- Irritating to eyes

- May become irritated by any collar if it is applied too tightly

Consult a veterinarian before using this product on debilitated, aged, or medicated pets. Do not use on puppies under 12 weeks old. Do not use on any animal that is known to be allergic to the ingredients of this product.

- Do not apply more than one collar to an animal
- Do not replace collar until the pet's next scheduled grooming

**HAZARDS TO DOMESTIC ANIMALS:**

- Harmful if swallowed or absorbed through the skin
- Causes irritation to eyes
- Avoid contact with eyes, skin, or clothing

- Sensitive animals may become irritated by any collar if it is applied too tightly

Consult a veterinarian before using this product on debilitated, aged, or medicated pets. Do not use on puppies under 12 weeks old. Do not use on any animal that is known to be allergic to the ingredients of this product.

- Do not apply more than one collar to an animal
- Do not replace collar until the pet's next scheduled grooming

**PRECAUTIONARY STATEMENTS:**

READ ENTIRE LABEL BEFORE EACH USE.

**FIRST AID:**

- For emergency medical treatment information, call your local Poison Control Center or doctor for treatment advice. You may also contact 800-234-2269 or your local Poison Control Center for further information.

- If signs continue, remove the collar from the animal and consult a veterinarian.

- DO NOT INDUCE VOMITING UNLESS TOLD TO DO SO BY A DOCTOR.

- ATROPINE IS ANTIDOTAL.

**STORAGE AND DISPOSAL:**

- Do not contaminate water, food, or feed by storage and disposal.

**POST-CONSUMER RESPONSIBILITY:**

- For more information, call us at 800-234-2269.

- Adams™ Plus products are designed to complement each other in an integrated program for fleas and ticks on dogs. Ticks are only a cause of concern in warm weather months. Adams™ Plus products are recommended for use on all dogs in warm weather months.

**NOTICE:**

- This product contains neonicotinoids that are toxic to honey bees. Do not contaminate water, food, or feed by storage and disposal.

**NOTE TO PROFESSIONALS AND VETERINARIANS:**

- The product contains neonicotinoids which are a class of insecticides. Cholinesterase symptoms may include ataxia, salivation, incontinence, opisthotonos, seizures, depression, prostration, and respiratory arrest. If this occurs, contact a veterinarian immediately.
