PRECAUTIONARY STATEMENTS:
HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER. Contact with this chemical may cause serious or fatal injury. Do not inhale. Avoid contact with skin and eyes. Wash thoroughly with soap and water in case of contact. Do not eat or drink while handling. Do not inhale. Do not breathe dusts, mists, or fumes. Do not allow children to be exposed to this product. Do not use near children or pets. Do not inhale. Avoid contact with skin and eyes. Wash thoroughly with soap and water in case of contact. Do not eat or drink while handling. Do not allow children to be exposed to this product. Do not use near children or pets. Do not inhale. Avoid contact with skin and eyes. Wash thoroughly with soap and water in case of contact. Do not eat or drink while handling. Do not allow children to be exposed to this product. Do not use near children or pets.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms.

PHYSICAL OR CHEMICAL HAZARDS: Strong oxidizing agent. Do not mix with other chemicals, mix only with water. Never add water to product. Always add product to large quantities of water. Do not add the product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion. Contamination with moisture, organic matter or other chemicals will start a chemical reaction and generate heat, hazardous gas, which may explode. In case of contamination or decomposition do not reconstitute. If possible, isolate container in open air or well ventilated area. Food areas with large volumes of water. NOTE: Buyer assumes all responsibility for use and safety in accordance with directions.

DIRECTIONS FOR USE: IT IS A VIOLATION OF FEDERAL LAW TO USE THIS PRODUCT IN A MANNER INCONSISTENT WITH ITS LABELING. Read entire label and use strictly in accordance with precautionary statements and directions.

FOR SWIMMING POOL DISINFECTANT: When used as directed, this product is effective as a swimming pool water disinfecting agent. Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2 - 7.6. Add stabilizer to stabilize to a minimum level of 10-15 ppm to reduce the degradative effects of sunlight upon the chlorine residual. Check for metals. Before using this product, add stain and scale inhibitor to prevent staining of pool surface due to metals. When using other products as outlined in the directions for this product, always follow directions on those products.

SUPERCHLORINATION: Superchlorination is necessary at the beginning of the bathing season, whenever the pool is filled, every week during hot weather, and following heavy rain or windstorms. Superchlorinate the pool with a suitable granular product by following directions below or on another product's label. Keep pump filter system running for at least 10 hours every day. When superchlorination is performed, rely on those products that have a label that states: "Use this product with this product to achieve the desired effect." Do not use this product with another product that does not have a label that states: "Use this product with this product to achieve the desired effect.

For superchlorination, broadcast one pound of the product per 10,000 gallons directly into the water in the deep end of the pool. To prevent damage to pool surface, use a pool brush to disperse any products that may have settled to the bottom of the pool. NEVER allow undissolved product to rest in contact with bleachable pool surfaces. In water temperatures less than 70°F, or as an alternate application procedure, predissolve this product prior to applying evenly to the deep end of the pool. Dissolve this product in a clean plastic bucket stirring with a clean plastic or wooden spoon. Add this product to water. NEVER add water to the product. NEVER add more than one pound of this product to 3 gallons of cool water. Do not mix with other products while pre-dissolving.

MAINTENANCE DOSAGE: With pump running, broadcast 4 ounces of this product per 10,000 gallons directly into the water in the deep end of the pool as an initial treatment. Repeat additions until a residual of 1-3 ppm chlorine is established as determined by use of a test kit. To prevent damage to pool surface, use a pool brush to disperse granules that may have settled to the bottom of the pool.

NEVER ALLOW UNDISSOLVED PRODUCT TO REST IN CONTACT WITH BLEACHABLE POOL SURFACES. Regular use of a test kit is necessary to determine when it is necessary to add another dose of this product to maintain a residual of 1-3 ppm available chlorine in the pool water. An average daily dose requirement is 2-3 ounces of this product per 10,000 gallons of water.

After use of this product it is recommended that a preventative algae treatment be added on a weekly basis.

REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.

FOR SWIMMING POOL ALGAECIDE: When used as directed, this product kills algae and will rid your pool of unsightly algae costs. This product is ideal for use in vinyl lined, tile glass or colored pool surface construction.

Ensure all pool equipment is working properly. Backwash the filter system following manufacturer's directions. Adjust pH to between 7.2 - 7.6. Check for metals and if present add algin and scale inhibitor to prevent staining of pool surface. When using other products as outlined in the directions for this product, follow directions on those products.

Before using this product, brush all surface-cleaning algae paying special attention to pool steps, ladder steps and around skimmers and lights. At night, or when the pool is not in use, broadcast this product directly into the water in the deep end of the pool with pump running. Use two pounds of the product per 10,000 gallons for medium heavy algae growth and one pound per 10,000 gallons for light algae growth. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled to the bottom of the pool. Before allowing anyone algae and clean/balanced filter. If algae is still visible, repeat treatment.

REENTRY INTO TREATED SWIMMING POOLS IS PROHIBITED ABOVE LEVELS OF 3 PPM CHLORINE DUE TO RISK OF BODY INJURY.

STORAGE AND DISPOSAL: do not contaminate water, food or feed by storage and disposal.

PESTICIDE STORAGE: Keep this product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. In case of product, isolate container or (if possible) and food area with large amounts of water to dissolve all material before discarding container.

DISPOSAL: If empty, regradable container. Do not cause or reutilize this container. Offer for recycling if available. If partly filled, call your local solid waste agency for disposal instructions. Never pour unused product down any indoor or outdoor drain.
