This product contains no phosphates. This product is an economical concentrate to be used with a mop and bucket or with continuous flow sprayers. Low pressure sprayer, hand sprayer or selfpropelled sprayer. This product is not for use as a sanitizer on dishes, glassware, utensils and dairy processing equipment at 200-400 ppm active chlorine without added water rinse. Use on multi-touch surfaces responsible for cross-contamination.

This product is not for use on:
- Restaurant, catering, pizzerias, fast food operations, bars, taverns, cocktail lounges, food storage areas, food establishments, coffee shops, donut shops, bakeries, liquor stores,
- Equipment may be used washable hard, nonporous surfaces,
- Food preparation and storage areas,
- Dishes, glasses, silverware, cooking utensils, plastic and other non-porous cutting boards, covers, ice chests,
- Kitchen equipment: food processors, blenders, cutters, utensils,
- Countertops: Sputty 8™ Machines, steppots, sinks, appliances, refrigerators, ice machines
- Dishwasher: metal, stainless steel, glazed porcelain, glazed ceramic, painted fiberglass, granite, marble, plastic, chrome, vinyl,

This product meets AOAC Genceral & Detergent standards for sanitizing previously cleaned food-contact surfaces.

This product is an effective sanitizer for use on food contact surfaces in 60 seconds at 200-400 ppm active chlorine without added water rinse. This product may be used washable hard, non-porous surfaces.

To prepare a 200 ppm solution: add 1 ounce (29.6 cubic centimeters) of liquid to 1 gallon (3.8 liters) of water.

To prepare a 300 ppm solution: add 1.5 ounces (44.4 cubic centimeters) of liquid to 1 gallon (3.8 liters) of water.

To prepare a 400 ppm solution: add 2 ounces (59.2 cubic centimeters) of liquid to 1 gallon (3.8 liters) of water.

To prepare a 200 ppm active chlorine solution by adding 1-2 ounces of this product to 10 gallons of water (or equivalent dilution).

To prepare a 300 ppm active chlorine solution by adding 1.5-3 ounces of this product to 10 gallons of water (or equivalent dilution).

To prepare a 400 ppm active chlorine solution by adding 2-4 ounces of this product to 10 gallons of water (or equivalent dilution).

Directions for use:

- Use product for the prescribed time on critical and semi-critical medical equipment.

DIRECTIONS FOR USE:
- Disinfect: To disinfect, hand no-porous surfaces apply solution with mop, cloth, sponge, low pressure sprayer or hand pump sprayer as to all visible surfaces thoroughly. Allow to remain in place at least 10 minutes, then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use.
- To prepare a solution for each use. For low pressure sprayer and hand pump sprayer applications, spray 6-8 inches from the surface to be treated with cloth or sponge. Do not beze air.

NOTE: For spray applications, cover or remove all food products.

General Disinfection:
- Add 3 ounces of product per 5 gallons of water for disinfection against Staphylococcus aureus, Salmonella enterica, Listeria monocytogenes, and Yersinia enterocolitica.

VIRUCIDAL ACTIVITY – This product, when used on environmental, inanimate, hard non-porous surfaces at 1.0 ppm of active chlorine, inactivated 99.99% of SARS-CoV-2 (strain B.1.408.7.4.91/2021.12.1/2022) virus in less than 30 seconds. The virus was dilution or concentration of solution with a cloth, sponge or hand pump sprayer as to all visible surfaces thoroughly. Allow to remain in place at least 10 minutes, then remove excess liquid. For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use.

To disinfect food preparation environments: floors, walls, and storage areas, add 3 ounces of this product per 5 gallons of water (or equivalent dilution). For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. For low pressure sprayer and hand pump sprayer applications, spray 6-8 inches from the surface to be treated with cloth or sponge. Do not beze air.

NOTE: For spray applications, cover or remove all food products.

EFFECTIVE EFFICACY TESTS HAVE DEMONSTRATED THAT THIS PRODUCT IS AN EFFECTIVE VELICIDE AND VIRUCIDE IN THE PRESENCE OF INORGANIC SALTS, 6% BLOOD SERUM.

To disinfect food preparation environments: floors, walls, and storage areas, add 3 ounces of this product per 5 gallons of water (or equivalent dilution). For heavily soiled areas, a pre-cleaning step is required. Prepare a fresh solution for each use. For low pressure sprayer and hand pump sprayer applications, spray 6-8 inches from the surface to be treated with cloth or sponge. Do not beze air.

NOTE: For spray applications, cover or remove all food products.

Vehicle: All vehicles including mats, crates, cans, caves and wheels with high pressure water and this product. For spray applications use a coarse spray device. Use 3.5 ounces of this product per 5 gallons of water (or equivalent dilution) for disinfection and disinfection. Leave all treated surfaces exposed to use solution for a minimum of 10 minutes and allow to dry.

Shoe cleaning directions: To prevent tracking harmful organisms into animal areas, and the packaging and storage areas of food plants, shoes bathing containing one inch of freshly made solution should be placed at all entrances to buildings, hatcheries and all entrances to the production and packaging rooms. Scoop the solution off the shoes and pour on the floor. Further, prepare a 0.5% solution of this product to 1 gallon (3.8 liters) of water (or equivalent dilution) (200 ppm active solution) for 60 seconds prior to entering area. Change use solution in the bath daily.

Shoe foam sanitization directions: To prevent tracking harmful organisms into animal areas, and the packaging and storage areas of food plants, shoes containing a piece of freshly made solution should be placed at all entrances to buildings, hatcheries and all entrances to the production and packaging rooms. Scoop the solution off the shoes and pour on the floor. Further, prepare a 0.25% solution of this product to 1 gallon (3.8 liters) of water (or equivalent dilution) (100 ppm active solution) for 60 seconds prior to entering area. Change use solution in the bath daily.

Shoe Foam Sanitation Directions:
