Spectrum™ RX9800 MICROBIOCIDE AGENT

KEEP OUT OF REACH OF CHILDREN DANGER

FIRST AID
If Swallowed: Call a poison control center or a doctor immediately for treatment advice. DO NOT INDUCE VOMITING. Do not give anything to drink.
If In Eyes: Wash immediately and continuously with flowing water for at least 30 minutes. Remove contact lenses after the first 5 minutes and continue washing. Obtain prompt medical consultation, preferably from an ophthalmologist. Call a poison control center or a doctor immediately for treatment advice.
If On Skin Or Clothing: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or a doctor for treatment advice.
If Inhaled: Move person to fresh air. If person is not breathing, call 911 or an ambulance, and then give artificial respiration, preferably mouth-to-mouth, if possible. Call a poison control center or a doctor for further treatment advice.

NOTE TO PHYSICIAN: Aspiration may cause lung damage. Probable mucosal damage may contraindicate the use of gastric lavage.

PAPER MILLS AND PAPER MILL PROCESS WATER SYSTEMS - Add to the paper making system at a point of uniform mixing such as the beaters, broken chest pump, save-all tank, or white-water tank.

Initial Dose: When the system is noticeably contaminated add 0.5 to 3.0 lbs of this product per ton of pulp or paper (dry basis) as a slug dose. Repeat until control is achieved. Have fouled systems must be boiled out prior to initial treatment.

Subsequent Dose: When microbial control is evident, add 0.3 to 2.0 lbs of this product per ton of pulp or paper (dry basis) as a slug dose as necessary to maintain control.

STORAGE AND HANDLING - This product is incompatible with many commonly used materials of construction such as steel, galvanized iron, aluminum, tin and zinc. This product can be stored and handled in baked phenolic-lined steel, polyethylene, stainless steel, or reinforced epoxy-plastic equipment. This product freezes at about -6°F (-21°C). Therefore, unless the storage tank is inside or underground, heating and insulation may be required. If heating is needed, exposure to high temperature should be avoided. For short storage times (up to about 1 month), temperatures of up to 100°F (37°C) can be tolerated but the preferred maximum storage temperature is about 80°F (26.7°C).

A stainless steel centrifugal pump is suggested for transfer service. Squirrel-foot stainless steel with TEFLOM™ Polymer is suitable for gaskets and packing. Handle in a well-ventilated area. If vapors are irritating to the nose or eyes, special ventilation or respiratory protection (MSHA/NIOSH approved as purifying respirator equipped with an organic vapor cartridge) may be required.

DIRECTIONS FOR USE - It is a violation of Federal Law to use this product in a manner inconsistent with its labeling.

PIGMENTS AND FILLER SLURRIES FOR PAPER AND PAPERBOARD - (For use in food and non-food contact pigments and filler slurries)

From use from 0.1 to 0.6 lbs. this product per 1000 lbs. of dry powder to produce a concentration from 100 to 600 ppm as product (based on slurry solids) in the mixed slurry.

WATER BASED COATINGS FOR PAPER AND PAPERBOARD
NOTE: For use in non-food contact coatings only.

From 0.1 to 0.6 lbs. this product per 1000 lbs. of dry powder to produce a concentration from 100 to 600 ppm as product (based on slurry solids) in the mixed slurry.

PRESERVATIVE FOR CONCENTRATES - For use in concentrates where effective preservation is needed after dilution, add this product to the product formulation at a rate such that the diluted end-use product will contain 0.02% to 0.20% of this product. At no time during the preservation process should the level of this product exceed 2.0%.

GENERAL PRESERVATIVE USE - For use in aqueous or water containing products and systems, including industrial, institutional and consumer in-can processes and products to control the growth of bacteria and fungi. For effective preservation, add this product to the product formulation at a rate of 0.02% to 0.20% (200 to 2000 ppm) based on the water content of the product (0.2 to 2.0 lbs. this product per 1000 lbs. water content). Mix uniformly.

STORAGE AND DISPOSAL: Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited. Pesticides waste are not allowed to be disposed of in excess pesticide spray mixture or rinse is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State Pesticide or your Environmental Control Agency, or the Hazardous Wastes representative at the nearest EPA Regional Office for guidance.

CONTAINER HANDLING: Nonrefillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Offer for reconditioning, if appropriate.

FOR CONTAINERS GREATER THAN 5 GALLONS, Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container 1/4 full with water. Replace the tight fitting closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinse into application equipment or a mix tank or store rinse for later use or disposal. Repeat this procedure two more times.

FOR CONTAINERS UP TO 5 GALLONS, Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Stand for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after flow begins to drip. Repeat this procedure two more times.

NOTE: Buyer assumes all responsibility for safety and use not in accordance with directions. To the Extent Consistent with Applicable Law.
