FIRST AID

IF SWALLOWED
Call poison control center or doctor immediately for treatment advice. Have person sip a

IF IN EYES
Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact

IF ON SKIN
Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20

IF INHALED
Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give

HOTLINE
Have the product container or label with you when calling a poison control center or
doe so by poison control center or doctor. Do not give anything by mouth to an unconscious person.

NET CONTENTS 1 qt (946 ml)

Call poison control center or doctor for treatment advice. Do not induce vomiting unless told to do so by poison

Contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a poison

Rinse skin immediately with plenty of water for 15-20 minutes. Call poison control center or doctor for treatment advice.

Artificial respiration, preferably mouth-to-mouth if possible. Call poison control center or doctor for further treatment advice.

Call 1-800-424-6800 for emergency medical treatment information.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION: Causes moderate eye irritation. Harmful if swallowed or absorbed through skin. Avoid contact with eyes, skin, or clothing. Avoid inhaling vapors. Wear safety glasses, goggles, or face shield, protective clothing, and rubber gloves when handling this product. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
This pesticid is toxic to fish and aquatic organisms.

PHYSICAL AND CHEMICAL HAZARDS
Do not mix with other chemicals.

STORAGE AND DISPOSAL
STORAGE: Keep this product in a tightly closed container, when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment.
PESTICIDE DISPOSAL: For product that cannot be used, call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
CONTAINER DISPOSAL: Non-refillable container. Do not reuse or refill this container. Place in trash or offer for recycling if available.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.
GENERAL INFORMATION - This product is used to control the growth of algae in swimming pools, exterior spas, whirlpools, hot tubs, decorative fountains and ponds that do not contain fish. This product may be used in systems sanitized with chlorinating or brominating products. For maximum effectiveness, pools, spas, whirlpools, hot tubs, decorative fountains, and ponds containing heavy growth of algae must be cleaned prior to using this product. This product is compatible with those chemicals normally used to treat pools and spas and is effective at both acid and alkaline pH. This product can be used in pools and spas treated with chlorine chemicals and may reduce the amount of these chemicals normally required. However, do not mix this product with concentrated dry or liquid chemical products.
TESTING - Test the pH, available chlorine (or bromine residual) and alkalinity of the water frequently with appropriate test kits. Frequency of water treatment will depend upon temperature and number of swimmers. Stabilized pools must maintain a residual of 1-4 ppm available chlorine (bromine residual: 1-3 ppm in residential pools and 3-5 ppm in commercial pools) and spas must maintain a residual of 1-5 ppm available chlorine (bromine residual: 2-4 ppm in residential spas and 4-6 ppm in commercial spas). Adjust and maintain water pH between 7.2-7.8 and alkalinity level between 80-150 ppm. When using other products as outlined in directions for this product, always follow directions on these products. Wait at least 15 minutes after application of this product before entering pool/spa.

SWIMMING POOLS
For pools having just visible algae growth, pour directly into pool an initial dose of 18 to 27 fl. oz. of this product per 10,000 gallons of water and remove settled algae debris by cleaning. For treatment of a freshly cleaned and filled pool, add initially 10 to 18 fl. oz. of this product per 10,000 gallons of water. Subsequent additions of 3.5 to 7 fl. oz. of this product per 10,000 gallons of water must be made every 5 to 7 days after initial treatment for maintenance.
Winterizing Pool - This product when used as directed will prevent growth of most algae during the off-season winter months when pools are not in use. For pools, which have been properly treated during the swimming season and are free of visible algae, add 10 to 18 fl. oz. of this product per 10,000 gallons of water. If at the end of the swimming pool season, pool has some visible algae growth, add 10 to 27 fl. oz. per 10,000 gallons. It is necessary that a uniform distribution of algicide throughout the water and the pool be made for maximum effectiveness. If pool is not covered, it may be necessary to repeat the treatment one or more times during the off-season.

SPAS, WHIRLPOOLS, HOT TUBS, FOUNTAINS, & PONDS
For Spas, whirlpools, hot tubs, decorative fountains and ponds having just visible algae growth, pour directly into the spa an initial dose of 2 to 3 fl. oz. of this product per 1,000 gallons of water. For treatment of a freshly cleaned spa, whirlpool, hot tub, decorative fountain or pond, add initially 1 to 2 fl. oz. of this product per 1,000 gallons of water. Subsequent additions of 0.4 to 1 fl. oz. of this product must be made every 5 to 7 days after initial treatment for maintenance.

ESTIMATING POOL/SPA SIZE: To estimate the number of gallons in your pool/spa, use the appropriate formula below (Use measurements in feet only):
Rectangular Pools/Spas: Length x Width x Average Depth x 5.9
Round: Diameter x Diameter x Average Depth x 5.9
Oval: Maximum Length x Maximum Width x Average Depth x 5.9
Free Form: Surface Area (sq feet) x Average Depth x 7.5
