LUNA® TRANQUILITY
EPA Reg. No. 264-1085
For Use On: Wine Grapes

This supplemental label expires January 01, 2016 and must not be used or distributed after this date.

Supplemental Label

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation. Read this label and the product package label before using this product. This Supplemental Label must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the product label for Luna Tranquility attached to the container.

USE DIRECTIONS FOR SPECIFIC CROPS

APPLICATION INFORMATION
Use sufficient water volume to provide thorough and uniform coverage to obtain the most effective disease control. Do not make applications when conditions favor drift. Avoid spraying when windy, high temperature, drought, dusty, low relative humidity, or temperature inversion conditions exist.

Ground Application
For ground application equipment, a minimum of 50 gallons of water per acre for tree crops and wine grapes and 10 gallons of water per acre for field and vegetable crops is required.

WINE GRAPE:
For use on wine grape varieties only such as but not limited to these varieties: Chardonnay, Cabernet sauvignon, Syrah, Merlot, Pinot Noir, and Zinfandel.
Do not treat grapes such as Thompson Seedless and Concord, which may be used for purposes other than for wine.

<tr>
<th>Disease Control</th>
<th>Application Rate</th>
<th>Product Instructions</th>
</tr>
</thead>
<tbody>
<tr>
<td>Powdery mildew (Uncinula necator)</td>
<td>16 to 24 fl oz/acre</td>
<td>Begin fungicide applications preventatively. Continue as needed on a 14- to 21-day interval. When disease pressure is severe, use the higher rates and/or shorter intervals. Refer to University and/or extension guidelines for best application timings</td>
</tr>
<tr>
<td>Botrytis bunch rot / Gray mold (Botrytis cinerea)</td>
<td>16 to 24 fl oz/acre</td>
<td>Applications should be made at the critical timings for Botrytis control. Typically, first applications are made at early bloom, berry touch to bunch closure, veraison, and pre-harvest. Use sufficient water to ensure penetration of the canopy and coverage of the flowers or bunches. When disease pressure is severe, use the higher rates and/or shorter intervals, but not less than 12 days apart. Refer to University and/or extension guidelines for best application timings</td>
</tr>
</tbody>
</table>

**Restrictions:** Do not apply more than 54.7 fl oz of LUNA TRANQUILITY per acre per season. Do not apply LUNA TRANQUILITY within 7 days of harvest. Do not apply with aerial application equipment To limit the potential for development of disease resistance to these fungicide classes, do not make more than 2 sequential applications of LUNA TRANQUILITY or any Group 7 or Group 9 containing fungicide before rotating with a fungicide from a different Group.

This supplemental label expires January 1, 2016 and must not be used or distributed after this date.
