Directions for Use

How to Open
1. Remove product tubes from the package.
2. Separate one tube from the others. Hold the tube with notched end pointing up and away from the face and body. Use scissors to cut off the narrow end at the notches along the line.

How to Apply
1. Invert tube over cat and use open end to part cat's hair.
2. Apply contents of one tube of FLEE Plus IGR for Cats as a spot between the shoulder blades. Squeeze tube firmly to apply all of the solution to the cat's skin.

6 Step Checklist
1. Read the label completely and follow directions
2. Weigh your cat
3. Do NOT use dog products on cats
4. Do NOT treat with more than one pesticide product at a time
5. Separate animals after treatment to avoid chance of ingestion
6. Do NOT split tubes between pets

FLEET Plus IGR (for Cats) contains Fipronil and (S)-methylpyrroldione. "Methylpyrroldione is a growth regulator that effectively breaks the life cycle of fleas (all stages) and ticks (including those that may transmit Lyme disease). The active ingredients in FLEET Plus IGR for Cats feature a sustainable release formula developed for fast-acting and long-lasting control of fleas and ticks, and giving lice for one month on cats only.
