Available Chlorine

1-4 ppm

NOTE: Follow the labeled directions for each product and follow each product to chlorine and disperse before adding additional products to the pool. Always check and adjust total alkalinity before adjusting pH levels. Use a reliable test kit or test strips that measure all of these ranges.

**HOW TO USE**

Use active contents at bag when opened.

**DO NOT USE IN RETURN OR FEEDER**

**METHOD FOR DISCHARGE INTO POOL:**

Add the recommended dosage of this product during evening hours when the filter is running. After adding this product to your pond, broadcast this product evenly over a wide area in the deepest part of the pool. If any granules stick to the surface of the pond, wait to make sure they are dispersed until completely dissolved. Unflushed granules may cause staining or other damage to pool surfaces.

**METHOD FOR SURFACE ADDITION:**

Use this method to avoid shocking the empty or clear pool. Make sure that filter remains on and property recirculating through skimmer. Simply sprinkle any remaining granules into the skimmer at the same time. DO NOT allow this material to accumulate or generate toxic gas pressure.

Test available chlorine residue with an INNO POOL test kit or test strips. Do not add pool with chloramines present. INNO POOL test kit is for use in swimming pools that have achieved a minimum chlorine residual of 1-4 ppm. Re-entry into treated swimming pools is prohibited above levels of 4 ppm residual for at least 30 minutes.

**OPENING YOUR POOL:**

Balance pool water per INNO WATER balance. Add a shock dose of this product. Upon dosage, do not use, until the free available chlorine residual is 1-4 ppm. Follow the listed directions for each of these products.

**SHOCK TREATMENT / SUPPLEMENTAL CHLORINATION:**

A preventative treatment of first shock dose per week with 10% shock treatment. Additional shock treatments may be necessary to remedy problems which may occur when starting pool is high. Water appears cloudy or cloudy due to unknown re-sediments, algae or debris, or heavy winds and rainstorms, or if algae does not dissolve with mudding and cloudy water and cloudy leading.

For above ground and inground pools:

Every 7 days, or as necessary to prevent pool problems, shock treatment is necessary when starting pool is high. Follow directions on product label. After adding INNO POOL shock treatment, wait 1 hour before adding second shock treatment. Follow directions on product label.

**ALGAE CONTROL:**

Add a shock dose of this product at 1:120 bag size to any algae on the surface or bottom of the pool. Excessive, repeat the shock treatment. Untreated pool and prevent possible étching or blooming, especially after treatment. Treatment helps to reduce shocking surface of algae growths and disperse any granules on the bottom of the pool.

**WINTERIZING:**

Gradually add 1-2 bags of 0 kg to this product per 10,000 gallons of water. INNO POOL SHOCK treatment. On the pool at least once a week, and Step 4: Alkalinity regularly.

**PRECAUTIONARY STATEMENTS:**

**HARMFUL TO HUMANS AND DOMESTIC ANIMALS: DANGER:**

**CONSUMERS:**

Read all instructions before use. Follow directions on product label. This product is harmful to animals and wildlife. Keep out of reach of children. Use only according to label directions. Do not add this product directly to your swimming pool or spa. Read all Preventative and Final After-Step statements before back tank before use.

**KEEP OUT OF REACH OF CHILDREN:**

**DANGEROUS**

Contamination or improper use may cause fire, explosion, or the release of toxic gases. Do not allow product to contact any foreign matter, including other treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Only add this product directly to your swimming pool or spa.

**POLLUTION**

Keep out of reach of children. Use only according to label directions. Do not add this product directly to your swimming pool or spa.

**NATURAL**

Do not mix or use with other chemicals. Keep out of reach of children. Use only according to label directions. Do not add this product directly to your swimming pool or spa.

**SAFE**

Do not mix or use with other chemicals. Keep out of reach of children. Use only according to label directions. Do not add this product directly to your swimming pool or spa.
DIAGNOSTIC TREATMENT:

- **First Aid:**
  - **If In Eyes:** Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
  - **If on Skin or Clothing:** Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

- **Emergency Handling:**
  - In case of contamination or decomposition—Do not reseal container. Remove from skin with soap and water. Remove contaminated clothing before reusing.

- **Storage and Disposal:**
  - Do not contaminate food or feed by storage or disposal of empty containers. Keep this product in its tightly closed container when not in use. Store in a cool, dry, well-ventilated area. Keep away from heat and open flame. Nonrefillable container. Do not reuse or refill this container. Rinse empty container thoroughly with water to dissolve all material prior to disposal. Offer for recycling if available. FOR DISPOSAL OF A CONTAMINATED OR DECOMPOSING PRODUCT SEE “EMERGENCY HANDLING.”
