cause enteric diseases. It is effective against a range of fungi and other pathogens. It is a sodium hypochlorite product, which means it has a strong disinfectant effect. It is also effective against a range of viruses, including those that cause enteric diseases.

**ACTIVE INGREDIENTS:**
- Sodium hypochlorite (2.25% active)

**OTHER INGREDIENTS:**
- Water
- Turbidity reducing agent
- Color stabilizers

**DIRECTIONS FOR USE:**
- For a solution of 64Q, use the product in a container immersed in water. To disinfect:
- For treatment advice.
- To control mold and mildew on pre-cleaned, hard, non-porous surfaces, add 2 ounces of 64 Millennium Q to 4 gallons of water (2 ounces per gallon of water) (703 ppm active quaternary) (or equivalent dilution) for a solution of 64Q. Allow surface to remain wet for 10 minutes. After use, dispose of the solution in accordance with local regulations.
- To control mold and mildew on large, inflatable, non-porous plastic and rubber objects, add 2 ounces of 64 Millennium Q to 4 gallons of water (2 ounces per gallon of water) (703 ppm active quaternary) (or equivalent dilution) for a solution of 64Q. Allow surface to remain wet for 10 minutes. After use, dispose of the solution in accordance with local regulations.
- To control mold and mildew on pre-cleaned, hard, non-porous surfaces, add 2 ounces of 64 Millennium Q to 4 gallons of water (2 ounces per gallon of water) (703 ppm active quaternary) (or equivalent dilution) for a solution of 64Q.
