Eliminates Paint Build Up and Heavy Sanding
Season Long Protection for Moderate to Heavy Fouling
Overcoats Existing Antifouling Paint

KEEP OUT OF REACH OF CHILDREN
WARNING
See Side Panel for Additional Precautionary Statements

ONE U.S. GALLON
(3.785 L)

4490U
RED

ACTIVE INGREDIENT
CUPRIC OXIDE 41.07%
INERT INGREDIENTS 58.93%
COPPER AS METALLIC 100.00%

Contains petroleum distillates
DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRODUCT DESCRIPTION: This product uses Abilise Copolymer Technology to enable it to wash away with use, constantly exposing fresh and effective biocide. This Abilise Copolymer Technology also eliminates the build-up of old spent coatings and the heavy sanding needed to remove them. This product provides season long protection against algae, barnacles and other forms of marine fouling in waters with moderate to heavy fouling. For use in fresh, salt and brackish waters.

COMPATIBILITY: This product can be applied over existing antifouling paint as long as the old coating is tightly adhered and in sound condition. When applying over conventional antifouling paints, thoroughly sand with 60 grit wet-or-dry sandpaper. Soft brush based coatings should be removed prior to application of this product.

V.O.C.: Less than 370 grams/liter

COATS REQUIRED: 2 coats. 3 coats on bare wood

THINNER: INTERLUX® BRUSH BASE 433

DRY TIMES: Touch dry: 2 hours

CLEAN UP: INTERLUX® BRUSH BASE 433

THEORETICAL COVERAGE: 450et./gal./1000cm²

APPLICATION TEMPERATURE: 50°F (10°C) and above

APPLICATION SYSTEMS

PREVIOUSLY PAINTED SURFACES - GOOD CONDITION: Remove all traces of loose paint and contamination by sanding the entire surface well with 80 grit sandpaper; wipe surface clean with Interlux Special Thinner 216. Stir thoroughly. Touch up bare areas. Apply two full coats of this product by brush of 3/8" nap roller. Do not apply thin coats. If during application, the brush or roller drags, thin with INTERLUX® BRUSH BASE 433 to improve handling. See compatibility section for additional information.

PREVIOUSLY PAINTED SURFACES - POOR CONDITION: Completely remove all old antifouling paint with INTERLUX® FIBERGLASS PINTOFF 299 for fiberglass and epoxy surfaces, INTERLUX® PINTOFF 159 for wood and by sandblasting underwater metals to near white metal. Proceed with application system for bare work as described below.

BARE FIBERGLASS - (POLYESTER OR VINYLESTER)

SURFACE PREPARATION: Wash entire surface thoroughly with INTERLUX® FIBERGLASS SOLVENT WASH 202 changing rags frequently. Before liquid dries, wipe with clean dry cloth. Be sure all water and other contamination is removed, failure to properly clean the surface will result in paint delamination. Sand any imperfections and repair with INTERLUX® SURFACING AND FAIRING COMPOUND 417A/8B; sand and wipe clean. Sanding does not remove surface contamination.

BARE FIBERGLASS - NO SAND SYSTEM: After the surface has been prepared as described above - apply one thin continuous coat of INTERLUX® AL200 FIBERGLASS PRIMER® with brush or roller. Follow label directions for overcoating. Apply two coats of this product.

BARE FIBERGLASS - SANDING SYSTEM: After the surface has been prepared as described above - sand entire surface well with 80 grit sandpaper until a flat, matte finish is obtained; wipe off sanding residue with INTERLUX® FIBERGLASS SOLVENT WASH 202P. Apply two coats of this product.

BARE WOOD: Remove any surface contamination by wiping with INTERLUX® SPECIAL THINNER 216. Sand entire surface with 80 grit sandpaper. Wipe off sanding residue with INTERLUX® SPECIAL THINNER 216. Repair any imperfections with INTERLUX® SURFACING AND FAIRING COMPOUND 417A/418B; sand and wipe clean. Apply first coat of this product reduced with INTERLUX® BRUSH BASE 433 (10% maximum). Apply two additional coats unthinned. Allow a minimum of 16 hours between coats. Fill seams (if necessary) with INTERLUX® SEAL COMPOUND 50 between first and second coats of antifouling paint.

UNDERWATER METALS: Contact the INTERLUX® Technical Service Department at 1-800-468-7589 for full details on how to properly primer underwater metals. Do not use on aluminum.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

WARNING

Causes eye irritation. Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wear protective clothing such as shoes, long-sleeved cotton shirt, long trousers and hat. May be fatal if swallowed or inhaled. Do not breathe vapor or spray mist. While spraying paint or sanding or sandblasting boat surfaces wear a mask or respirator jointly approved by the Mine Enforcement and Safety Administration and the National Institute for Occupational Safety and Health. Remove contaminated clothing and wash before reuse. Wash thoroughly with soap and water after handling.

FIRST AID

If swallowed:
- Immediately call a poison control center or doctor
- Do not induce vomiting unless told to do so by a poison control center or doctor
- Do not give any liquid to the person
- Do not give anything by mouth to an unconscious person
If on skin or clothing:
- Take off contaminated clothing
- Rinse skin immediately with plenty of water for 15-20 minutes
- Call a poison control center or doctor for treatment advice
If inhaled:
- Move person to fresh air
- If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible
- Call a poison control center or doctor for further treatment advice
If in eye:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes
- Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye
- Call a poison control center or doctor for treatment advice
Other: Have the product container and label with you when calling a poison control center or doctor or going for treatment.

Note to Physician: Contains potassium distearate – vomiting may cause aspiration pneumonitis.

ENVIRONMENTAL HAZARDS: This material is toxic to fish. Do not apply directly to water by cleanup of equipment or disposal of wastes. Do not allow chips and dust generated during paint removal to enter water. If paint is not disposed of properly, it may cause environmental damage. Do not discharge effluent containing this product into lakes, rivers, ponds, streams, or other bodies of water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent to sewer systems without previously notifying the local sewage treatment plant authority. For guidance, contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARD: Flammable. Keep away from heat, sparks or open flames.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticides, spray mixtures or residuals is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Resource Representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Never refill container. Do not reuse or refill this container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 7/10 full with water and recap. Shake for 10 seconds. Pour residue into application equipment or a mix tank or place for dewater for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times.

FOR CHEMICAL EMERGENCY, SPILL, LEAK, EXPOSURE OR ACCIDENT, CALL TOLL FREE: CHEMTEC 1-800-624-9300 (DAY OR NIGHT) MEDICAL ADVISORY: CONTACT YOUR LOCAL POISON CONTROL CENTER OR CALL 1-800-624-8888.

Label Procedure: 230701
