DIRECTIONS FOR USE: Shake well before each application. Mix 30 ml concentrate with 1 gallon water and shake well.

Spray Guardian solution on growing medium first, then apply an even coating on all leaves. Starting from bottom, spray the trunk and all undersides of branches and leaves. Spray tops of leaves until runoff occurs.

Start applications before infestations occur as a preventative on a 30-day regimen. May be used up until 14 days prior to harvest with NO adverse effects.

It is always recommended to wear protective gear such as rubber gloves and eye protection, and avoid directly inhaling any spray product. Use only as directed on label.

Kills any infestation after 1 application with the exception of broad mites and russet mites. First application must be double strength followed by repeat application 3 days later at regular strength.

May be used on ornamentals, food and feed crops.

Exempt from registration with the U.S. EPA under FIFRA Section 25(b).

GUARDIAN

Guardian is one of the most effective spider mite products in today's horticulture market. It kills mites on contact and smothers all eggs with an all natural cutting edge suffocant. This product will eliminate even the worst mite problems with one application. Allow 24hrs for noticeable results.
