EMERGENCY HANDLING.

In case of contamination or decomposition – Do not reseal the container. Rinse empty container thoroughly with water and spatter. Do not pre-mix or add water to this product. • Do not allow this product to contact other water treatment products, including other water treatment products, away from this product. Do not allow this product to contact other water treatment products. Before placing this product in a container, make sure external is completely clean and free of material from other water treatment products. Exposure to heat can cause this product to readily decompose, leading to fire, explosions, and the release of toxic gases. • Store in a cool, dry, well-ventilated area. Strong oxidizing agent. This product can increase fire intensity.

Keep away from heat and from fire and burning material, including lighted cigarettes.

This product is toxic to fish and aquatic organisms.

Storage & Disposal:

This product contains propylene glycol, which is not flammable. Store in a cool, dry, well-ventilated area away from heat, fire and burning material. Strong oxidizing agent. This product can increase fire intensity.

For above ground and/or in ground pools: Every 7 days, or additional products to the pool. Always check and adjust pool chemistry before adjusting pH levels. Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a 2-4 hour period. If any precipitation falls onto the bottom of the pool, use a brush to disperse until completely dissolved. Dissolved organic matter causes plugging of the filter and other damage to pool surfaces. Do not allow this product to be used near equipment to prevent products from trap/ing bonus into the filter system.

NEXT DAY:

Follow label directions for each of these products. Add a shock dosage of this product. Repeat dosage, as necessary, to achieve a chlorine ppm concentration of 3-5 ppm. Then, add an algaecide to your pool. Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Always check and adjust pool chemistry before adjusting pH levels.

METHOD FOR DOSING DIRECTLY INTO POOL:

Add the recommended dosage of this product during evening hours while the filter pump is running. When adding this product to your pool, broadcast the product evenly over a 2-4 hour period. If any precipitation falls onto the bottom of the pool, use a brush to disperse until completely dissolved. Dissolved organic matter causes plugging of the filter and other damage to pool surfaces.
