**KEEP OUT OF REACH OF CHILDREN**

**Warning Aviso**
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.

(If you do not understand the label, find someone to explain it to you in detail.)

**FIRST AID**

| IF IN EYES:               | Hold eye open and rinse slowly and gently with water for 15-20 minutes. |
|                         | Remove contact lenses, if present, after the first 5 minutes, then continue rinsing. |
|                         | Call poison control center or doctor for treatment advice. |

| IF SWALLOWED:            | Call a poison control center or doctor immediately for treatment advice. |
|                         | Have person sip a glass of water if able to swallow. |
|                         | Do not induce vomiting unless told to do so by a poison control center or doctor. |
|                         | Do not give anything by mouth to an unconscious person. |

| IF INHALED:             | Move person to fresh air. |
|                        | If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth, if possible. |
|                        | Call a poison control center or doctor for further treatment advice. |

| IF ON SKIN:              | Take off contaminated clothing. |
|                        | Rinse skin immediately with plenty of water for 15-20 minutes. |
|                        | Call a poison control center or doctor for treatment advice. |

**HOTLINE NUMBER**

Have the product container or label with you when calling a poison control center or doctor, for emergency info concerning this product, call the National Pesticide Information Center (NPIC) @ 1-800-858-7378.

**NOTE TO PHYSICIAN**

Early signs of intoxication include dilatation of pupils, muscular incoordination, and muscular tremors. Toxicity following accidental ingestion of this product can be minimized early by administration of chemical absorbents (e.g. - activated charcoal).

EPA Reg No. 90326-1
If toxicity from exposure has progressed to cause severe vomiting, the extent of resultant fluid and electrolyte imbalance should be gauged. Appropriate supportive care and fluid replacement therapy should be given, along with other required supportive measures (such as maintenance of blood pressure levels and proper respiratory function), as indicated by clinical symptoms, signs, and measurement. In severe cases, additional therapy should continue for at least several days until clinical condition is stable and normal. Since abamectin is believed to enhance GABA activity in animals, it is highly toxic to avoid drops that enhance GABA activity. Barbiturates, benzodiazepines, valproic acid in patients with potentially toxic exposure risk.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS WARNING - AVISO

Can cause substantial but temporary eye injury. Do not get in eyes. Harmful if swallowed. Avoid contact with skin or clothing.

Personal Protective Equipment

Some materials that are chemical resistant to this product are listed below. If you want more options, follow the instructions for Category A or an EPS chemical resistant category selection chart.

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Socks and shoes.
- Chemical-resistant gloves (such as barrier laminate, nitrile rubber, neoprene rubber, vinyl, rubber, or protective eyewear.

Discard clothing and other absorbent materials that have been drenched or heavily contaminated with this product's concentrate. Do not rewear. Follow manufacturer's instructions for cleaning/maintaining PPE. Follow such instructions for washables using a detergent and hot water, rinse and wash PPE separately from other laundry.

User-Safety Recommendations

Users should:
- Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.
- Remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.

ENVIRONMENTAL HAZARDS

This pesticide is toxic to fish and wildlife. Do not apply directly to water, to areas whose surface water is present, or to intertidal areas below the mean high water mark. Do not apply when weather conditions favor drift from target areas. Do not contaminate water when disposing of equipment or wash water. This product is highly toxic to bees exposed to direct treatment or residues on blooming crops or weeds. Do not apply this product or allow it to drift to blooming crops or weeds. Bees are foraging in the treatment area.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner not consistent with labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulations.

IMPORTANT - READ BEFORE USE

Read the entire Directions for Use, Limited Warranty and Disclaimer before using this product. If terms are not acceptable, return the unused product container at once. By using this product, user or buyer accepts all liabilities.

FAILURE TO FOLLOW DIRECTIONS AND PRECAUTIONS ON THIS LABEL MAY RESULT IN CROP INJURY, POOR INSECT CONTROL, AND/OR ILLEGAL RESIDUES.

AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard. See Part 195. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours. PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil, or water is:
- Galoshes over short-sleeved shirt and shorts.

Chemical-resistant gloves - EPA chemical-resistance category 1 (e.g., barrier laminates, nitrile rubber, neoprene rubber, vinyl).

Chemical-resistant shoes and socks.

Protective eyewear.

NON-AGRICULTURAL USE REQUIREMENTS

These requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for agricultural pesticides (40 CFR Part 195). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, and greenhouses. Do not enter treated areas until sprays have dried.

Shake and stir before each application.

TARGET CROPS

This product is not for outdoor use on lawns, turf, home gardens, ornamentals, flowers, shrubs or trees. This restriction applies to all uses listed on this label.

Wipe Out is a ready-to-use formula. Do not dilute with water. Apply as a foliar spray on growing medium for two or three applications. Wipe Out can cause material damage to leaves and flowers. Do not use this product in hanging basket or for indoor application. Do not use this product to control weeds or to control trees. Do not use this product in direct sunlight. Do not apply to plants that are sensitive to this chemical. Do not use this product on plants that are sensitive to this chemical. Do not use this product on plants that are sensitive to this chemical. Do not use this product on plants that are sensitive to this chemical. Do not use this product on plants that are sensitive to this chemical.

Resistance Management

Take out insects and weeds that are not resistant to Wipe Out Insecticide/ Miticide treatments. Use resistance management practices when using Wipe Out Insecticide/Miticide on plants that are hosts of Heteroptera pests that have more than one generation per crop or pest. Typically include, but are not limited to, rotation to other Insecticides with different modes of action, treatment of susceptible generations with different products, applications made at specified label rates or at specified spray intervals, and the use of non-chemical alternatives. For example, beneficial nematodes or rotation to susceptible plants. Contact your State Cooperative Extension Service or for additional information on these or other resistance management strategies.
To manage susceptibility in Liriomyza leafminer species. Make up to three applications of Wipe Out Insecticide/miticide and then rotate to Citation® Insecticide (which contains, the active ingredient cyromazine) for no more than three applications before rotating back to Wipe Out Insecticide/miticide or using another insecticide. Alternating between these two products which have different modes of action should be based on the generation of Liriomyza species to avoid applying Wipe Out Insecticide/miticide to successive generations.

Plant Tolerance
Although Wipe Out Insecticide/miticide has been tested for tolerance on a variety of ornamental plants, it is not possible to test Wipe Out Insecticide/miticide under all application conditions, such as when Wipe Out Insecticide/miticide is applied with combination products or with surfactants or adjuvants. Test a small area of plants for phytotoxicity to Wipe Out Insecticide/miticide before making applications to large blocks of plants. Phytotoxicity has been observed after the use of Wipe Out Insecticide/miticide on certain species of trees (e.g., Ailanthus spp.) and Shasta Daisy (Leucanthemum spp.).

Restrictions
• Do not use Wipe Out Insecticide/miticide for suppression of aphids, whiteflies, and thrips on roses, chrysanthemums, or gerbera. These ornamentals are primary hosts of mites and Liriomyza leafminers and Wipe Out Insecticide/miticide applications should target these insect pests. Additional applications of Wipe Out Insecticide/miticide to suppress aphids, thrips, and whiteflies on those plants will increase the selection pressure on mites and Liriomyza leafminers. Result in greater tolerance of these pests to Wipe Out Insecticide/miticide.
• Do not apply this product through any type of irrigation system.
• Do not apply to air.
• Do not use in citrus nurseries.
• Do not use on outdoor residential lawns, turf, home gardens, ornamentals, flowers, shrubs or trees.
• Do not apply more than 187.5 gallons of Wipe Out (0.019 lb. a.i.) per acre per application.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.
Do not reuse empty container.

Pesticide Storage
Store in a tightly closed container in a cool, dry place.

Pesticide Disposal
Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Pesticide spray mixtures that cannot be used should be disposed of in a landfill approved for pesticides. Improper disposal of excess pesticide spray mixtures is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

Container Disposal
Nonhazardous container. Do not reuse or refill this container. Offer for recycling if available.

LIMITED WARRANTY AND DISCLAIMER
B & K Distributors LLC warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below.

Our directions for use of this product are based upon tests believed to be reliable. The use of this product beyond control of the manufacturer, no guarantees, expressed or implied, is made as to the effects of such use or the results to be obtained if not used in accordance with printed directions and established safe practices. To the extent consistent with applicable law, buyer’s exclusive remedy and manufacturer’s or seller’s exclusive liability for any and all claims, losses, damages or injuries resulting from the use or handling of this product, whether or not based in contract, negligence, strict liability in tort or otherwise shall be limited, at the manufacturer’s option to replacement of, or the repayment of the purchase price for, the “with” respect to which damages are claimed.

Inherent Risks of Use
It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such use of the product contrary to label instructions (including conditions noted on the label, as unavoidable temperatures, soil conditions, etc.), abnormal conditions (such as excessive rain drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of B & K Distributors LLC or the seller. All such risk shall be assumed by buyer.

Terms and Conditions of Use
If terms of the Limited Warranty & Disclaimer and inherent risks of use are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer and Inherent Risks of Use.

Terms and Conditions of Use
If terms of the Limited Warranty & Disclaimer are not acceptable, return unopened package at once to the seller for a full refund of purchase price paid. Otherwise, use by the buyer or any other user constitutes acceptance of the terms under Warranty Disclaimer.

If you have any questions or concerns about our product we want to hear from you.
