**FIRST AID:**

| IF IN EYES: | Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eyes. Call a Poison Control Center or doctor for treatment advice. |
| IF SWALLOWED: | Call a Poison Control Center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to by a Poison Control Center or doctor. Do not give anything by mouth to an unconscious person. |

Have the product container or label with you when calling a poison control center or doctor or going for treatment. For transportation or medical emergency information involving this product, please call (800) 424 - 9300.

**PRODUCT FACTS**

What it Does: Promis Multi-Purpose Fungicide prevents and controls anthracnose, brown patch, copper spot, dollar spot, leaf spot (including septoria, zonate), maling out, crown rot, leaf smut, powdery mildew, rust, red thread, spring dead spot, necrotic ring spot and summer patch.

Where to Use: Outdoors on roses, flowers, ornamental shrubs and trees, fruit trees and vegetables.

When to Use: Start treating when signs of disease are first noticed.

NOTE: This product is non-staining to most home siding depending on age and cleanliness. However, before using in areas where the spray may contact home siding (vinyl siding in particular), test in an inconspicuous area and recheck in a few hours. Do not use if any staining is observed.
STOP. READ ENTIRE LABEL BEFORE USE.

DIRECTIONS FOR USE
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. For home use only. Shake well before using. Keep pets and people other than applicator off treated areas until spray has dried.

WHEN TO USE
This product is highly effective when it is used to prevent diseases or applied at the first sign of disease. Start when signs of diseases are first noticed. For best disease control, treat every 2 weeks.

RESTRICTIONS
• Do not apply more than 13 treatments per year. In Nassau and Suffolk Counties in New York State, do not apply more than 3 times per given area per year.
• Do not treat plants during periods of stress, i.e. heat, drought, flooding, insects, excessive fertilizer, herbicides or pesticide use, etc.
• For application to individual plants only use conventional pump up sprayers at labeled rates.
• If it rains before product has dried, reapply.
• If disease is already present, this product will not eliminate it.

If you need more information, contact your local County Extension Service.
TO PROTECT FRUITS

APPLE AND MAYHAW
controls powdery mildew, rusts and scab
Mix 1/2 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the tree to point of runoff. Reapply every 7 to 10 days so long as disease symptoms persist. For powdery mildew and rusts, apply at pink bud stage when the buds are opening and the pink petals are visible. For scab, apply Promis Multi-Purpose Fungicide when the first green leaf tips are visible.
• Do not apply within 14 days of harvest.
• Do not apply more than 10 times per season.

STONE FRUITS
For all stone fruits, Promis Multi-Purpose Fungicide may be applied up to the day of harvest.

APRICOT AND NECTARINE
controls brown rot blossom blight, brown rot, powdery mildew, and shot-hole
Mix 1/3 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the tree to point of runoff. Apply at early red bud stage (the tips of the petals are visible and the flowers are still closed) before infection occurs. Reapply every 7 to 14 days so long as the disease symptoms persist.
• Do not apply more than 7 times per season.

CHERRY
Controls brown rot blossom blight, brown rot, leaf spot, and powdery mildew
Mix 1/3 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the tree to point of runoff. Apply when single flower buds are visible (but still closed), on short stalks and before infection occurs. Reapply every 7 to 14 days so long as disease symptoms persist. For leaf spot, make an additional application of Promis Multi-Purpose Fungicide after harvest.

- Do not apply more than 7 times per season.

**PEACH**

controls brown rot blossom blight, brown rot, powdery mildew, and rust

Mix 1/3 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the tree to point of runoff. For brown rot blossom, brown rot, and powdery mildew, apply at early pink bud stage (the tips of the petals are visible and the flowers are still closed) before infection occurs. Reapply every 7 to 14 days so long as disease symptoms persist. For rust, apply Promis Multi-Purpose Fungicide about 8 weeks after flowering if conditions favoring disease development (hot, moist weather) exist. Reapply every 21 days so long as disease symptoms persist.

- Do not apply more than 7 times per season.

**PLUM AND PRUNE**

controls brown rot blossom blight, brown rot, and rust

Mix 1/3 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the tree to point of runoff. For brown rot blossom blight and brown rot, apply when the first green leaf tips are visible and before infection occurs. Reapply every 7 to 14 days so long as disease symptoms persist. For rust, apply Promis Multi-Purpose Fungicide about 8 weeks after flowering if conditions favoring
disease development (hot, moist weather) exist. Reapply every 21 days so long as disease symptoms persist.

- Do not apply more than 7 times per season.

**STRAWBERRY**
controls leaf blight, leaf spot, and powdery mildew
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Promis Multi-Purpose Fungicide may be applied up to the day of harvest. Apply when the disease first appears or when conditions favoring disease development (hot, moist weather) exist. Reapply every 14 to 21 days so long as disease symptoms persist.

- Do not apply more than 6 times per season.
- Do not plant a new crop in the same place as the crop that was treated within 30 days of the last application.

**BERRIES**
For all berries, Promis Multi-Purpose Fungicide may be applied up to the day of harvest.

**BLACKBERRY**, **RASPBERRY***, **LOGANBERRY**
controls cane and leaf rust, leaf spot, orange rust, powdery mildew, and yellow rust
Mix 1/2 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Apply at budbreak and reapply every 10 to 14 days so long as disease symptoms persist.

- Do not apply more than 4 times per season.

*Use on the following members of the caneberry group
including varieties and/or hybrids: Bingelder, black salmerry, boysenberry, cherokee blackberry, Chesterberry, Cheyenne blackberry, cowberry, Darrowberry, dewberry, Oregon evergreen berry, phenomenal berry, rangeberry, ravenberry, rossberry, Shawnee blackberry, youngberry, Himalayanberry, Dinkson Thornless, hullberry, Lavaacberry, lowberry, Lucretiaberry, mammoth blackberry, marionberry, nectarberry.

CURRANT
controls powdery mildew
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Apply before bloom, through bloom and up to 2 weeks post-bloom.
• Do not apply more than 8 times per season.

GOOSEBERRY
controls anthracnose and powdery mildew
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. For anthracnose, apply when the first leaf has completely unfolded. If conditions favoring disease development (hot, moist weather) exist, reapply every 10 to 14 days. For powdery mildew, apply Promis Multi-Purpose Fungicide before bloom, through bloom, and up to 2 weeks post-bloom.
• Do not apply more than 8 times per season.

GRAPE
controls anthracnose, black rot and powdery mildew
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water
water and uniformly apply to all parts of the plant to point of runoff. For anthracnose and black rot, apply when new shoots are 1 to 3 inches in length. Reapply every 14 days so long as disease symptoms persist. For powdery mildew, apply Promis Multi-Purpose Fungicide when shoots are 12 to 18 inches in length (before bloom). Reapply every 21 days so long as disease symptoms persist.
- Do not apply within 14 days of harvest.
- Do not apply more than 5 times per season.

PEPPERMINT AND SPEARMINT
controls powdery mildew and rust
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Apply in the early spring when the plants have broken dormancy. Reapply every 14 to 21 days so long as disease symptoms persist.
- Do not apply within 30 days of harvest.
- Do not apply more than 3 times per season.

VEGETABLES

ASPARAGUS
controls rust
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Do not apply to harvestable spears. In all locations, apply to the developing stems after harvest. Reapply every 14 days so long as disease symptoms persist. In all states except California:
- Promis Multi-Purpose Fungicide may be applied within 180 days of the harvest.
• Do not apply more than one time per growing season.
  In California only:
• Promis Multi-Purpose Fungicide may be applied within 30
days of the harvest.
• Do not apply more than four times per year.

CUCURBITS
controls powdery mildew

Includes use on the following members of the cucurbit group:

acorn squash, balsam apple, balsam pear, bitter melon,
butternut squash, calabaza, cantaloupe, casaba, Chinese

cucumber, Chinese waxgourd, citron melon, crenshaw melon,
crookneck squash, cucumber, edible gourd, gherkin, golden
pershaw melon, honey balls, honeydew melon, hubbard
squash, mango melon, muskmelon, ornamental gourd,
Persian melon, pineapple melon, pumpkin, Santa Claus
melon, scallop squash, snake melon, spaghetti squash,
straightneck squash, summer squash, vegetable marrow,
watermelon, winter squash, zucchini

Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of
water and uniformly apply to all parts of the plant to point of
runoff. Apply Promis Multi-Purpose Fungicide when the
disease first appears. Reapply every 7 to 10 days so long as
disease symptoms persist.
• Promis Multi-Purpose Fungicide may be applied up to and
including the day of harvest.
• Do not apply more than five times per season.
• Do not plant a new crop in the same place as the crop that
  was treated within thirty days of the last application.
SNAP BEAN
controls pod tip rot and rust
Mix 1 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. For rust, apply when the disease first appears. For pod tip rot, apply when pods begin to develop. For both diseases, if conditions favoring disease development (hot, moist weather) exist, reapply every 7 to 10 days.
• Promis Multi-Purpose Fungicide may be applied up to and including the day of harvest.
• Do not apply more than 4 times per season.
• Do not plant a new crop in the same place as the crop that was treated within 30 days of the last application.

TOMATO
controls powdery mildew
Mix 3/4 fl oz of Promis Multi-Purpose Fungicide with 1 gallon of water and uniformly apply to all parts of the plant to point of runoff. Apply when the disease first appears or if conditions favoring disease development (hot, moist weather) exist. Reapply every 21 days so long as disease symptoms persist.
• Promis Multi-Purpose Fungicide may be applied up to and including the day of harvest.
• Do not apply more than 4 times per season.
• Do not plant a new crop in the same place as the crop that was treated within 30 days of the last application.

Notice: Buyer assumes all responsibility for safety and use not in accordance with directions.

ROSES, FLOWERS,
ORNAMENTAL SHRUBS & TREES
Prom's Multi-Purpose Fungicide prevents and controls Black spot, Blight (blossom, cercospora leaf, oculinia petal). Leaf spot (including cercospora), Powdery mildew, Rust (including needle, fusiform), Scab (including fuscidium) and other diseases on a wide variety of roses, flowers, trees and ornamental shrubs. See table for a complete list of plants.

HOW TO TREAT
Use 3/4 fl. oz. / gallon of water. Apply to the point when spray just begins to runoff the leaves. Apply once every 2 weeks throughout the season or until conditions favoring disease development (hot, moist weather) are no longer present. Allow spray to dry before watering.

USE TIPS
1. Treat roses on a 7 to 10 day schedule. If black spot is not a problem, a 10 to 14 day schedule is recommended.
2. When treating azaleas, mountain laurel or rhododendrons, begin spraying when flowers start to show color.
3. When treating irises, increase use rate to 1 1/2 fl. oz. / gallon of water.
4. For Douglas fir, loblolly pine and slash pine use 2 1/4 fl. oz. / gallon of water. Begin treating in early spring and continue treating every 2 to 3 weeks until threat of infection has passed.

**STORAGE AND DISPOSAL**

PESTICIDE STORAGE: Store in a cool, dry area away from heat and open flame. PESTICIDE DISPOSAL: If partly filled, Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain. CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available.
PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wear protective eyewear. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet.

USER SAFETY RECOMMENDATIONS
1. User should remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
2. User should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help ensure that wind or rain does not blow or wash pesticide off the treatment area.
