Precautionary Statements
Hazard to humans and domestic animals

Danger: Corrosive. Causes irreversible eye damage and skin burn. Harmful if swallowed. May be inhaled. Do not get into eyes, on skin or on clothing. Do not breathe vapors or spray mist. Wear goggles or face shield and chemical-resistant gloves and protective clothing when handling. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash clothing before reuse.

Environmental Hazards
This pesticide is toxic to birds, fish and aquatic invertebrates. Never bring this product into contact with other sanitizers, cleaners or organic substances.

Disinfection Performance:
In case of emergency, call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center.

Physical or chemical hazards
Strong oxidizing agent. Corrosive. Mix only with water at 60 – 80°F. Product must be diluted in accordance with label directions prior to use.

This product is not combustible; however, at temperatures exceeding 156°F, decomposition occurs releasing oxygen. The oxygen release could initiate combustion. Never bring this product into contact with other sanitizers, cleaners or organic substances.

FIRST AID
In case of emergency, call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center.

If In Eyes:
Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center.

If InSkin: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center.

If Inhaled: Have patient sip a glass of water if able to swallow. Do not induce vomiting and do not try to do so by a poisoned person or doctor. Do not give anything by mouth to an unconscious person. Call a poison control center or doctor immediately for treatment advice.

If Ingested: Call a poison control center or doctor immediately for treatment advice. Have the product container or label with you when calling a poison control center.

Pre-Clean heavily soiled areas. Apply use solution of 2 oz. of this product per 3 gal. of water to sanitize hard, non-porous surfaces with a sponge, brush, cloth, mop, mechanical spray device, coarse pump or trigger spray device. For spray applications, spray 6 – 8 inches from surface. Do not breathe spray. Treated surfaces must remain wet for 2 minutes. Wipe dry or allow to air dry. Prepare a fresh solution daily or when visibly dirty. Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

For use as a one-step general hospital disinfectant/cleaner:
Pre-clean heavily soiled areas. Apply solution of 1 oz. of this product per 3 gal. of water. Surfaces must remain wet for at least 1 minute or until operations resume at which time the sanitizing solution must be drained from the system. Allow sanitized surfaces to adequately drain before contact with food so that little or no residue remains. Do not rinse. For articles too large for immerging, apply a use solution of 1 oz. of this product per 3 gal. of water to sanitize hard, non-porous food contact surfaces with a brush, cloth, mop, mechanical spray device or coarse pump or trigger spray device. For spray applications, spray 6 – 8 inches from surface. Do not breathe spray. Surfaces must remain wet for at least 1 minute. Allow sanitized surfaces to adequately drain and then air dry before contact with food so that little or no residue remains. Do not rinse. Prepare a fresh solution daily or when visibly dirty. For mechanical application, use solution must not be re-used for sanitizing applications but may be used for other purposes such as cleaning.

Beverage dispensing and sanitary filling equipment sanitizer directions:
For sanitizing of hard, non-porous bottling or pre-mix dispensing equipment and bottles or cans in the final rinse water application. This product is to be proportioned into the final rinse water line of the container fill system. Fill system solution: 1 oz. of this product per 3 gal. of water. Surfaces must remain wet for at least 1 minute or until operations resume at which time the sanitizing solution must be drained from the system. Allow sanitized surfaces to adequately drain before contact with liquid. Do not rinse.

final sanitizing bottle rinse: This product may be used as a final sanitizer rinse, followed by adequate draining for retamuable and non-retamuable bottles at 1.1 – 6.5 oz. of this product per 6 gal. of water (82-500 ppm active PAA). Antimicrobial rinse or pre-cleaned or new returnable or non-returnable containers: To reduce the numbers of beverage spoilage organisms, use 1.1 – 6.5 oz. of this product per 6 gal. of water at temperatures of 115 – 140°F for 30 seconds. Higher dilutions of 1 oz. of this product per gal. of water are effective at 140°F. After adequate draining, rinse interior containers with sanitizing solution and drain.

Storage and disposal
Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store only in original container. To remove from original container, use a storage container sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Pesticide Disposal: Pesticide wastes are likely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. CONTAINER HANDLING – Non-Returnable Container: Do not reuse or re-fill this container. Triple rinse container promptly after emptying. If triple rinse container is not used, follow Pesticide Disposal instructions for rinseate disposal. Repel this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfi, or by incineration.

Business Use Pesticides: This product is for use in a manner inconsistent with its labeling. This product is not for use on medical device surfaces.

For use as a sporicide against clostridium difficile spores:
Wear appropriate barrier protection such as gloves, gowns, masks or eye protection. Clean surfaces/faces. Facial matter/waste are to be thoroughly cleaned from objects/face by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. This cleaning may be accomplished with any cleaning solution, including this product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths. Apply solution of 4 oz. of this product per gal. of water, or equivalent use-dilution, to disinfected hard, non-porous surfaces with a sponge, brush, cloth, mop, mechanical spray device, coarse pump or trigger spray device. For spray applications, spray 6 – 8 inches from surface. Do not breathe spray. Treated surfaces must remain wet for 2 minutes. Wipe dry or allow to air dry. Prepare a fresh solution daily or when visibly dirty. Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

For use as a one-step general hospital disinfectant/cleaner:
Pre-clean heavily soiled areas. Apply solution of 2 oz. of this product per gal. of water (or equivalent use-dilution) to disinfected hard, non-porous surfaces with a sponge, brush, cloth, mop, mechanical spray device, coarse pump or trigger spray device. For spray applications, spray 6 – 8 inches from surface. Do not breathe spray. Treated surfaces must remain wet for 2 minutes. Wipe dry or allow to air dry. Prepare a fresh solution daily or when visibly dirty. Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

For use as a one-step general hospital disinfectant/cleaner:
Pre-clean heavily soiled areas. Apply solution of 3 gal. of this product per 1 gal. of water for at least 1 minute. Allow sanitized surfaces to adequately drain and then air dry before contact with food so that little or no residue remains. Do not rinse. For articles too large for immerging, apply a use solution of 1 oz. of this product per 3 gal. of water to sanitize hard, non-porous food contact surfaces with a brush, cloth, mop, mechanical spray device or coarse pump or trigger spray device. For spray applications, spray 6 – 8 inches from surface. Do not breathe spray. Surfaces must remain wet for at least 1 minute. Allow sanitized surfaces to adequately drain and then air dry before contact with food so that little or no residue remains. Do not rinse. Prepare a fresh solution daily or when visibly dirty. For mechanical application, use solution must not be re-used for sanitizing applications but may be used for other purposes such as cleaning.

Dispersion and Sanitary Filling Equipment Sanitizer Directions:
For sanitizing of hard, non-porous bottling or pre-mix dispensing equipment and bottles or cans in the final rinse water application. This product is to be proportioned into the final rinse water line of the container fill system. Fill system solution: 1 oz. of this product per 3 gal. of water. Surfaces must remain wet for at least 1 minute or until operations resume at which time the sanitizing solution must be drained from the system. Allow sanitized surfaces to adequately drain before contact with liquid. Do not rinse.

final Sanitizing Bottle Rinse: This product may be used as a final sanitizer rinse, followed by adequate draining for retamuable and non-returnable bottles at 1.1 – 6.5 oz. of this product per 6 gal. of water (82-500 ppm active PAA). Antimicrobial Rinse or Pre-Cleaned or New Returnable or Non Returnable Containers: To reduce the numbers of beverage spoilage organisms, use 1.1 – 6.5 oz. of this product per 6 gal. of water at temperatures of 115 – 140°F for 30 seconds. Higher dilutions of 1 oz. of this product per gal. of water are effective at 140°F. After adequate draining, rinse interior containers with sanitizing solution and drain.

Storage and Disposal
Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage: Store only in original container. To remove from original container, use a storage container sufficient to make it inaccessible to children or persons unfamiliar with its proper use. Pesticide Disposal: Pesticide wastes are likely hazardous. Improper disposal of excess pesticide, spray mixture or rinse is a violation of Federal Law. FOOD CONTACT SURFACE SANITIZING DIRECTIONS:

Before reuse.

This product is not for use on medical device surfaces.

For USE AS A SPORICIDE AGAINST CLOSTRIDIUM DIFFICILE SPORES: Wear appropriate barrier protection such as gloves, gowns, masks or eye protection. Pre-clean surfaces. Bacitracin tolerant bacteria or fungal spores not be thoroughly cleaned or subject/surfaces before disinfection by application with a clean cloth, mop, and/or sponge saturated with the disinfectant product. This cleaning may be accomplished with any cleaning solution, including this product. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths. Apply solution of 4 oz. per gal. of water, or equivalent use-dilution, to disinfect hard, non-porous surfaces with a sponge, cloth, mop, mechanical spray device, coarse pump or trigger spray device. For spray applications, spray 6-8 inches from surface. Do not breathe spray. Treated surfaces must remain wet for 2 minutes. Wipe dry or allow to air dry. Prepare a fresh solution daily or when visibly dirty. Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

For USE AS A ONE-STEP GENERAL HOSPITAL DISINFECTANT/CLEANER: Pre-clean heavily soiled areas. Apply solution of 2 oz. of this product per gal. of water to surfaces. Do not rinse. To SANITIZE HARD, NON-POROUS FOOD CONTACT SURFACES, RESTAURANTS, BARS, AND IN A THREE COMPARTMENT SINK: Immense pre-cleaned glassware, dishes, silverware, cooking utensils and other similar size food processing equipment in a solution of 1 oz. of this product per 3 gal. of water for at least 30 seconds. Allow sanitized surfaces to adequately drain and then air dry before contact with food so that little or no residue remains. Do not rinse. For articles too large for immersing, apply a use solution of 1 oz. of this product per 3 gal. of water to sanitize hard, non-porous food contact surfaces with a brush, cloth, mop, coarse trigger spray device. For spray applications, spray 6–8 inches from surface. Do not breathe spray. Surfaces must remain wet for at least 1 minute. Allow sanitized surfaces to adequately drain and then air dry before contact with food so that little or no residue remains. Do not rinse. Prepare a fresh solution daily or when visibly dirty. For mechanical application, use solution must not be reused for sanitizing applications but may be used for other purposes such as clean-up.

BEVERAGE DISPENSING AND SANITARY FILLING EQUIPMENT SANITIZER DIRECTIONS: For sanitizing of hard, non-porous bottling or pre-mix dispensing equipment and bottles or cans in the final rinse application. This product is to be proportioned into the final rinse water line of the container being filled. Rinse filler. Fill each volume of 1 oz. of this product per 3 gal. of water. Surfaces must remain wet for at least 1 minute or until operations resume at which time the sanitizing solution must be drained from the system. Allow sanitized surfaces to adequately drain before contact with food.

FINAL SANITIZING BOTTLE RINSE: This product may be used as a final sanitizer rinse, followed by adequate draining for returnable and non-returnable bottles at 1.1–6.5 oz. of this product per 3 gal. of water. Do not rinse. Prepare a fresh solution daily or when visibly dirty. For mechanical application, use solution must contain less than 1 ppm active PAA at a temperature range of 115°–140°F for 30 seconds. Higher dilutions of 1 oz. of this product per 3 gal. of water. After adequate draining, rinse interior containers surfaces with sterile or potable water.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Store only in original container. Keep this product under locked storage sufficient to make inaccessible to children or persons unfamiliar with its proper use. PESTICIDE DISPOSAL: Pesticides are widely used on various surfaces. Improper disposal of excess pesticide, spray mixture or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste Representative at the nearest EPA Regional Office for guidance. CONTAINER HANDLING: Retain this container with this product only. Do not reuse this container for any other purpose. CLeaning the container before final disposal is necessary to remove any pesticide deposition before refilling is the responsibility of the refiller. To clean the container before final disposal empty the remaining contents from this container into application equipment or a mix tank. Fill this container with 100 percent full with water. Agitate vigorously or recirculate water with the pump for 2 minutes. Pour or rinse rinse into application equipment or rinse collection system. Repeat this rinsing procedure two more times.
