Use the product in hospitals, medical and dental offices, nursing homes, day care centers, restaurants, hotels, cafeterias, institutional kitchens, fast food outlets, convenience stores, institutional facilities, public rest rooms, schools, colleges, universities, clinics, offices, funeral homes, storage rooms, dry cleaning establishments and all areas of medical and dental laboratories. Use on hard, non-porous surfaces. Thoroughly wet all surfaces completely. Let air dry. Repeat application weekly or when growth or fluids and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS).

CLEANING AND DISINFECTION:
The first 1:10 dilution is for cleaning. For cleaning and broad spectrum disinfection of hard, non-porous surfaces, use 1:10 dilution (1 oz. per gallon of water). For critical or semi-critical medical devices prior to sterilization or high level disinfection. For disinfection of impervious surfaces that are not critical or semi-critical medical devices, use a 1:10 dilution (1 oz. per gallon of water). For cleaning and decontamination of critical or semi-critical medical devices and environment, use a 1:5 dilution (2 oz. per gallon of water) according to the AOAC Use-Dilution Test method, modified in the presence of 400 ppm hard water plus 5% organic serum against: Pseudomonas aeruginosa, Salmonella enterica, E. coli, Staphylococcus aureus, Candida albicans, and Staphylococcus epidermidis.

NOTE TO FACILITY: Problems occurring in the environment may require a change in the preparation of the solution or a change in the disinfecting procedure. The use of excessive amounts of chemical disinfectant is not recommended. It is the responsibility of the facility to determine the correct concentration of the disinfectant based on the nature of the problem and the condition of the environment.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Store in accordance with state and federal regulations. Store in original container, tightly closed, in a cool, dry place. Keep container tightly closed when not in use. Store away from chemicals, food, and feed. Avoid contact with eyes, skin, and clothing. Use only in well-ventilated areas. Avoid breathing the mist. Use only with adequate ventilation. Do not store near other toxic substances.

PESTICIDE DISPOSAL: Do not mix or contaminate this product with other pesticides or chemicals.

OTHER INGREDIENTS:
BETCO Stale Bet II contains 20% active ingredients, and is approved as a hospital grade One-Step Acid Cleaner, Disinfectant, *Virucide, Mildewstat,

MEASUREMENTS:
0.75% Octyl decyl dimethyl ammonium chloride
0.30% Dioctyl dimethyl ammonium chloride
0.45% Didecyl dimethyl ammonium chloride
1.00% dimethyl benzyl ammonium chloride
Inert Ingredients ..................................................97.50%
Total: ..................................................................100.00%

DANGER: Do not mix or apply this product with other pesticides or chemicals. Do not mix with acid unless both products are specified as safe when mixed. Use Betco® Sure Bet™ II. Use at 30 minute contact time against Foot and Mouth Disease. Use at 10 minute contact time for disinfection against all other bacteria claimed. Use at 10 minute contact time for disinfection against all other bacteria claimed.

PRECAUTIONARY STATEMENTS
DANGER: Do not mix or apply this product with other pesticides or chemicals. Do not mix with acid unless both products are specified as safe when mixed. Use Betco® Sure Bet™ II. Use at 30 minute contact time against Foot and Mouth Disease. Use at 10 minute contact time for disinfection against all other bacteria claimed. Use at 10 minute contact time for disinfection against all other bacteria claimed.

PELIGRO: Do not mix or apply this product with other pesticides or chemicals. Do not mix with acid unless both products are specified as safe when mixed. Use Betco® Sure Bet™ II. Use at 30 minute contact time against Foot and Mouth Disease. Use at 10 minute contact time for disinfection against all other bacteria claimed. Use at 10 minute contact time for disinfection against all other bacteria claimed.

IF IN EYES: Rinses eyes for 15 minutes, then continue rinsing eye.

IF ON SKIN: Wash skin immediately with plenty of water for 15 - 20 minutes.

IF INHALED: Get person into fresh air. If not breathing, give artificial respiration. If breathing has stopped, give artificial respiration. Do not use mouth-to-mouth resuscitation. If eye irritation occurs: Have the product container or label with you when calling a Poison Control Center or doctor or going for treatment.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have personnel sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor or going for treatment.

IF CONTACTED WITH FOGGER: Avoid contact with eyes, skin, and clothing. Use only with adequate ventilation. Do not store near other toxic substances.

IF MIXED WITH ACID: Do not mix with acid unless both products are specified as safe when mixed. Use Betco® Sure Bet™ II. Use at 30 minute contact time against Foot and Mouth Disease. Use at 10 minute contact time for disinfection against all other bacteria claimed. Use at 10 minute contact time for disinfection against all other bacteria claimed.

IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have personnel sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor or going for treatment.

IF CONTACTED WITH FOGGER: Avoid contact with eyes, skin, and clothing. Use only with adequate ventilation. Do not store near other toxic substances.
