**MIXED-RATION FEEDING**

**ENVIRONMENTAL HAZARDS:**
- Do not contaminate water when disposing of equipment washwaters.
- Keep out of reach of children.
- Do not use around pets.
- Do not contaminate water resources or food and feed supplies.
- Use only as directed.

**ACTIVE INGREDIENT**
- Contains 3.04 grams of diflubenzuron per pound.

**CLARIFLY® LIVESTOCK PREMIX 0.67%**

**KEEP OUT OF REACH OF CHILDREN.**

**INTEGRATED PEST MANAGEMENT**

**IPM PROGRAM OVERVIEW**

**PLANNING**
- Assess your operation and find the fly hot spots.
- Establish a plan to minimize pest damage by the most economical means, utilizing various control options.
- Set specific fly targets, such as fly populations or environmental conditions.
- Train field employees on the plan.

**IMPLEMENTATION**
- Set an action threshold, a point at which pest populations or environmental conditions will trigger action.
- Train field employees on the plan.

**EVALUATION**
- Document your progress with a concise record of locations, conditions, and action taken.
- Critique the program and make necessary changes.
- Use the following equation when calculating inclusion level based on a given percentage of body weight and daily feed intake:

\[
\text{Inclusion Rate} = \frac{\text{Body Weight (lbs)} \times \text{Inclusion Level} \times \text{Daily Feed Intake (lb)}}{\text{Average Daily Feed Intake (lb)}}
\]

**LIMITED USE OF INSECTICIDES**

- For treatment of swine, use at the registered rate 0.20 – 0.30 mg/kg of body weight (lbs). For additional information on this pesticide product (including health concerns, restrictions, and limitations), refer to the product label.

**MIXED WITH FREE-CHOICE MINERALS**

- Mix with free-choice-fed minerals to produce a mineral mixture as shown in the previous table will provide the required daily intake of 0.10 mg diflubenzuron/kg of body weight (lbs).

**IMPLEMENT THE OPTIMUM IPM**

**Horse flies, stable flies, face flies and horn flies** are pesky and relentless pests. Make the most of your control efforts by incorporating an integrated pest management program (IPM). With ClariFly® Lannate Livestock Premix 0.67% (ClariFly® Premix), the ideal program will fill gaps where they lived, and can help reduce populations to manageable levels.
