FORCE OF NATURE®
MITICIDE
controls various mites on many types of plants such as melons, squash, tomatoes, trees, grapes, cucumbers and all sorts of flowers. Force of Nature® Miticide is applied as a foliar spray and can be a great addition to a well-managed IPM program. Force of Nature® Miticide is non-toxic to humans and animals when used as directed.

ACTIVE INGREDIENTS:
Cottonseed Oil ................. 40%
Clove Oil ..................... 20%
Garlic Oil .................... 10%
*OTHER INGREDIENTS ........ 30%
TOTAL ......................... 100%
*Sodium Bicarbonate, Oleic Acid, Lauric Acid, Water

SHAKE WELL BEFORE USE
This product's ingredients are exempt from registration with the Federal EPA under section 25(b) of FIFRA. Force of Nature® Fungicide has not been registered with the Environmental Protection Agency. United Compost & Organics represents that this product qualifies for exemption from registration under the Federal Insecticide, Fungicide and Rodenticide Act.

FIRST AID
IF SWALLOWED:
– Call a Physician or Poison Control Center.
– Drink one or two glasses of water.
– Do not induce vomiting unless told to do so by a poison control center or doctor.
– Do not give anything by mouth to an unconscious person.

IF IN EYES:
– Hold eyelids open and flush with a steady, gentle stream of water for 15 minutes. Remove contact lenses after first 5 minutes, then continue rinsing eyes.
– Get medical attention if irritation persists.

IF ON SKIN:
– Remove contaminated clothing.
– Wash skin with plenty of soap and water.
– Get medical attention if irritation persists.

DIRECTIONS FOR USE:
Lift flap for instructions.

STORAGE & DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Store in a cool, dry place.

PRECAUTIONARY STATEMENTS: Avoid contact with skin, eyes or clothing. In case of contact, immediately flush eyes or skin with plenty of water. Get medical attention if irritation persists.

PERSONAL PROTECTIVE WORK CLOTHING:
Applicators and other handlers of this product must wear: Long sleeved shirt and pants, shoes and socks, protective eyewear and gloves.

Apply no more than once in a 7 day period. Repeat application as necessary. Coverage is essential to establish control. Apply enough to cover the entire surface of the infested tissue. The use of a surfactant may increase contact and efficacy of treatment.

— FRUITS & VEGETABLES —
Force of Nature® Miticide is a contact miticide/insecticide for use on all plants including:
Berries (Strawberries, Raspberries), Fruit Trees (Pome Fruit, Stone Fruit, Avocado, Citrus, Nuts), Grapes, Vegetables (Beans, Lettuce, Potatoes, Sweet Potatoes, Spinach, Cole Plants, Broccoli, Cabbage), Melons, Cucurbits, Peppermint and Herbs.
May cause phytotoxicity to peppers. See note under “Mixing Instructions.” May be applied to any plant after checking for compatibility.
CAUTION: CONTAINS OIL AND MAY LEAVE MARKS ON SOME FRUITS, ESPECIALLY PEARS. TEST THE PRODUCT IN SMALL AREA BEFORE SPRAYING LARGE AREAS.

— ORNAMENTAL & GREENHOUSE PLANTS —
Force of Nature® Miticide is a contact miticide/insecticide for use on all ornamentals including:
Bedding Plants, Flowers (greenhouse, field), Greenhouse Ornaments, Greenhouse Vegetables, Onions, Bare Root Stock, Container Stock, Fresh Cut Flowers and Ornaments.
USE EXTREME CAUTION WHEN APPLYING TO ROSES AND SENSITIVE FLOWERS AND FRUIT. Suitable for all plants. Always conduct a phytotoxicity test prior to any large scale application.
--- SHAKE WELL BEFORE USE ---

USE DILUTION IMMEDIATELY

DO NOT STORE DILUTED SOLUTION

Pre-harvest interval: Force of Nature® Miticide may be applied to all plant types listed in the APPLICATION RATE & USAGE section at any time, up to and including the day of harvest. There is no pre-harvest interval.

For early entry to treated areas that involves contact with anything that has been treated such as plants, soil, or water, wear: long-sleeved shirt and long pants, waterproof gloves, shoes plus socks, and protective eyewear.

MIXING INSTRUCTIONS: Force of Nature® Miticide may be applied using conventional ground application equipment. Aerial application equipment is not recommended. Use quantities of water sufficient to provide thorough coverage of infested plants. Add enough water to spray tank to allow maximum agitation. With agitator running, slowly add the appropriate amount of Force of Nature® Miticide. Continue agitation. Add remainder of water and agitate until thoroughly mixed. Maintain suspension while loading and spraying. Do not mix more Force of Nature® Miticide than can be used in a 12 hour period. Rinse and flush spray equipment thoroughly following each use. Do not contaminate water when disposing of equipment washwaters. In order to make proper decisions on application rates to be used, follow the recommendations in the APPLICATION RATE & USAGE section.

NOTE: All applications should be preceded by a phytotoxicity check to ensure that the material is safe for that particular plant variety. We recommend that prior to treatment of a large number of plants, new species, or varieties, treat a few plants with Force of Nature® Miticide and observe if there is any phytotoxicity. It is best to treat plants after they’ve adjusted to environmental changes, e.g. temperature, water, light intensity, new containers, new area, transplanting, wind, high humidity, etc. Do not use if sulfur is present on plant tissues.

TANK MIXING: Force of Nature® Miticide has not been tested for use in a tank mix with many commonly used insecticides, fungicides, or spray tank adjuvants. We recommend testing all tank mix combinations for physical compatibility and plant safety. Consult your dealer or manufacturer for specific recommendations. This product cannot be mixed with any product containing a label prohibition against such mixing. No label dosage rate should be exceeded. Application must be made in accordance with the more restrictive of label limitations and precautions. Read and follow label instructions.

LIMITATION OF LIABILITY AND REMEDIES: FOXFARM’s liability for any losses, damages, or injuries resulting from the use or handling of this product shall be limited to the replacement of the product or a refund of the purchase price, at FOXFARM’s option. This is an exclusive remedy. In no event shall FOXFARM be liable for any special, incidental, or consequential damages.

REPACKAGING PROHIBITION: This product shall not be repackaged for resale without the advanced written permission of FOXFARM.

APPLICATION INSTRUCTIONS

Force of Nature® Miticide is a pesticide for use against the mite and insect pests listed in the APPLICATION RATE & USAGE section (opposite label flap). The pest must come into contact with Force of Nature® Miticide in order to be affected. Always follow these directions:

- Testing to date indicates that Force of Nature® Miticide may cause injury to some plant species at sensitive stages of plant growth. Open blooms of certain plants can also be damaged. Do not apply to stressed or wilted plants, or to newly transplanted material prior to root establishment.
- Force of Nature® Miticide has not been tested on all plant varieties or in all tank mixes. Before applying to a large number of plants, test the product on a small number of plants for potential damage.
- We recommend making no more than two consecutive applications of Force of Nature® Miticide. After two applications, rotate to an alternative chemistry for at least two applications.
- Apply early in the morning or late afternoon when the temperature is lower. Spray directly onto pest(s). Make applications before noticeable foliar damage occurs.
- Thorough spray coverage is essential for good pest control. Applications should be repeated at an interval sufficient to maintain control, depending upon plant growth, pest pressure and weather conditions after spraying.
- Local conditions may affect the use of Force of Nature® Miticide. Consult your local State Extension Specialist for specific recommendations related to local pest control problems.
- Spray water/spray tank solutions should not be below pH 3.0 or above 8.0. Force of Nature® Miticide works best in a pH range of 3.5–7.5. Use outside this range may cause product degradation. If necessary, buffer water to near neutral pH.
- Do not mix Force of Nature® Miticide with oxidizing agents such as bleach, bases, or strong acids as they will destabilize the product. Avoid application when drying of product is not possible for prolonged periods.
