BASE PART A OF A TWO PART ANTIFOULING PAINT SYSTEM
NET CONTENTS:
0.875 GALLON (3.31 L)
MICRON OPTIMA
Base Part A of a Two Part Antifouling Paint System

PRODUCT DESCRIPTION
MICRON OPTIMA offers an entirely new approach to antifouling paint technology.
This special polyurethane paint was formulated with an advanced infrared-release blend of materials that absorb and reflect long wave infrared rays. The unique composition of MICRON OPTIMA allows it to reflect infrared rays and prevent the growth of marine organisms.

TYPICAL USE: This is a high-quality, low-fouling product suitable for all parts of the vessel. MICRON OPTIMA has been designed for use on hulls, decks, and superstructures of all types of vessels. It is particularly effective in tropical and subtropical waters, where fouling organisms are more prevalent.

APPLICATION: MICRON OPTIMA can be applied in multiple coats, depending on the vessel and the desired level of protection. It is recommended to apply at least three coats for optimal performance.

PRECAUTIONARY STATEMENTS
HAZARDS TO ANIMALS AND HUMANS

This paint contains chemicals that may be hazardous to humans and animals. It is recommended to follow the precautions below to ensure safety:

- Causes eye irritation. Harmful if swallowed through skin. Avoid contact with eyes, skin, or clothing.
- Wear protective clothing such as gloves, long-sleeved cotton shirts, long pants, and hat. May be fatal if swallowed. Use common sense when handling.
- Do not breathe vapor. Avoid long-term exposure to vapors. If you are exposed to the paint, wash thoroughly with soap and water after handling.

IF INHALED:
- Call a poison control center or doctor immediately for treatment advice.

IF IN EYES:
- Hold eye open and rinse slowly and gently with water for 15-20 minutes.

IF ON SKIN OR CLOTHING:
- Take off contaminated clothing.
- Wash skin immediately with plenty of water for 15-20 minutes.

IF ON FOOD OR IN THE ENVIRONMENT:
- Call a poison control center or doctor for further treatment advice.

OTHER:
- Have the container or label with you for reference.
- Call your State Water Board or Regional Office of the EPA if you suspect contamination.

STORED IN A COOL, DRY PLACE.
