BROAD SPECTRUM DISINFECTANT
EASY ON SURFACES
NO HARSH ODORS
SEE BACK LABEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.
CAUTION: KEEP OUT OF REACH OF CHILDREN
CONTAINS NO PHOSPHORUS.

1 QT (32 FL OZ) 946 mL

ACTIVE INGREDIENT:
Sodium Hypochlorite........................0.39%
OTHER INGREDIENTS: ....................99.61%
TOTAL: .......................................100.00%

2 MINUTE CONTACT TIME
Kills C. difficile in 2 minutes

KEEP OUT OF REACH OF CHILDREN
CAUTION. SEE BACK LABEL FOR ADDITIONAL PRECAUTIONARY STATEMENTS.

1 QT (32 FL OZ) 946 mL
DIRECTIONS FOR USE: It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

To Clean and Disinfect Hard, Non-porous Non-food Contact Surfaces: Spray 6–8 inches from surface until surface is thoroughly wet. Allow this product to remain wet for 1 minute. For Clostridium difficile spores, allow to remain wet for 2 minutes. Then wipe. For heavily soiled areas, a precleaning is required. A precleaning step is required to kill Clostridium difficile and Mycobacterium bovis.

Special Instructions for Use Against HIV-1 and HBV. This product kills HIV-1 and HBV on precleaned, hard, nonporous surfaces/objects previously soiled with blood/body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of hard, nonporous surfaces/objects with blood or body fluids, and in which the surfaces/objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus (HIV-1) (associated with AIDS) and Human Hepatitis B (HBV).

Special instructions for using this product to clean and decontaminate against HIV-1 and HBV on surfaces/objects soiled with blood/body fluids: Personal Protection: When handling items soiled with blood or body fluids, use disposable impervious gloves, gowns, masks and eye coverings.

Cleaning Procedure: Blood and other body fluids must be thoroughly cleaned from surfaces and other objects before applying this product. Contact Time: Allow surface to remain wet for HBV and HIV-1 for 1 min. Disposal of Infectious Materials: Use disposable impervious gloves, gowns, masks and eye coverings. Blood and other body fluids must be autoclaved and disposed of according to local regulations for infectious waste disposal. This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclude or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

Special labeling instructions for cleaning prior to disinfection against Clostridium difficile spores:

Personal Protection: Wear appropriate barrier protection such as gloves, gowns, masks and eye covering. Cleaning Procedure: Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with a clean cloth, mop or sponge saturated with the sporicidal product. Cleaning is to include vigorous wiping or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths. Infectious Materials Disposal: Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious waste disposal. To disinfect: Spray 6–8 inches from surface until it is thoroughly wet. Allow this product to remain wet for 2 minutes. Then wipe.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS.

CAUTION: Moderate eye irritant. Do not get in eyes or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or going to the toilet. FIRST AID: IF IN EYES: Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. Call a poison control center or doctor for further treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. Questions or comments? Call 1-800-234-7700.

STORAGE AND DISPOSAL: Store this product in a cool area, to avoid deterioration. Nonrefillable container. Do not reuse or refill empty container. Recycle empty container or discard in trash.
ORGANISMS

Spore-forming Bacteria: 2 min. contact time

- Clostridium difficile

Bacteria: 1 min. contact time

- Acinetobacter baumannii
- Bordetella pertussis
- Burkholderia cepacia
- Campylobacter jejuni
- Carbapenem-resistant Klebsiella pneumoniae (CRKP)
- Enterobacter aerogenes
- Enterococcus clavulase New Delhi Metallo-Beta Lactamase-1 (NDM-1), Enterococcus faecalis, Enterococcus faecium
- Escherichia coli O157:H7,
- Klebsiella pneumoniae (NDM-1), Legionella pneumophila, Listeria monocytogenes, Methicillin-resistant Staphylococcus aureus (MRSA), Multi-drug resistant Enterococcus faecium, Multi-drug resistant Enterococcus faecalis, Multi-drug resistant Staphylococcus aureus, Multidrug-resistant Staphylococcus pneumoniae, Pseudomonas aeruginosa, Salmonella enterica, Serratia marcescens, Shigella dysenteriae, Streptococcus pneumoniae, Streptococcus pyogenes, Staphylococcus aureus, Staphylococcus epidermidis (CoNS), Stenotrophomonas maltophilia, Vancomycin intermediate resistant Staphylococcus aureus (VISA), Vancomycin-resistant Enterococcus faecalis (VRE)

Mycobacterium: 1 min. contact time

- Mycobacterium bovis (TB) at 22 ± 2°C

Fungi: 1 min. contact time

- Candida albicans
- Candida glabrata
- Trichophyton mentagrophytes

Viruses††: 1 min. contact time

†† Adenovirus type 2, †† Avian Influenza A (H5N1) virus, †† Bovine Viral Diarrhea Virus (Surrogate for Human Hepatitis C), †† Canine parvovirus, †† Enterovirus EV D-68, †† Hepatitis A virus,
- Hepatitis B Virus (Duck Hep B Virus as surrogate), †† Influenza A virus,
- Influenza B Virus (Duck Hep B Virus as surrogate), †† Norovirus (Feline Calicivirus as surrogate), †† Respiratory Syncytial Virus (RSV), †† Rhinovirus 37, †† Rotavirus, †† SARS-associated Coronavirus

- Follow special instructions for cleaning prior to disinfection

** Kills Avian Influenza A virus on precleaned hard, nonporous surfaces

- Bloodborne Pathogens
