Altosid® IGR Custom Blend 2%

DIRECTIONS FOR USE:

Start feeding 30 days before horn flies normally appear. Continue feeding throughout the summer and into the fall until cold weather restricts horn fly activity.

Altosid® IGR Custom Blend 2% prevents emergence of adult horn flies, before they can emerge as new adult horn flies. If significant numbers of adult horn flies are already present when Altosid® IGR Custom Blend 2% is introduced, it may take 3 to 5 weeks for an effect on the adult horn fly population to be clearly observed. For fast relief from existing horn fly burdens, consider the use of adulticide sprays, dusts, back-rubbers, or pour-ons.

It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Restrictions apply to various uses of this product. For complete use directions, see the full Material Safety Data Sheet and Product Label.

When used as directed, rations containing this product can be used in complete feeds, concentrates, hand feeds, or loose or block mineral or protein supplements.

ENVIRONMENTAL HAZARDS:

Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Do not contaminate water, food, or feed by storage or disposal. Remove any empty container/liner from site before disposal. Do not incinerate empty container/liner. With the addition of the liquid components, add the following amounts of Altosid® IGR Custom Blend 2% to the feed or supplement:

- 2 oz/head/day: 20 oz/250 lbs
- 4 oz/head/day: 10 oz/500 lbs
- 8 oz/head/day: 51 oz/250 lbs

• Use Altosid® IGR Custom Blend 2% only in cattle.

• To break the life cycle of the horn fly, when fed to cattle, passes through the digestive system and is deposited throughout the manure. Here it stops the development of immature horn flies. Adult horn flies remain feeding on cattle day and night and leave the animal only to lay eggs in freshly passed manure. When used as directed, rations containing this product can be used in complete feeds, concentrates, hand feeds, or loose or block mineral or protein supplements. This product can be used in complete feeds, concentrates, hand feeds, or loose or block mineral or protein supplements.

• Causes moderate eye irritation. Avoid contact with eyes, skin, or clothing. Wear protective eyewear such as safety glasses or goggles. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco.

• May also contact 1-800-347-8272 for emergency medical treatment information. You may need the product container or label with you when calling a poison control center or doctor, or going for treatment.
