Use in Fruiting Vegetable Crops

Keep out of reach of children

CAUTION!

In case of an emergency involving this product, call collect, day or night, 314-694-4000.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in any manner inconsistent with its labeling.

This labeling must be in the possession of the user at the time of herbicide application.

AVOID CONTACT OF THIS HERBICIDE WITH FOLIAGE, GREEN STEMS, EXPOSED NON-WOODY ROOTS OR FRUIT OF CROPS (EXCEPT AS SPECIFIED FOR INDIVIDUAL ROUNDUP READY® CROPS); DESIRABLE PLANTS AND TREES, AS SEVERE INJURY OR DESTRUCTION COULD RESULT.

See the “PRODUCT INFORMATION” and “MIXING” sections of the Roundup WeatherMAX herbicide product label for important product use information.

LABELED CROPS: All cultivars, varieties and/or hybrids of Eggplant (including African, pea and scarlet); Cocona; Garden huckleberry; Goji berry; Groundcherry (Physalis spp); Martinynia; Naranjilla; Okra; Pepino; Pepper (includes bell pepper, chili pepper, cooking pepper, pimento, sweet pepper); Roselle; Sunberry; Tomatillo; Tomato

TYPES OF APPLICATION: Chemical Fallow; Preplant Fallow Beds; Preplant; At-Planting; Preemergence; Prior to Transplanting Vegetables; Hooded Sprayer in Row Middles; Shielded Sprayer in Row Middles; Wiper Applicator in Row Middles; Post-Harvest

USE INSTRUCTIONS: See the “ANNUAL AND PERENNIAL CROPS” section of the Roundup WeatherMAX herbicide product label for important product use information.

PRECAUTIONS: This product could cause crop injury when applied prior to transplanting or direct-seeding crops into plastic mulch. Remove residual product from the plastic prior to planting with a single 0.5-inch application of water, either by natural rainfall or irrigation. Ensure that the wash water flushes off the plastic mulch and does not enter the transplant holes. Application of this product at crop emergence will result in injury or death to emerged seedlings.
Avoid contact of this herbicide with foliage, green shoots or stems, bark, exposed roots (including those emerging from plastic mulch), or fruit of crops, as severe crop injury or destruction could result. Transplanted seedlings coming into contact with freshly treated vegetation could result in significant crop injury.

Preemergence application must be made before crop emergence to avoid severe crop injury. Apply before seed germination in coarse sandy soils to further minimize the risk of injury. In crops with vines, make hooded sprayer, shielded sprayer and wiper applicator treatments to row middles prior to vine development, otherwise severe crop injury or destruction could result.

RESTRICTIONS: Allow a minimum or 3 days between application and planting. For tomato and tomatillo, do not apply using a hooded or shielded sprayer in row middles because of the potential for crop injury. Application using selective equipment, including wiper applicators and hooded sprayers, must be made a minimum of 14 days prior to harvest. Post-harvest and fallow applications must be made a minimum of 30 days prior to the planting of any crop not listed on the Roundup WeatherMAX herbicide product label. See additional use instructions in the “APPLICATION EQUIPMENT AND TECHNIQUES” section of the Roundup WeatherMAX herbicide product label.
