Disinfectant for Pools & Spas
1" Tablets for Use in Bromine Feeders

Keep out of reach of children.

Active Ingredient:
- 1-bromo-3-chloro-5
- 6-terachloro-2
- 3-benzene-dinitro

Other Ingredients:
- 4%

Total:
- 100%

First Aid:
Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

Physical or Chemical Hazards:
Strong oxidizing agent. Do not mix with other chemicals. Mix only with water. Never add water to product. Always add product to large quantities of water. Use in accordance with manufacturer’s recommendations. Do not add this product to any dispensing device containing remnants of any other product. Such use may cause a violent reaction leading to fire or explosion.

Environmental Hazards:
This product is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other bodies of water unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without first submitting the local sewage treatment plant for analysis. For guidance contact your State Water Board or Regional Office of the EPA.

Directions for Use:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. Read entire label and use strictly in accordance with precautionary statements and directions.

Swimming Pool Sanitizer:
This product, when used as directed, is effective as a swimming pool water sanitizer and disinfectant. Ensure all pool equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.6. When using other products as outlined in directions for this product, always follow directions on those products. A bromine or chlorine residual of 1-2 ppm must first be established in the pool. If the residual is established with this product in a brominator, use the brominator at the highest feed rate following manufacturer’s recommendations. When the bromine residual reaches 1-2 ppm, adjust the feeder accordingly. To maintain a constant residual, adjust the brominator feed rate to assure a constant residual level of 1-2 ppm in residential pools and 3-5 ppm in commercial pools. Regular use of a test kit or test strips is necessary to maintain a constant bromine residual in the pool.

Reentry into treated swimming pools is prohibited above levels of 4 ppm bromine due to risk of body injury.

Spa and Hot Tub Sanitizer:
When used as directed, this product is effective as a spa and hot tub sanitizer and disinfectant. Ensure all spa equipment is working properly. Backwash the filter system following manufacturer’s directions. Adjust pH to between 7.2-7.6. When using other products as outlined in directions for this product, always follow directions on those products. Fill spa bromine feeder with this product and adjust feeder following manufacturer’s directions to yield bromine residual between 2-4 ppm in residential spas and 4-6 ppm in commercial spas. Check feeder regularly and add additional product as needed to maintain the bromine residual. The pump and filter should be operated for at least three hours every day while spa is in use or not. Do not heat water above 102°F. Keep the spa free of leaves and other debris. To maintain clean, clear water and insure the performance of your spa chemicals, spa should be drained and refilled with fresh water every 60 days in residential spas or a minimum of every 7 days in commercial spas.

Reentry into treated spas is prohibited above levels of 6 ppm bromine due to risk of body injury.

Water Features:
Ensure all equipment is working properly. Backwash the filter system (if present) following manufacturer’s directions. Adjust pH to between 7.2-7.6. When using other products as outlined in directions for this product, always follow directions on those products. A bromine or chlorine residual of 1-2 ppm must first be established in the water. If the residual is established with this product in a brominator, use the brominator at the highest feed rate following manufacturer’s recommendations. When the bromine residual reaches 1-2 ppm, adjust the feeder accordingly. To maintain a constant residual, adjust the brominator feed rate to assure a constant residual level of 1-2 ppm. Regular use of a test kit is necessary to maintain a bromine residual in the water.

Storage and Disposal:
Do not contaminate water, food, or feed by storage and disposal.

Storage:
Keep this product dry in original tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flame. Moisture may decompose this product and cause a violent reaction leading to fire and explosion. In case of decomposition, isolate container if possible and flood area with large amounts of water to dissolve all material before discarding this container. Do not contaminate food feed by storage or disposal.

Disposal:
If empty: Nonrefillable container. Do not reuse or refill this container. Offer for recycling if possible.
If partly filled: Call your local solid waste agency for disposal instructions. Never place unused product down any indoor or outdoor drain.
