Net Contents:

For Use in and Around:
Homes, apartments, offices, stores, schools, restaurants, hospitals, theaters, libraries, hotels, and other structures.

Controlling and Eliminating Ants:
If ants will come in large numbers, but soon disappear. This product is formulated to allow worker ants to consume the product and survive long enough to carry the liquid back to the nest and deliver a dose to the rest of the colony. Monitor the placements and ensure there is always a fresh supply of Maggie's Farm Ant Killer at each placement.

Apply Maggie's Farm Ant Killer to small pieces of cardboard, paper or foil, or in purpose built bait stations and place product in areas inaccessible to children and pets, where ants are seen, such as the edges of sinks, tubs, window sills, under food cabinets, along floors and base boards and in corners. Use plenty of bait placements, the more bait placements the better. Since invading ants usually have outdoor nesting sites, it often helps to put the product outside, close to where ants are found entering the structure. Ants typically follow defined trails from the nest to food or water. Placing Maggie's Farm Ant Killer close to these trails will improve control.

Outdoor Use
Locate areas around the building where ants are seen trailing. Apply Maggie's Farm Ant Killer in areas inaccessible to children and pets. The best results are obtained when the product is applied in the range of 5 to 10 feet will provide the best results. Check the bait stations regularly for activity. Remember ants will feed on Maggie's Farm Ant Killer and carry the bait back to the rest of the colony. Heavy infestations may require several bait placement refills.
